XTRA-GUARD® 1 MULTICONDUCTOR, FOIL-SHIELDED CABLE — 300V

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

VW-1

Ultraviolet Light

EMI Noise

Extreme Performance in Critical, High-Technology Electronic Signal Applications

EXTREME PERFORMANCE BENEFITS:
- Unique premium-grade PVC insulation and jacket provides easier routing of cable in tight spaces
- Fast, easy stripping of insulation and jacket to reduce installation and connectorization time and cost
- Resistance to most oils per UL Oil Res and Class 43
- Resistance to ambient temperatures up to 105°C (221°F)
- Ultraviolet stabilized, all colors

XTRA-GUARD® 1 APPLICATIONS:
- EIA RS 232C Interface (24, 22 AWG)
- High-technology applications in controlled environments
- Medical electronics
- Point-of-sale equipment
- Computer peripherals
- Industrial process controls

XTRA-GUARD® 1 SPECIFICATIONS:
- UL Type CM, AWM Style 2464 overall; UL AWM Style 10002 conductors
- CSA CMG FT4
- Passes UL VW-1 and CSA FT4 Flame Tests
- UL listed, CSA certified, CE compliant

Stranded tinned copper conductors and color-coded premium PVC insulation. Aluminum/polyester shield, with foil facing in plus stranded tin-copper drain wire equal in size to conductors. Voltage rating: 300V. Operating temperature: -30°C to 105°C CM and CMG, -30°C to 80°C AWM 2464. Slate premium PVC jacket; other colors available; *go online or call.* FIT®-221 and FIT®-321 irradiated polyolefin heat-shrink tubing is recommended; *order separately online or call.* **Sold in spool sizes indicated in table below.**

XTRA-GUARD® 1 MULTICONDUCTOR SUPRA-SHIELD® CABLE — 600V

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Extreme Performance in Critical, High-Technology Electronic Signal Applications

Ultraviolet Light

EMI Noise

EXTREME PERFORMANCE BENEFITS:
- Provides easier routing of cable in tight spaces
- Fast, easy stripping of insulation and jacket to reduce installation and connectorization time and cost
- Resistance to most oils per UL Oil Res and Class 43
- Resistance to ambient temperatures up to 105°C (221°F)
- Ultraviolet stabilized, all colors
- Extreme performance against EMI/RFI with Supra-Shield® high-performance shielding system

XTRA-GUARD® 1 APPLICATIONS:
- EIA RS 232C Interface (22 AWG)
- High technology applications in controlled environments
- Point-of-sale equipment
- Computer peripherals
- Industrial process controls

XTRA-GUARD® 1 SPECIFICATIONS:
- UL Type MTW
- UL AWM Style 2501 overall; UL AWM Style 1015 conductors
- CSA AWM I A/B II A/B FT4 overall; CSA TEW conductors
- Passes UL VW-1 and CSA FT4 Flame Tests
- UL listed, CSA certified, CE compliant

Stranded tinned copper conductors and color-coded premium PVC insulation. Supra-Shield® aluminum/polyester/aluminum foil shielding with stranded tinned copper drain wire plus 70% overall tinned-copper braid. Voltage rating: 600V. Operating temperature: -30°C to 105°C AWM, -30°C to 90°C MTW. Slate premium PVC jacket; other colors available; *go online or call.* FIT®-221 and FIT®-321 irradiated polyolefin heat-shrink tubing is recommended; *order separately online or call.* **Sold in spool sizes indicated in table below.**

XTRA-GUARD® 1 MULTICONDUCTOR, UNSHIELDED CABLE — 300V

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Extreme Performance in Critical, High-Technology Electronic Signal Applications

Ultraviolet Light

EXTREME PERFORMANCE BENEFITS:
- Unique premium-grade PVC insulation and jacket provides easier routing of cable in tight spaces
- Fast, easy stripping of insulation and jacket to reduce installation and connectorization time and cost
- Resistance to most oils per UL Oil Res and Class 43
- Resistance to ambient temperatures up to 105°C (221°F)
- Ultraviolet stabilized, all colors

XTRA-GUARD® 1 APPLICATIONS:
- High-technology applications in controlled environments
- Medical electronics
- Point-of-sale equipment
- Computer peripherals
- Industrial process controls

XTRA-GUARD® 1 SPECIFICATIONS:
- UL Type CM, AWM Style 2464 overall; UL AWM Style 10002 conductors (24, 22, 20 AWG); UL AWM Style 1569 conductors (18, 16 AWG)
- CSA CMG FT4
- Passes UL VW-1 and CSA FT4 Flame Tests
- UL listed, CSA certified, CE compliant

Stranded tinned copper conductors and color-coded premium PVC insulation. Voltage rating: 300V. Operating temperature: -30°C to 105°C CM and CMG, -30°C to 80°C AWM 2464. Slate premium PVC jacket; other colors available; *go online or call.* FIT®-221 and FIT®-321irradiated polyolefin heat-shrink tubing is recommended; *order separately online or call.* **Sold in spool sizes indicated in table below.**

XTRA-GUARD® 1 MULTIPAIR SUPRA-SHIELD® CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Ultraviolet Light EMI Noise

Extreme Performance in Critical, High-Technology Electronic Signal Applications

EXTREME PERFORMANCE BENEFITS:

- Unique premium-grade PVC insulation and jacket provides easier routing of cable in tight spaces
- Fast, easy stripping of insulation and jacket to reduce installation and connectorization time and cost
- Resistance to most oils per UL Oil Res andClass 43
- Resistance to ambient temperatures up to 105°C (221°F)
- Ultraviolet stabilized, all colors
- Extreme performance against EMI/RFI with Supra-Shield® high-performance shielding system

XTRA-GUARD® 1 APPLICATIONS:

- EIA RS 232C Interface (24, 22 AWG)
- High-technology applications in controlled environments
- Point-of-sale equipment
- Computer peripherals
- Industrial process controls

XTRA-GUARD® 1 SPECIFICATIONS:

- UL AWM Style 2464 overall; UL AWM Style 10002 conductors (24, 22 AWG); UL AWM Style 1569 conductors (20, 18 AWG)
- CSA CMG FT4
- Passes UL VW-1 and CSA FT4 Flame Tests
- UL listed, CSA certified, CE compliant

Stranded tinned copper conductors and color-coded premium PVC insulation. Supra-Shield® aluminum/polyester/aluminum foil shielding with stranded tinned copper drain wire plus 70% overall tinned-copper braid. Voltage rating: 300V. Operating temperature: -30°C to 105°C CM and CMG, -30°C to 80°C AWM 2464. Slate premium PVC jacket; other colors available; *go online or call.* FIT®-221 and FIT®-321 irradiated polyolefin heat-shrink tubing is recommended; *order separately online or call.* **Sold in spool sizes indicated in table below.**

- Passes UL VW-1 and CSA FT4 Flame Tests
- UL listed, CSA certified, CE compliant

Stranded tinned copper conductors and color-coded premium PVC insulation. Aluminum/polyester foil shield facing in with stranded tinned copper drain wire. Voltage rating: 300V. Operating temperature: -30°C to 105°C. CM and CMG, -30°C to 80°C AWM 2464. Slate premium PVC jacket; other colors available; *go online or call.* FIT®-221 and FIT®-321 irradiated polyolefin heat-shrink tubing is recommended; *order separately online.* **Sold in spool sizes indicated in table below.**

XTRA-GUARD® CONTINUOUS FLEX CONTROL CABLE — SHIELDED

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

Extreme Performance in Single Axis, High-to-Severe Duty, Continuous Rolling or Bending Flexing Environments Up to 14 Million Flex Life Cycles

EXTREME PERFORMANCE BENEFITS:
- Flexible PVC insulation and jacket with overall cable design for installation in C-track or extreme flexing applications up to 14 million flex life cycles
- Outstanding service life in heavy-duty, high-speed cable track applications
- Unique premium-grade PVC insulation and jacket provides easier routing of cable in tight spaces
- Outstanding oil, solvent, chemical and fuel resistance
- Perfectly round geometry helps provide a liquid-tight installation per IP-67 or NEMA 6
- Superior performance against EMI/RFI

Flexing | Oils, Solvents, Chemicals, Fuels | EMI Noise | Abrasion

XTRA-GUARD® CONTINUOUS FLEX CONTROL CABLE APPLICATIONS:
- Where continuous flexing is required
- Robotics
- Installation in Cable Track
- Data Processing Equipment
- Assembly Lines
- Automation Equipment
- Material Handling Equipment

XTRA-GUARD® CONTINUOUS FLEX CONTROL CABLE SPECIFICATIONS:
- Bend radius: 8X cable diameter (static and dynamic)
- UL AWM Style 2587
- CSA AWM I/II A/B FT1
- Jacket meets VDE 0472, Section 803 Oil Test
- Passes MIL-C-13777G Flex Life Test
- CE LVD 73/23/EEC modified by Directive CD 93/68/EEC
- UL recognized, CSA certified, CE compliant

Super-finely stranded bare copper conductors, lubricated PVC insulation, tinned copper braid shield (85% coverage) and black, oil-resistant PVC jacket. Voltage rating: 600V. Operating temperature: -5°C to 90°C (flexing), -40°C to 90°C (stationary) . FIT®-FLEX and FIT®-650 heat-shrink tubing is recommended; *order separately online or call.* Other wire gauge sizes are available, including 12, 10, 8, 6, 4 and 2 AWG; *go online or call.* **Sold in spool sizes indicated in table below.**

XTRA-GUARD® CONTINUOUS FLEX, MULTICONDUCTOR DATA CABLE — SHIELDED

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Extreme Performance in Single Axis, High-Flex Duty, Continuous Rolling or Bending Flexing Environments Up to 6 Million Flex Life Cycles

Flexing · Oils, Solvents, Chemicals, Fuels · Ultraviolet Light · EMI Noise

EXTREME PERFORMANCE BENEFITS:
- Flexible PVC insulation and jacket with overall cable design for installation in C-track or high flexing applications up to 6 million flex life cycles
- Unique premium-grade PVC insulation and jacket provides easier routing of cable in tight spaces
- Outstanding oil, solvent, chemical and fuel resistance
- Perfectly round geometry helps provide a liquid-tight installation per IP-67 or NEMA 6
- Superior performance against EMI/RFI

XTRA-GUARD® CONTINUOUS FLEX, MULTICONDUCTOR DATA CABLE SPECIFICATIONS:
- Bend radius: 8X cable diameter (static and dynamic)
- UL Type CM, UL AWM Style 2661
- CSA AWM I A/B II A/B FT4, CSA Type CMG
- CE LVD 73/23/EEC modified by Directive CD 93/68/EEC
- UL listed, CSA certified, CE compliant

XTRA-GUARD® CONTINUOUS FLEX, MULTICONDUCTOR DATA CABLE APPLICATIONS:
- Industrial electronic processing equipment
- DataComm connections
- Connecting sensors and actuators to controllers
- Sensor and I/O interconnects

Super finely stranded tinned copper conductors, lubricated semi-rigid PVC insulation and slate, oil-resistant PVC jacket. Foil shield with 90% tinned copper serve and 7 x 34 stranded tinned copper drain wire. Voltage rating: 300V. Operating temperature: +5°C to 105°C (flexing), -10°C to 105°C (stationary). FIT®-FLEX and FIT®-650 heat-shrink tubing is recommended; *order separately online or call.* Also available in an unshielded version; *go online or call.* **Sold in spool sizes indicated in table below.**

XTRA-GUARD® CONTINUOUS FLEX, MULTIPAIR DATA CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Extreme Performance in Single Axis, High-Flex Duty, Continuous Rolling or Bending Flexing Environments Up to 6 Million Flex Life Cycles

Flexing · Oils, Solvents, Chemicals, Fuels · Ultraviolet Light · EMI Noise

EXTREME PERFORMANCE BENEFITS:
- Flexible PVC insulation and jacket with overall cable design for installation in C-track or high flexing applications up to 6 million flex life cycles
- Unique premium-grade PVC insulation and jacket provides easier routing of cable in tight spaces
- Outstanding oil, solvent, chemical and fuel resistance
- Perfectly round geometry helps provide a liquid-tight installation per IP-67 or NEMA 6
- Superior performance against EMI/RFI

XTRA-GUARD® CONTINUOUS FLEX, MULTIPAIR DATA CABLE SPECIFICATIONS:
- Bend radius: 10X cable diameter (static); 15X cable diameter (dynamic)
- UL Type CM, UL AWM Style 2661
- CSA AWM I A/B II A/B FT4, CSA Type CMG
- CE LVD 73/23/EEC modified by Directive CD 93/68/EEC
- UL listed, CSA certified, CE compliant

XTRA-GUARD® CONTINUOUS FLEX, MULTIPAIR DATA CABLE APPLICATIONS:
- Industrial electronic processing equipment
- DataComm connections
- Automation networking
- PLC, microprocessor and computer interconnects
- Connecting sensors and actuators to controllers

Super finely stranded tinned copper conductors, lubricated semi-rigid PVC insulation and slate, oil-resistant PVC jacket. Foil shield with 85% tinned copper braid and 7/34 stranded tinned copper drain wire. Voltage rating: 300V. Operating temperature: +5°C to 105°C (flexing), -10°C to 105°C (stationary). FIT®-FLEX and FIT®-650 heat-shrink tubing is recommended; *order separately online or call.* **Sold in spool sizes indicated in table below.**

28 AWG (0,09mm²), 7 x 36 STRANDING, 0.010″ INSULATION THICKNESS

XTRA-GUARD® STANDARD FLEX CABLE — SHIELDED

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

Extreme Performance in Single Axis, Light-to-Moderate Duty, Flexing Environments Up to 1 Million Flex Life Cycles

Flexing · Oils, Solvents, Chemicals, Fuels · EMI Noise · Abrasion

EXTREME PERFORMANCE BENEFITS:
- Flexible PVC insulation and jacket with overall cable design for installation in C-track or simple flexing applications up to one million flex life cycles
- Unique premium-grade PVC insulation and jacket provides easier routing of cable in tight spaces
- Outstanding oil, solvent, chemical and fuel resistance
- Perfectly round geometry helps provide a liquid-tight installation per IP-67 or NEMA 6
- Superior performance against EMI/RFI

XTRA-GUARD® STANDARD FLEX CABLE APPLICATIONS:
- Where increased flexing is required
- Machine tools
- CNC machine centers
- Data processing equipment
- Automation equipment
- Material handling equipment

XTRA-GUARD® STANDARD FLEX CABLE SPECIFICATIONS:
- Bend radius: 8X cable diameter (static and dynamic)
- UL AWM Style 2587
- CSA AWM I A/B II A/B FT1
- Jacket meets VDE 0472, Section 803 Oil Test
- CE LVD 73/23/EEC modified by Directive CD 93/68/EEC
- UL recognized, CSA certified, CE compliant

Finely stranded bare copper conductors, lubricated PVC insulation, tinned-copper braid shield (85% coverage) and slate, oil-resistant PVC jacket. Voltage rating: 600V. Operating temperature: -5°C to 90°C (flexing), -40°C to 90°C (stationary). FIT®-FLEX and FIT®-650 heat-shrink tubing is recommended; *order separately online or call.* Other wire gauge sizes are available, including 12, 10, 8, 6, 4 and 2 AWG; *go online or call.* **Sold in spool sizes indicated in table below.**

DATA/COMMUNICATION, CONTROL & INSTRUMENTATION CABLE

XTRA-GUARD® TORSIONAL FLEX MULTICONDUCTOR SHIELDED CABLE

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

Extreme Performance in Multi-Axis, Torsional Flexing Applications Up to 360° From Neutral Position

EXTREME PERFORMANCE BENEFITS:
- Flexible TPES insulation and extra rugged polyurethane jacket with overall cable design for installation in twisting and random robotic flexing applications +/-360° per meter
- Outstanding service life in heavy-duty, high-speed torsional applications
- High oil, solvent, chemical and fuel resistance
- Perfectly round geometry helps provide a liquid-tight installation per IP-67 or NEMA 6
- Superior performance against EMI/RF

Flexing · Oils, Solvents, Chemicals, Fuels · Abrasion · EMI Noise

XTRA-GUARD® TORSIONAL FLEX MULTICONDUCTOR SHIELDED CABLE APPLICATIONS:
- Twisting and random robotic flexing applications
- Power supply to welding, painting and articulating robots
- Automation networking
- Connecting sensors and actuators to controllers

XTRA-GUARD® TORSIONAL FLEX MULTICONDUCTOR SHIELDED CABLE SPECIFICATIONS:
- UL AWM 20234
- CSA AWM I A/B II A/B FT1
- CE LVD 73/23/EEC modified by Directive CD 93/68/EEC
- UL recognized, CSA certified, CE compliant

Stranded bare copper conductors and TPES (thermoplastic elastomer) insulation. Tinned copper spiral shield provides 90% coverage. Black, oil-resistant polyurethane jacket. Minimum bend radius: 10X O.D. (static), 15X O.D. (dynamic). Maximum twisting: ±360° per meter. Voltage rating: 600V. Operating temperature: -10°C to 80°C (flexing), -30°C to 80°C (stationary). FIT®-FLEX and FIT®-650 heat-shrink tubing is recommended; *order separately online or call.* **Sold per foot.**

DATA/COMMUNICATION, CONTROL & INSTRUMENTATION CABLE

XTRA-GUARD® INDUSTRIAL ETHERNET CAT 5e UNSHIELDED AND SHIELDED MULTIPAIR CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Supra-Shield® Foil Shield + Braid

Rugged Connectivity for Industrial Networking

- Wide temperature range:-50° to +105°C (PP insulated) and +125°C (FEP insulated)
- Unshielded, foil shielded, or Supra-Shield® foil + braid for best EMI protection
- Extra tough, abrasion-rersistant TPE jacket is flexible and routable
- Sunlight, fluid, and abrasion resistant
- Meets ANSI/TIA-568-C.2 Cat 5e requirements
- Supports data rates up to Gigabit Ethernet
- UL Type CMR
- Passes UL 1666 Riser and CSA FT-4 flame test
- Suitable for use in NFPA 79 applications

Abrasion · Low Temperature · EMI Noise · Oils, Solvents, Chemicals, Fuels · High Temperature

Xtra-Guard® Industrial Ethernet multipaired cable is designed for uncompromising performance to keep networks running anywhere. This Category 5e cable combines the advanced technology of Ethernet communications with the durability and temperature range of an Xtra-Guard® 4 jacket. The result is a flexible and routable Ethernet cable that provides rugged, reliable performance in the most extreme environments. Choice of unshielded, foil shield or Supra-Shield® foil + braid for exceptional EMI resistance. Features two or four twisted pair 24 AWG solid or stranded bare copper conductors, PP (polypropylene) or FEP insulation, and an abrasion-resistant thermoplastic elastomer jacket. Color: black. **Sold in 500′ and 1000′ spools.**

EcoFlex™ SUPRA-SHIELD® FOIL+BRAID SHIELDED MULTICONDUCTOR CONTROL CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

eco Gen™ From AlphaWire

EcoFlex™ Cable — Smaller, Lighter, Tougher, Recyclable, Flexible

VW-1

Features

- Eco-friendly, non-halogenated and 100% recyclable
- Compact for moderate flex applications
- Rated for more than 1 million flex cycles
- Easier routing and handling
- Up to 32% smaller diameter than PVC, PE and XLPE
- Up to 55% lighter than PVC, PE and XLPE
- Handles temperature extreme to -40°C
- Up to 91% lower outgassing compared to PVC
- Supra-Shield® provides excellent EMI protection

Specifications

- Recyclable mPPE thermoplastic insulation and jacket
- Stranded tinned-copper conductors
- Supra-Shield® — halogen-free aluminum mylar foil plus a tinned-copper braid
- Bend radius: 6x static, 8x flexing
- Voltage rating: 600V
- Temperature range: -40°C to 105°C static; -5°C to 105°C flexing
- Jacket thickness: 20-16 AWG 0.035″ (0.89mm), 14-10 AWG 0.032″ (0.81mm)
- Jacket color: Slate
- UL AWM 21819 (600V, 105°C)
- UL AWM 21492 (300V, 80°C)
- CSA AWM I/II A/B FT1
- Suitable for NFPA 79 applications
- Passes UL VW-1 flame test
- IEC 60332-2 flame behavior
- UL recognized, CSA certified, CE compliant
- RoHS, REACH, WEEE compliant

EcoFlex™ Supra-Shield® foil+braid shielded multiconductor control cable combines better performance with a minimum environmental impact. Contains no halogens, phthalates,or heavy metals enabling it to meet RoHS, REACH, and WEEE requirements for the elimination of hazardous substances and recyclability. Low 1.03 specific gravity of mPPE (Modified Polyphenylene Ether) is 25% to 40% lower than other insulation materials and along with the reduced wall thickness, the low specific gravity yields significant weight savings of up to 55%. Superior dielectric properties of mPPE make a reduced wall thickness possible, while maintaining the same electrical properties as a thicker PVC. **Sold in 100′ and 1000′ spools.**

COMBINATION SHIELDED PAIRED AUDIO, COMMUNICATION AND INSTRUMENTAION CABLE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

Mfg. part no. 8434 25 AWG stranded (7x33) polyethylene insulated pairs have three tinned copper and four copper-covered steel strands in each conductor. The red/black pair is shielded with Beldfoil® aluminum-polyester shield and has a 25 AWG stranded tinned copper drain wire. Both pairs are overall 100% Beldfoil® shielded under a chrome PVC jacket. Pairs are cabled on common axis to reduce diameter. Nominal outer diameter: 0.165″ (4.191mm). Capacitance between conductors: 25pF/ft (82pF/m). Max. operating voltage: 400V. Operating temperature range: -20°C To +80°C.

EcoFlex™ BRAID SHIELDED MULTICONDUCTOR CONTROL CABLE

RoHS Compliant Available

AlphaWire Cables you trust. Service you deserve.

eco gen™ From AlphaWire

VW-1

EcoFlex™ Cable — Smaller, Lighter, Tougher, Recyclable, Flexible

Features
- Eco-friendly, non-halogenated and 100% recyclable
- Compact for moderate flex applications
- Rated for more than 1 million flex cycles
- Easier routing and handling
- Up to 32% smaller diameter than PVC, PE and XLPE
- Up to 55% lighter than PVC, PE and XLPE
- Handles temperature extreme to -40°C
- Up to 91% lower outgassing compared to PVC

Specifications
- Recyclable mPPE thermoplastic insulation and jacket
- Stranded tinned-copper conductors
- Tinned-copper braided shield for EMI protection
- Bend radius: 6x static, 8x flexing
- Voltage rating: 600V
- Temperature range: -40°C to 105°C static; -5°C to 105°C flexing
- Jacket thickness: 20-16 AWG 0.035″ (0.89mm), 14-10 AWG 0.032″ (0.81mm)
- Jacket color: Slate
- UL AWM 21819 (600V, 105°C)
- UL AWM 21492 (300V, 80°C)
- CSA AWM I/II A/B FT1
- Suitable for NFPA 79 applications
- Passes UL VW-1 flame test
- IEC 60332-2 flame behavior
- UL recognized, CSA certified, CE compliant
- RoHS, REACH, WEEE compliant

EcoFlex™ braid shielded multiconductor control cable combines better performance with a minimum environmental impact. Contains no halogens, phthalates,or heavy metals enabling it to meet RoHS, REACH, and WEEE requirements for the elimination of hazardous substances and recyclability. Low 1.03 specific gravity of mPPE (Modified Polyphenylene Ether) is 25% to 40% lower than other insulation materials and along with the reduced wall thickness, the low specific gravity yields significant weight savings of up to 55%. Superior dielectric properties of mPPE make a reduced wall thickness possible, while maintaining the same electrical properties as a thicker PVC. **Sold in 100′ and 1000′ spools.**

20 AWG (0.51mm²), 10x30 (10x0.25mm²) STRANDING, 0.010″ (0.25mm) INSULATION THICKNESS

DATA/COMMUNICATION, CONTROL & INSTRUMENTATION CABLE

EcoFlex™ UNSHIELDED MULTICONDUCTOR CONTROL CABLE

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

eco gen™ From AlphaWire

EcoFlex™ Cable — Smaller, Lighter, Tougher, Recyclable, Flexible

Features
- Eco-friendly, non-halogenated and 100% recyclable
- Compact for moderate flex applications
- Rated for more than 1 million flex cycles
- Easier routing and handling
- Up to 32% smaller diameter than PVC, PE and XLPE
- Up to 55% lighter than PVC, PE and XLPE
- Handles temperature extreme to -40°C
- Up to 91% lower outgassing compared to PVC

Specifications
- Recyclable mPPE thermoplastic insulation and jacket
- Stranded tinned-copper conductors
- Bend radius: 5x static and flexing
- Voltage rating: 600V
- Temperature range: -40°C to 105°C static; -5°C to 105°C flexing
- Jacket thickness: 20-16 AWG 0.035″ (0.89mm), 14-10 AWG 0.032″ (0.81mm)
- Jacket color: Slate
- UL AWM 21819 (600V, 105°C)
- UL AWM 21492 (300V, 80°C)
- CSA AWM I/II A/B FT1
- Suitable for NFPA 79 applications
- Passes UL VW-1 flame test
- IEC 60332-2 flame behavior
- UL recognized, CSA certified, CE compliant
- RoHS, REACH, WEEE compliant

EcoFlex™ unshielded multiconductor control cable combines better performance with a minimum environmental impact. Contains no halogens, phthalates, or heavy metals enabling it to meet RoHS, REACH, and WEEE requirements for the elimination of hazardous substances and recyclability. Low 1.03 specific gravity of mPPE (Modified Polyphenylene Ether) is 25% to 40% lower than other insulation materials and along with the reduced wall thickness, the low specific gravity yields significant weight savings of up to 55%. Superior dielectric properties of mPPE make a reduced wall thickness possible, while maintaining the same electrical properties as a thicker PVC. **Sold in 100′ and 1000′ spools.**

8777

Polyproylene insulation. **Mfg. part no. 8777** tinned copper conductors, twisted pairs. Each pair individually shielded with Beldfoil® aluminum-polyester shield and stranded tinned copper drain wire. Overall chrome PVC jacket. 30V, 80°C. UL recognized 2919; NEC Type CM. **Mfg. part no. 8723** tinned copper conductors. Black and red under Beldfoil® aluminum-polyester shield, green and white under Beldfoil® aluminum-polyester shield. Stranded tinned common drain wire. Chrome PVC jacket. Pairs cabled on common axis to reduce diameter. 60°C. NEC Type CM. Capacitance for **mfg. part no. 8777** is 30pF/Ft.; for **mfg. part no. 8723** is 35pF/Ft.

DATA/COMMUNICATION, CONTROL & INSTRUMENTATION CABLE

EcoCable® SUPRA-SHIELD® FOIL+BRAID SHIELDED MULTICONDUCTOR CONTROL CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

eco gen™ From AlphaWire

EcoCable® — Smaller, Lighter, Tougher, 100% Recyclable

Features

- Eco-friendly, non-halogenated and recyclable
- Up to 47% smaller diameter than PVC, PE and XLPE
- Up to 65% lighter than PVC, PE and XLPE
- Handles temperature extreme to -50°C
- Up to 87% lower outgassing compared to PVC
- Supra-Shield® provides excellent EMI protection

Specifications

- Recyclable mPPE thermoplastic insulation and jacket
- Stranded tinned-copper conductors
- Supra-Shield® — halogen-free aluminum mylar foil plus a tinned-copper braid
- Bend radius: 6x
- Voltage rating: 600V
- Temperature range: -50°C to 105°C
- Jacket thickness: 0.032″ (0.81mm)
- Jacket color: Slate
- UL AWM 21510 (600V, 105°C)
- CSA AWM I/II A/B FT1
- Suitable for NFPA 79 applications
- Passes UL VW-1 flame test
- IEC 60332-2 flame behavior
- UL recognized, CSA certified, CE compliant
- RoHS, REACH, WEEE compliant

EcoCable® Supra-Shield® foil+braid shielded multiconductor control cable combines better performance with a minimum environmental impact. Contains no halogens, phthalates,or heavy metals enabling it to meet RoHS, REACH, and WEEE requirements for the elimination of hazardous substances and recyclability. Low 1.03 specific gravity of mPPE (Modified Polyphenylene Ether) is 25% to 40% lower than other insulation materials and along with the reduced wall thickness, the low specific gravity yields significant weight savings of up to 65%. Superior dielectric properties of mPPE make a reduced wall thickness possible, while maintaining the same electrical properties as a thicker PVC. **Sold in 100′ and 1000′ spools.**

LOW-SMOKE, ZERO-HALOGEN (LSZH) SHIPBOARD AUDIO/VIDEO CABLE

RoHS Compliant Available

BELDEN — BENDING ALL THE RIGHT SIGNALS

Brilliance®

- Delivers high-end A/V quality
- American Bureau of Shipping (ABS) approval for use in demanding marine applications
- Ideal for private yachts and commerical ships
- Fast, easy installation — no special installing techniques or equipment required
- Exclusive 10-year manufacturer's warranty

LSZH series shipboard A/V cable is designed to implement a wide range of shipboard audio, video, multimedia, security, networking and control applications. All types feature copper conductors, black, low-smoke, zero-halogen (LSZH) jackets, and are fully-compliant with industry and global environmental standards including IEEE 45 and applicable sections of IEC 60092-376 for low-smoke and zero-halogen. **Sold in 1000′ spools.**

BRILLIANCE® AUDIO, CONTROL AND INSTRUMENTATION MULTICONDUCTOR PAIRED CABLE

Single- and multi-pair cable features tinned-copper conductors and Beldfoil® shielding — **mfg. part no. 9451SB** has 100% overall shield and **mfg. part nos. 8723SB** and **8777SB** have individually shielded pairs. **Mfg. part no. 1502SB** multimedia control cable has Beldfoil® shielded data pair and unshielded power pair.

Mfg. Part No.	No. of Pairs	AWG (Stranding)	Nom. O.D. (mm)	Stock No.	Price per Spool
● 9451SB 0101000	1	(7 x 30AWG)	4.064	66K6060	400.50
● 8723SB 0101000	2	(7 x 30AWG)	4.978	66K6057	706.19
● 8777SB 0101000	3	(7 x 30AWG)	6.934	66K6058	1073.82
● 1502SB 0101000	2	22 (7 x 30) Data 18 (16 x 30) Power	6.477	30M7012	797.88

AES/EBU DIGITAL AUDIO CABLE

Tinned-copper conductors, twisted pair with 100% overall Beldfoil® shield.

● 1350SB 0101000	1	(7 x 32AWG)	4.547	18M1295	552.39

HIGH-STRAND SPEAKER CABLE

Ideal for unshielded audio and control applications that demand high-flex and high-purity, this cable features tinned-copper conductors.

Mfg. Part No.	No. of Cond.	AWG (Stranding)	Nom. O.D. (mm)	Stock No.	Price per Spool
● 1314SB 0101000	2	(41 x 30AWG)	7.620	30M6944	603.43
● 1315SB 0101000	4	(41 x 30AWG)	8.611	30M6945	1132.12

BRILLIANCE® COAXIAL CABLE

Mfg. part no. 9116SB broadband CATV 75-ohm coax features copper-covered steel conductor and Duobond® II shield with aluminum braid. **Mfg. part nos. 1694SB** and **7731SB** low-loss, 75-ohm precision video coax for analog and digital applications feature bare copper conductor and Duofoil® shield with tinned-copper braid.

Mfg. Part No.	RG/U	AWG (Stranding)	Nom. O.D. (mm)	Stock No.	Price per Spool
● 9116SB 0101000	Series 6	(Solid)	6.960	66K6059	379.05
● 1694SB 0101000	RG6	(Solid)	6.960	66K6049	823.48
● 7731SB 0101000	RG11	(Solid)	10.160	30M7503	2022.20

DATATWIST® CAT 5e AND 6 TWISTED NONBONDED-PAIRED CABLE

Mfg. part no. 1300SB features bare-copper conductors with overall Beldfoil® shield and is rated TIA/EIA-568-B.2, Category 5e ScTP and RJ-45 compatible. **Mfg. part no. 1319SB** features unshielded bare-copper conductors with central rod filler and is rated TIA/EIA-568-B.2.1, Category 6 UTP.

Mfg. Part No.	No. of Pairs	AWG (Stranding)	Nom. O.D. (mm)	Stock No.	Price per Spool
● 1300SB 0101000	4	(Solid)	6.604	66K6046	640.45

EcoCable® FOIL SHIELDED MULTICONDUCTOR CONTROL CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

eco Gen™ From AlphaWire

EcoCable® — Smaller, Lighter, Tougher, 100% Recyclable

Features

- Eco-friendly, non-halogenated and recyclable
- Up to 47% smaller diameter than PVC, PE and XLPE
- Up to 65% lighter than PVC, PE and XLPE
- Handles temperature extreme to -50°C
- Up to 87% lower outgassing compared to PVC

Specifications

- Recyclable mPPE thermoplastic insulation and jacket
- Stranded tinned-copper conductors
- Halogen-free aluminum mylar foil shield for EMI protection
- Bend radius: 6x
- Voltage rating: 600V
- Temperature range: -50°C to 105°C
- Jacket thickness: 0.032″ (0.81mm)
- Jacket color: Slate
- UL AWM 21510 (600V, 105°C)
- CSA AWM I/IIABFT1
- Suitable for NFPA 79 applications
- Passes UL VW-1 flame test
- IEC 60332-2 flame behavior
- UL recognized, CSA certified, CE compliant
- RoHS, REACH, WEEE compliant

EcoCable® foil shielded multiconductor control cable combines better performance with a minimum environmental impact. Contains no halogens, phthalates,or heavy metals enabling it to meet RoHS, REACH, and WEEE requirements for the elimination of hazardous substances and recyclability. Low 1.03 specific gravity of mPPE (Modified Polyphenylene Ether) is 25% to 40% lower than other insulation materials and along with the reduced wall thickness, the low specific gravity yields significant weight savings of up to 65%. Superior dielectric properties of mPPE make a reduced wall thickness possible, while maintaining the same electrical properties as a thicker PVC. **Sold in 100′ and 1000′ spools.**

NEW GENERATION® SHIELDED TWISTED PAIRED (STP) PLENUM-RATED CABLE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

- Low capacitance: 34 pF/Ft. nom. between conductors
- Small outer diameter for easy routing through tight openings and better space use
- Highly-flexible, low-smoke Flammarest® PVC insulation and jacket for easier installation

Plenum-rated, individually shielded two and three twisted paired cable are ideal for commercial sound and audio applications such as intercoms and PA systems. Also used for instrumentation and control equipment, security systems, power-limited control systems and access control devices. 22 AWG stranded (7x30) tinned copper conductors with a common 24 AWG stranded tinned copper drain wire. Individually Beldfoil® aluminum/polyester foil shielded pairs for 100% coverage. Voltage rating: 300V. Temperature rating: +75°C max. Jacket color: white. Rated: UL NEC: CMP/CEC:CMP FT6.

FIRE ALARM CABLE

UL · RoHS Compliant Available · BELDEN SENDING ALL THE RIGHT SIGNALS

Unshielded Riser

Shielded Plenum

New Generation® fire alarm cable protects against system failures. Ideally suited for high-reliability applications such as fire and security alarm systems, signal, and monitor/detection. Solid bare copper conductors, PVC insulation, red PVC jacket with ripcord, sequential footage marked. UL Type FPLR, NEC article 760, 75°C, California State Fire Marshall approved. UL listed. **Sold in spools of 1000′.**

NEW GENERATION® SOUND, SPEAKER AND SECURITY/ ALARM CABLE

UL · RoHS Compliant Available · BELDEN SENDING ALL THE RIGHT SIGNALS

New Generation® unshielded and shielded riser and plenum rated cable provides dependability in your security and alarm systems. Applications include: background music, nurse call, security systems, intercom/PA systems, sound/audio, power limited controls. **Suffix -U** in mfg. part number indicates shrink wrap Belcoil® packaging.

UNSHIELDED AND SHIELDED RISER CABLE 5504FE

Unshielded and shielded riser cable CMR/CMG FT4 rated, NEC Article 800 except where noted with (*) CMR FPLR and CL3R dual rated, NEC Articles 725 and 760. Gray PVC jacket with rip cord. Sequential footage marked every two feet.

3811 SERIES 0.050″ 26AWG COLOR-CODED FLAT CABLE – STRANDED, PVC

c UL us · RoHS Compliant Available · 3M

- 0.050″ centers permit mass termination to a broad line of IDC connectors
- 26 AWG wire allows for higher power levels
- Stranded wire provides flexibility and extended product life
- Zippable for branching or discrete termination
- Color coded for wire identification

Rainbow PVC insulation with 10-color repeat (Brown, Red, Orange, Yellow, Green, Blue, Violet, Gray, White, Black) and clear carrier. Features 26 AWG, 7x34 stranded tinned-copper conductors. Impedance: 95Ω unbalanced. Insulation resistance: >1×109Ω/10′ (3m). Voltage rating: USA 300V; Canada 150V; EU <50V. Temperature rating: USA -20°C to +105°;C Canada -20°C to +80°C. Flammability rating: USA VW-1; Canada FT1. Available in additional widths (number of conductors); *go online or call.* **Sold in 100′ spools.**

1700 SERIES 0.050″ TWISTED PAIR FLAT CABLE — 28 AWG STRANDED

VW-1 RoHS Compliant Available

- Designed for mass termination
- Voltage Rating: 300V
- Temperature Rating: –20°C to +80°C
- Passes VW-1 Vertical Wire Flame Test

28 AWG 7×36 (7×0.127) stranded copper conductors, insulated with color-coded PVC, are twisted into pairs and laminated to a clear PVC film to form a planar cable. 18″ twisted pair sections are alternated with 2″ parallel sections where the conductors can be mass-terminated to a broad line of insulation displacement connectors. Polyvinyl chloride insulator. UL recognized, file no. E42769, style 20462. **Sold in 100′ spools.**

3659 SERIES 0.050″ ROUND, SHIELDED/ JACKETED FLAT CABLE

UL NEC RoHS Compliant Available 3M

- Round construction permits easier routing
- 28 AWG 7×36 stranded wire on 0.050″ pitch permits mass termination of IDC connectors
- Primary flat cable is zippable for branching or discrete terminations
- Dual shielding provides 35db average shielding effectiveness
- PVC insulation provides excellent flexibility
- UL listed, UR recognized

3659 series cable features a round, black PVC outer jacket over gray PVC insulated flat cable that is folded, wrapped with an aluminum/polyester film foil and enclosed in a round, 90% tinned-copper braid for EMI/ESD protection. Continuous split/bonded, tinned copper conductors allow for mass termination to IDC connectors. Folded construction permits mass termination every 2.4″ (61). Meets external wiring requirements of National Electrical Code, Article 725 (CL2). UL file no. E118773, Power Limited Circuit Cable CL2 (or AWM) Style 20267. Temperature rating: –20°C to +105°C. **Sold in 100′ spools.**

3749 SERIES 0.025″ (0.64), ROUND CONDUCTOR, SOLID, 30 AWG TPE FLAT CABLE

RoHS Compliant Available 3M

- Close spacing permits higher signal density
- Conductors with TPE insulation have resistance $>1\times10^{10}$ ohms/10′
- Voltage rating: 150V
- Impedance: 85 ohms
- Temperature rating: +105°C

UL recognized. **Sold in 100′ spools.**

3750 SERIES TWISTED PAIR SHIELDED DISCRETE ROUND CABLE

UL RoHS Compliant Available 3M

3750 series cable comprises 26 AWG 7x4″ (7x 0.160) tinned stranded copper wire, which can be terminated to a broad line of IDC connectors and carry higher power levels in long I/O harnesses. The twisted pairs reduce crosstalk for balanced drive applications or can be used as discrete wires for unbalanced drive applications. Dual shields consisting of 90% tinned copper braid and aluminized polyester wrap provide excellent EMI/ESD protection and aid in the compliance of FCC requirements. Voltage rating: 300V. Temperature rating: –20°C to +80°C. UL listed, file no. E118772, style 2464. **Sold in 100′ spools.**

(8433)

3756 SERIES 0.025″ ROUND CONDUCTOR, STRANDED, 30 AWG, TPE FLAT CABLE

RoHS Compliant Available 3M

- 0.025″ wire spacing increases signal density
- Designed for flexibility and mass termination to IDC connectors
- Meets SCSI-3 characteristic impedance requirements

Gray thermoplastic elastomer (TPE) insulation provides excellent transmission properties. Round 30 AWG, 7x38 stranded tinned-copper conductors. Insulation resistance: $>1\times10^{10}\Omega/10'$ (3m). Impedance: 82Ω unbalanced/138Ω balanced. Voltage rating: 150V. Temperature rating: -40°C to +105°C. Flammability rated: USA, VW-1; Canada, FT1. UL file no. E42769, style no. 20297. UL recognized. Other sizes available; *go online or call.* **Sold in 100′ spools.**

3484-1000

3535-0000

FLAT RIBBON CABLE CLIP

Mfg. part no. 3484-1000 cable clip organizes cable routing by clamping and retaining up to six layers of flat cable. Constructed of gray PVC with urethane foam tape backing. Flammability rating: UL94V-0. Maximum operating temperature: 65°C. **Sold in packages of 100.**

Mfg. Part No.	Description	Stock No.	Price per Package 1-4	5-9
3484-1000	Flat Ribbon Cable Clip	94F1485	19.83	17.29

DRAIN WIRE SPRING CLIP

Mfg. part no. 3535-0000 drain wire spring clips are used to attach a drain wire to the shield of a round cable. The drain wire can then be routed to a metal cabinet or through the connector body to the inside of the cabinet. One size spring clip fits all sizes of cable; 9—64 conductor, while providing the same force for each cable diameter. Constructed of stainless steel. **Sold individually.**

Mfg Part No.	Description	Stock No.	Price Each 1-4	5-9
3535-0000	Drain Wire Spring Clip	94F7959	0.91	0.80

(8523)

HF319 SERIES HIGH FLEX LIFE HALOGEN-FREE RIBBON CABLE

RoHS Compliant Available

Features:

- Low Smoke Zero Halogen (LSZH) polyolefin insulation
- Flex life of 25 million cycles at 3/4 inch radius
- 19 strands of high-strength silver-plated copper provide exceptionally long flex life
- 28 AWG stranded wire on 0.050″ wire spacing permits mass termination to 0.100″ IDC connectors
- Zippable for branching or discrete termination
- Voltage rating: 300V (USA), 150V (Canada)
- Operating temperature range: -40°C to 105°C
- Color: dark grey

Applications:

- Internal (inside-the-box) confined space applications requiring multiple, repetitive movements
- Automated consumer products, such as vending machines
- Industrial production equipment with moving parts / robotics
- Transportation applications such as train, automotive, mass transit
- Military / Aerospace
- General electronics applications where safety or environmental policies limit halogen content

HF319 series High Flex Life ribbon cable constructed of 28 AWG 19×40 stranded highly-flexible silver-plated copper conductors and a low smoke zero halogen polyolefin (PO) insulation that meets proposed regulatory requirements and safety guidelines IEC 61034-2:2005 (low smoke) and NF X 70-100-2:2006 (low toxicity of combustion gases), reducing the risk to firefighters, and reducing the soot and corrosion damage to nearby equipment. **Sold in 100′ and 300′ spools.**

SL8800 SERIES TWIN-AXIAL FLAT RIBBON CABLE

RoHS Compliant Available

3M

With Sideband

Without Sideband

Flat, Fast, Flexible, Foldable

- Ultra-low-profile design makes it more routable, space-efficient and easier to terminate
- Extremely thin — only 0.88mm thick
- Easily bent and folded with little to no impact on electrical performance
- Up to 25Gbps
- Four 100 Ohm differential pairs, two drain wires
- Bi-directional SAS channels with or without sideband
- 30 AWG copper conductors — silver or tin plated
- 0.79mm within-pair pitch
- Solid polyolefin insulation

SL8800 series 3M™ flat, high-speed, high signal density, four-pair twin axial ribbon cable is ideally suited for high data-rate internal cabling applications, such as, paddle card terminated cable assemblies, servers, storage systems, network switches and routers, and high-performance computing. The unique ribbon structure is comprised of four pairs of silver- or tin-plated 30 AWG solid copper conductors, with two 32 AWG 7x40 stranded tin-plated copper outside drain wires. Cable with sideband have an additional four 30 AWG solid tin-plated copper conductors.The longitudinal shielded construction provides resonance-free attenuation up to 20 GHz and can support transmission speeds from 1 Gbps to 25 Gbps and beyond. Rated UL AWM 21008 (150V, 80°C), file number E42769. **Sold in 500′ spools.**

3580 SERIES 0.050″ CENTER FLAT RIBBON CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

VW-1

- Ideal for use with insulation displacement connectors

Combining economy with reliable performance, this flat cable is designed for PC board-to-PC board interconnections where space is a premium; flexible interconnects within computer and business machine cabinets and areas where flexibility is needed, such as drawer-enclosed electronic circuitry. 28 AWG, 7 x 36 stranded tinned copper conductors. Slate PVC insulation has red stripe on leading edge. Rated: 105°C, 300V. Capacitance: 14pF/ft. nominal at 1MHz. Impedance: 105 ohm nominal. Resists acids, alkalis, oil, moisture, solvents, ozone, and fungus. Passes VW-1 flame test (UL listed internal only). UL recognized style 2651. **Sold in spools of 100′.**

3585 SERIES SHIELDED ROUND-TO-FLAT CABLE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

0.050″ (1.27) center cable for routing in cramped spaces where flat cable is required and round shape is more workable. Jacketed cable features a dual shield of aluminum/polyester tape and a 90% coverage of tinned copper braid shield. Blends mass termination and ease of installation flexibility of round cable. Dual shield meets FCC regulations for EMI/RFI suppression. 28 AWG, 7 x 36 stranded conductor; 0.75″ (19.05) termination area occurs every 1.5″ (38.10). PVC insulation and black PVC jacket. Rated 300V - AWM, 150V - CL2. Temperature rating: –20°C to +105°C. Capacitance: 24pF/ft. nominal at 1MHz. Impedance: 70 ohms nominal. UL AWM Style 20381, UL Type CL2. UL recognized. **Sold in spools of 100′.**

TGGT SERIES HIGH-TEMPERATURE LEAD WIRE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Feature nickel-plated copper conductor insulated with PTFE tapes followed by double glass serves and treated glass braid overall. Rated: 600V. Temperature range: 250°C continuous. Built to withstand repeated flexing and severe mechanical abuse. Moisture resistant and chemically inert. UL: Style 5196, CSA: AWM IA/B. Jacket color: tan. UL recognized, CSA certified. **Sold in 100′ and 500′ spools.** Also available in 1000′ spools; *go online or call.*

HIGH-VOLTAGE, HIGH-TEMPERATURE, CORONA-RESISTANT ELECTRONIC WIRE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Braidless silicone wire offers superior chemical, corona radiation and ozone resistance. Specially formulated abrasion-resistant extruded silicone rubber insulation, UL Style 3239. Fully-annealed, stranded tinned-copper conductor per ASTM B-33. Temperature rating: 150°C. Recommended for stoves, heaters, furnaces, dryers, motors, therapeutic devices, electric signs, lighting fixtures, power supplies, radar installations, Xenon flash tubes and special electronic devices where high temperatures are incurred. Color: white; black may be available by special order, *go online or call.* **Sold in 100′ and 1000′ spools.**

HOOK-UP WIRE KITS

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

- Stranded tinned copper conductor
- PVC insulation
- Passes UL VW-1 flame test
- UL recognized, CSA certified

Alpha's hook-up wire kits feature a unique, convenient wire dispensing system. Kits include five 100′ spools of hook-up wire, suitable for military or UL/CSA applications, packaged in a unique, portable dispenser rack. This system keeps hook-up wire neat, clean and conveniently available. Dispenser rack can be mounted on a bench or wall or used as a tote for portability. Dispenser rack holds standard Alpha hook-up wire spools when refills are required.

KIT CONTENTS:
Five 100′ spools of stranded hook-up wire in colors: white, black, red, green and blue, one dispenser rack and one cut-and-strip tool.

ECOWIRE™ ECO-FRIENDLY HOOK-UP WIRE

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

EcoWire™ — better performance, better for the environment

- Eco-friendly, non-halogenated and recyclable
- Durable mPPE (Modified Polyphenylene Ether) jacket — lighter, tougher than PVC
- Small diameter
- Superior abrasion resistance
- Stranded or solid tinned copper conductor
- Meets VW-1 UL 1581 flammability rating
- Meets UL AWM 11028 approval
- Meets CSA AWM I A/B FT-1 approval
- Meets WEEE requirements
- REACH compliant
- UL recognized
- Stocked in 11 colors

EcoWire™ hook-up wire contains no halogens, phthalates, or heavy metals enabling it to meet RoHS, REACH, and WEEE requirements for the elimination of hazardous substances and recyclability. The superior dielectric properties of mPPE (modified polyphenylene ether) jacket makes possible a reduced wall thickness while maintaining the same electrical properties as PVC. The result is diameters up to 45% smaller than equivalent wire. Along with the reduced wall thickness, the low 1.03 specific gravity yields significant weight savings of up to 40%. Although thinner and lighter in weight, EcoWire™ is tougher than PVC-based wire because it offers 10x better abrasion and pinch resistance. Perfect for a broad range of hook-up wire applications, EcoWire™ is also being used in the automotive and consumer electrics industries. Meets UL1581 requirements for operation up to 105°C end-use temperature rating. Voltage rating: 600V. Other AWG sizes and stranding options available; *go online or call.* **Sold in 100′ spools.** Also available in 5000′ and 25,000′ spool lengths; *go online or call.*

ECOWIRE™ PLUS ECO-FRIENDLY HOOK-UP WIRE

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

EcoWire™ Plus — better performance, better fluid resistance, better for the environment

- Eco-friendly, non-halogenated and recyclable
- Excellent resistance to hazardous fluids such as oils, chemicals, solvents, and fuels
- Durable mPPE (Modified Polyphenylene Ether) jacket — lighter, tougher than PVC and XLPE
- Superior abrasion resistance
- Up to 45% smaller diameter than PVC and XLPE
- Up to 40% lighter than PVC and XLPE
- Stranded bare copper conductor
- ISO 6722 Ultra Thin Wall
- ISO 6722 Thin Wall
- CE compliant
- REACH compliant
- Stocked in 9 colors

EcoWire™ Plus hook-up wire contains no halogens, phthalates, or heavy metals enabling it to meet RoHS, REACH, and WEEE requirements for the elimination of hazardous substances and recyclability. Designed for industrial applications with exposure to oils and other hazardous fluids, EcoWire™ Plus offers all the environmental benefits and abrasion resistance characteristics of standard EcoWire™. Meeting the fluid resistance of ISO 6722 for thin-wall and ultra-thin wall wire, EcoWire™ Plus is an ideal thinwall replacement for XLPE insulated wire. With up to 45% smaller diameter to save space and make routing easier, EcoWire™ Plus withstands oils, fuels, solvents, and other hazardous liquids. Voltage rating: 300V. ISO 6722 Voltage rating: 60V. **Sold in 100′ spools.** Also available in 1000′ spools; *go online or call.*

ETFE INSULATED WIRE WRAP HOOK-UP WIRE

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

- Solid silver-plated copper conductor
- High-resistance to cut-through and abrasion
- 150°C (105°C UL), UL 1422, UL1423, UL 1516, UL 1523
- Passes UL VW-1 flame test
- UL recognized

Wire wrapping is an automatic or semiautomatic termination method generally used in large-scale wiring of computer backpanels. ETFE (ethylene tetrafluoroethylene) wire wrap wire is manufactured with silver-plated copper conductors. ETFE exhibits high abrasion, heat and cut-through resistance. **Sold in 100′ and 1000′ spools.** Other colors available; *go online or call.*

MIL-DTL-22759/11 PTFE INSULATED HOOK-UP WIRE

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

Ideal where smoke emission, overload stability and/or flammability may be a problem. Feature stranded silver-plated copper conductor insulated with PTFE (polytetrafluoroethylene). Temperature range: -55°C to +200°C. Rated: 600V. Available in colors listed in table below. **Sold in 100′ and 1000′ spools.**

PHOTOVOLTAIC WIRE FOR SOLAR ENERGY APPLICATIONS

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

- Sunlight-, ozone-, and UV-resistant
- Moisture-resistant
- Meets UL Subject 4703 Type PV regulatory and industry requirements for photovoltaic application
- UL VW-1 flammability rated
- REACH compliant
- UL listed (**PV, PVT series**)
- TÜV approved (**PVT series** only)

Photovoltaic wire is designed for the harsh environments of solar energy applications — the hot and cold of climate extremes, ozone and UV radiation, moisture and direct burial. Available in two versions: **PV series** photovoltaic wire meets UL 4703 PV wire requirements, CSA 2W90 and features a cross-linked polyethylene insulation with a PVC jacket; **PVT series** UL /TÜV photovoltaic wire meets UL 4703 PV wire and TÜV 2 PFG 1169 requirements and is made with low-smoke, zero-halogen (LSZH) materials which do not emit toxic gases when burned. Both versions feature a stranded tinned copper conductor that comes in a wire range from 14 AWG to 2 AWG. Operating temperature range: -40°C to +90°C. Voltage rating: 1000V. Jacket color: black. **Sold in 100′ , 500′ and 1000′ spools. SPM series** solar multiconductor cable is also available; *go online or call.*

PVDF WIRE-WRAP HOOK-UP WIRE

VW-1

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

- 125°C (105°C UL)
- Solid, silver-plated copper conductor
- High-resistance to cut-through and abrasion
- UL AWM Styles 1422 and 1423
- Passes UL VW-1 flame test
- UL recognized
- Other colors available ; *go online or call*

PVDF wire wrap wire is manufactured with silver-plated copper conductors that retain their mechanical and electrical integrity even after subject to the high forces of the wire wrapping process. PVDF jacket exhibits high abrasion, shear and cut-through resistance. **Sold in 1000′ spools.**

GreenChoice™ PPO HOOK-UP WIRE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

Belden® PPO UL AWM Hook-Up Wire

- Zero Halogen Polyphenylene Oxide (PPO)
- Non-Pollutant/Non-Toxic
- Recyclable/Waste Reducer
- 0.012″ (0.3mm) Insulation Thickness
- Stranded Tinned Copper
- Voltage Rating: 600V
- -40°C to +105°C
- UL AWM Style 11028
- VW-1 UL 1581
- REACH Compliant
- CE Compliant
- CA Prop 65 Compliant

PPO Hook-Up Wire merits use of Belden's GreenChoice™ product rating. PPO Wire does not release the environmental pollutants characteristic of PVC-insulated wire. This fully recyclable product also meets or exceeds the electrical and thermal characteristics of PVC wire, while being smaller, lighter and more durable.

HOOK-UP WIRE DISPENSER KITS

VW-1 · RoHS Compliant Available · BELDEN SENDING ALL THE RIGHT SIGNALS

Ideal for R&D labs, engineers and technicians. Choose kits containing five 100′ spools or eight 25′ spools of popular hook-up wire — each spool contains a different color. Unshielded tinned copper conductor with PVC insulation. Spools come in portable dispenser rack, convenient for field work, for workbench or wall mount use. Passes VW-1 vertical wire flame test.

9531

INSULATED LEAD WIRE

RoHS Compliant Available · BELDEN SENDING ALL THE RIGHT SIGNALS

HIGH-TEMPERATURE EPDM INSULATED LEAD WIRE

EPDM (ethylene-propylene diene elastomer) insulation offers excellent flexibility at high and low temperatures (150°C to –60°C), good dielectric strength, abrasion/cut-through resistance, mechanical properties and ozone resistance. Unshielded, 1-conductor EPDM wire is recommended for Class 130(B), 155(F) and some 180(H) systems. Recommended max. baking cycles: 350°F/177°C (24 hrs.), 375°F/190°C (4 hrs.). **Sold in 500′ spools.** *Also available in* **1000′ spools** and other colors; *go online or call.*

EPDM INSULATION, 0.045″ THICK — UL STYLE 3374 600V, 150°C; CSA TYPE CL1254 600V, 125°C

XL-DUR™ INSULATED LEAD WIRE

XL-DUR™ insulation is a chemically cross-linked polyethylene that offers excellent thermal aging characteristics, moisture and solvent resistance. It has good abrasion and ozone resistance. Resists deformation when subjected to momentary high temperatures during assembly processes. Recommended for Class 130(B) as motor leads. Maximum baking cycles: 300°F/149°C (24 hrs.), 325°F/163°C(12 hrs.), 350°F/177°C(8 hrs.). **Sold in 500′ spools.** *Also available in* **1000′ spools** and other colors; *go online or call.*

INSULATED LEAD WIRE (CONT.)

DUPONT HYPALON™ INSULATED LEAD WIRE

DuPont Hypalon™ insulation has excellent heat resistance, color stability and electrical properties. It offers good oil, ozone and abrasion resistance. Recommended for Class 130(B) as motor leads. Maximum baking cycles: 300°F/149°C (24 hrs.), 325°F/163°C(12 hrs.). Passes VW-1 vertical wire flame test. **Sold in 500′ spools.** *Also available in* **1000′ spools** and other colors; *go online or call.*

PHOTOVOLTAIC WIRE FOR "GREEN" SOLAR POWER APPLICATIONS

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

- Meets UL Type PV (Photovoltaic) UL 4703 requirements
- 14 AWG and larger also meets UL Type USE-2, RHW-2; CSA Type RW90 requirements
- Sunlight- and flame-resistant
- UL VW-1 flammability rated
- UL listed, CSA approved, CE compliant

Photovoltaic wire is suitable for interconnection wiring of grounded and ungrounded photovoltaic power systems as described in Section 690.31(A) of the 2008 NEC (National Electric Code). Features a soft annealed tinned copper stranded conductor insulated with XLPE (cross linked polyethylene) and a sun-resistant, non-integrally PVC jacket. Available in a wire range from 18 AWG to 8 AWG. Operating temperature range: -40°C to +90°C. Maximum operating voltage: 600 or 1000 VRMS (UL PV) or 1000 VRMS (CSA RW 90). Jacket color: black. **Sold in 1000′ and 5000′ spools.**

PVC INSULATED HOOK-UP WIRE

RoHS Compliant Available

General Cable

CAROL BRAND

- Choice of 300V or 600V rated wire
- Fully annealed tinned copper stranded conductor, per ASTM B-33
- Premium-grade color-coded PVC insulation
- Temperature range: -20°C to +105°C
- Stocked in 10 colors
- Meets UL VW-1 Vertical Wire Flame Test
- UL recognized, CSA certified

Premium-grade PVC insulated hook-up wire is perfect for internal wiring of electrical and electronic equipment, such as panels and meter and point-to-point wiring. Solid conductor available; *go online or call.* **Sold in 100′ spools.**

SOLAR CABLE

RoHS Compliant Available

TE connectivity

Authorized Distributor

- USE-2 wire for solar home-runs
- Electron beam cross-linked
- Halogen-free, flame-retardant, low-toxicity
- Approved for outdoor use
- UV resistant
- Abrasion resistant
- Resistance to water, ozone, fluids, salt, general weathering
- Very low smoke emissions
- UL approved 854, Subject 4703

As part of Tyco Electronics' SOLARLOK photovoltaic interconnection system this solar cable is designed to meet the harsh environmental conditions typical in the wiring of photovoltaic installations, such as, between solar panels and roof tiles and between solar panels and AC/DC inverters. Stranded, tin-plated copper conductor and electron beam cross-linked halogen-free polyolefin jacket offers excellent flexibility and stripping performance. Operating temperature range: -40°C to +90°C. Voltage rating: 600V. UL listed. *Order SOLARLOK photovoltaic connectors separately online.*

WIRE SPOOL RACKS

DURATOOL

Heavy-duty wire spool racks offer a convenient way of storing and dispensing wire. Prime cold-rolled steel ⅝″ diameter rods with interlocking construction accommodate wire spools up to 10″ in diameter. Finish: gray baked enamel. For use in stockrooms, maintenance, and other industrial applications. Made in the U.S.A.

HOOK-UP WIRE • TRAY CABLE

WH SERIES STRANDED AND WHS SERIES SOLID HOOK-UP WIRE

OSHA VW-1 RoHS Compliant Available

NTE ELECTRONICS, INC.

- Tinned copper conductor — choice of stranded or solid
- PVC insulated
- Rated 300V, 90°C
- UL style 1007; CSA TR-64/1569
- Passes UL VW-1.S vertical flame test
- OSHA acceptable

3

Ideal applications include internal wiring of electrical and electronic equipment, panels, meters, computers, business machines, appliances, control panels, and point-to-point wiring where 300V is required. Additional colors are available, *go online or call.* **Sold in 25′ and 100′ spools.**

PAIRED SHIELDED PLTC AND ITC — UL SUBJECT 13 AND 2250

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

Overall Shielded

Individually Shielded

Tinned copper stranded conductors, PVC insulated pairs, except **mfg. part nos. 9328-9332, 9368, 9369 and 9388** which are twisted pairs. All with Beldfoil® shield and tinned copper drain wire. Chrome sun-resistant PVC jacket. Multi-pairs are numbered at one-inch intervals; conductor pairs are color-coded black and red. Meets UL Subject 13 (NEC Article 725 Type CL3) for use as tray cable; 300V, 105°C. NEC Article 800 Type CM for use as communication cable. Meets CSA, PCC and FAS90.

PLTC AND ITC — UL SUBJECT 13 AND 2250 CABLE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

9407

Stranded tinned copper conductors, PVC insulated, and chrome PVC jacket except **mfg. part nos. 1030A** and **1031A** which are black PVC. All are single pair or single triad. Cable can be used in raceways, supported by messenger wire, outdoor applications and direct burial. Industrial, automotive and process control cable. Can be installed in wet or dry locations. Shielded cable is recommended for RF applications requiring crosstalk-free, balanced operation. Tri-rated cable meets UL subject 13 and 2250, 300V, 150°C, 300V 80°C article 725 NEC, Class 2 and 3 req. Passes UL 1581 vertical wire flame test. All NEC type CMG.

UNINSULATED WIRE

BELDSOL MAGNET WIRE

RoHS Compliant Available

BELDEN SENDING ALL THE RIGHT SIGNALS

Beldsol is a dual insulated magnet wire, combining excellent dielectric characteristics of polyurethane with the toughness and solvent resistance of a nylon overcoat. Rated by IEEE tests for 270°F usage and is solderable without insulation removal at 750°F. Single bare copper conductor, solid stranding. Meets J-W-1177/9 military specification, rated: Class 130, Type SUN, Single. **Sold in approximate spool lengths listed in table below.**

CORRUGATED LOOM TUBING FITTINGS

RoHS Compliant Available

PANDUIT®

- Virtually eliminates taping
- Easy to assemble
- Locking latch design
- Durable polypropylene shell
- Works with most popular sizes of corrugated loom tubing
- Color: Black
- **Sold in packages of 25**

PAN-WRAP SPLIT HARNESS WRAP AND INSTALLATION TOOLS

RoHS Compliant Available

PANDUIT®

- Unique engineered slot pattern
- Provides for easy wire or cable breakouts
- One size accommodates a wide range of bundle diameters

Pan-Wrap™ split harness wrap is easily installed using Panduit's patented installation tool with 180° opening for fast loading of maximum bundle diameters to speed installation; *order separately below.*

SPIRAL CABLE WRAPPING

RoHS Compliant Available

PANDUIT®

Reusable spiral wrapping for protecting and organizing multiple cables. Each package includes an installation tool. Allows breakouts of single/multiple wires and rerouting of replacement wires. Color-coded wire bundles. Organizes wires for communication and computer equipment. UL recognized. **Sold in spools of varying lengths indicated in table below.**

PROTECTIVE HARNESS WRAP

RoHS Compliant Available

pro-POWER

- Easy to Apply and Remove
- Reusable and Flexible
- Strong and Versatile
- Retains Elasticity

For temporary or permanent wire harness application where abrasion protection is required. Useful for harnesses which carry wiring around sharp corners. Leads can be brought out at any point to make a "tailor-made," tight-fitting harness. Color: natural. **Sold in coils of 100′.**

CORD STRAIN RELIEF BUSHINGS

RoHS Compliant Available

pro-POWER

1. Place bushing on cord

2. Press together with pliers

3. Snap into hole

One-piece nylon-construction bushings withstand temperatures to 221°F. Easily installed with specially designed pincers or ordinary pliers. Eliminates strain that tears cords loose from contacts or connections. Color: black. UL recognized, CSA certified. Made in the U.S.A. **Sold in packages of 100.**

WRAP-A-SHIELD TUBING

RoHS Compliant Available

pro-POWER

Wraparound EMI/RFI shielding in sizes that allow coverage up to 2″ round and 3″ flat. Ideal shielding for longer lengths, diameters from ¼″ to 3″, and for flat cable applications. Allows stacking of flat cable and shielding as a multilayer package. Adhesive strip closure allows for a custom fit. Attachable braid strap provides for soldering of drain wire. Polyurethane jacket with aluminum foil/polyester shield. Simply cut to length needed, attach drain wire, wrap around cable, and close the adhesive strip. **Sold in 10′ lengths.**

FLAME-RETARDANT, EXPANDABLE BRAIDED POLYESTER SLEEVING

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

- Lightweight, flexible routing
- High abrasion and cut-through resistance
- Rot-free, fungus-proof applications
- Passes UL VW-1 flame test
- UL recognized

UL VW-1

GRP-120 series flame-retardant braided polyester sleeving features an open weave that allows for a greater range of diameter expansion, providing ease of installation and gripping action over a wide range of shapes and sizes. Ideal for protecting wire bundles, harnesses, pneumatic hoses, hydraulic lines, cable, and highly polished or threaded machine parts. To prevent fraying of sleeving ends simply cut/seal with a hot knife. If flame resistance is not required, select general-purpose **GRP-110 series** expandable braided polyester sleeving; *order separately, go online or call.* If non-fraying sleeving is desired, select general-purpose **GRP-110NF series** or flame-retardant **GRP-120NF series** non-fraying, expandable braid sleeving; *order separately, go online or call.*

ELECTRICAL SLEEVING

TINNED COPPER BRAID

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

FLAT BRAID
- **Woven Tinned Copper**
- **Combines High Current Carrying Capacity and Flexibility**
- **Suitable for Grounding and Bonding Strap Applications**

TUBULAR BRAID
- **Woven Tinned Copper**
- **Each Strand Meets ASTM-B-33**

OVAL BRAID
- **Round Construction**
- **Braid Coverage 95% Minimum**

The shielding of electronic interconnect cables can play a critical role in overall system performance. System configuration, type of signals transmitted and proximity to noise generating sources all must be considered. These factors plus the type of interference, whether electromagnetic (EMI), electrostatic (ESI) or radio frequency (RFI), will determine the necessity and type of shielding required. Alpha's copper braid conforms to FCC socket 20780 governing EMI and RFI shielding. **Sold in spools of 100′.**

GRP-130 SERIES FIT® FLEXIBLE, SEMI-RIGID WRAPPABLE SLEEVING

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

G130T Installation Tool

- Flexible, semi-rigid 10-mil PET braid
- Fast, easy wrap-around installation
- More flexible than spiral wrap or split convoluted tubing
- Bends tightly without distorting or opening
- 25% edge overlap to accommodate connectors and splices
- Good abrasion, chemical, and UV resistance
- Halogen free
- Cuts cleanly with hot knife
- Temperature range: -70° to +125°C
- Choice of black, black with white tracer or orange

GRP-130 series FIT® woven, wrappable sleeving is the perfect choice for a wide variety of bundling applications without the need for additional fasteners. Approval rated: UL 94V-0, CSA 5836 01 FT2. *Order* **mfg. part no. GRP-130T** *tool for fast, easy installation, separately below.* **Sold in spools sizes indicated in table below.**

GRP-170 SERIES FIT® ADVANCED CHEMICAL RESISTANCE EXPANDABLE SLEEVING

RoHS Compliant Available

AlphaWire
Cables you trust. Service you deserve.

- Durable 8-mil polyphenylene sulfide (PSS) monofilament braid
- Resists acids, bases, solvents, fuels, and UV rays
- High abrasion resistance
- Halogen free
- Flame resistant — rated UL94V-0
- Ultra-lightweight
- Cuts cleanly with hot knife
- Expandable to 150%
- Temperature range: -70° to +200°C
- Color: Black

GRP-170 series FIT® woven, advanced chemical resistance expandable sleeving is extremely lightweight yet impervious to virtually all chemicals. **Sold in spools sizes indicated in table below.**

BRAIDED EXPANDABLE SLEEVING

RoHS Compliant Available

PANDUIT®

- Provides continuous abrasion protection for wire, cable and tubing
- Lightweight, yet durable protection
- Highly-flexible open weave will not trap heat or humidity
- Allows for use with irregular shapes

Braided expandable sleeving woven from flexible, weather-resistant black PET (polyethylene terephthalate) material. Ideal for applications up to 125°C (257°F). UL recognized, CSA certified.

ELECTRICAL SLEEVING

EXPANDABLE MONOFILAMENT SLEEVING

RoHS Compliant Available

pro-POWER

Highly fray resistant expandable monofilament sleeving in both standard polyester and flame-retardant polyester constructions. Both materials provide outstanding flexible abrasion protection and bundling characteristics. Both are also extremely durable and are unaffected by most chemical environments and common solvents. The high level of fray resistance allows cutting without using a hot knife, and manual or normal shop handling without fraying problems. Both have highest levels of flexibility and full 3:1 expansion ratios. Standard operating temperature: –70°C to +125°C. Flame-retardant version meets UL VW-1 specifications. UL recognized. **Sold in spool lengths indicated.**

HALAR® EXPANDABLE BRAIDED SLEEVING

VW-1

RoHS Compliant Available

pro-POWER

- High abrasion and cut resistance
- Chemically inert
- Cuts easily with hot knife
- Halogen-free, low outgassing, approved for plenum applications
- Flammability rating: UL94 V-0, FAR 25.853, UL VW-1, FMVSS 302
- Radiation resistant
- Operating temperature: –103°F to 320°F
- Ideal in corrosive environments

Halar® self-extinguishing, expandable sleeving is used where flammability, high-temperature endurance and low outgassing are primary concerns. Braided from 11 mil filaments of Halar® (ethylene chlorotriflouroethylene [ECTFE] copolymer). Because of its low flame spread and smoke generation properties, Halar® has received UL 910 (NFPA 262) plenum listing, UL flame resistance rating of VW-1 and meets automotive industry requirements of FM VSS 302. Resists a wide range of corrosive chemicals and organic solvents, including strong acids, chlorine and aqueous caustics. Color: black with white tracer. **Sold in spool sizes listed in table below.**

HI-TEMP RESIN COATED FIBERGLASS SLEEVING

RoHS Compliant Available

pro-POWER

Features

- Resin coated, heavy weight, braided fiberglass
- Protects to 1200°F
- Minimal dusting when cut and handled
- Cut and abrasion resistant
- Easy to install - cuts with scissors
- Asbestos free
- Resists gasoline and engine chemicals
- Color: black

Hi-Temp, resin coated sleeving is an extremely high temperature resistant sleeve commonly used as thermal protection for wires, cables and hoses that are subjected to continuous and extreme high temperature environments, such as engine manifolds and exhaust systems. It installs easily over a variety of applications to either deflect or retain heat in environments up to 1200°F.

SILICONE JACKETED FIBERGLASS SLEEVING

RoHS Compliant Available

pro-POWER

Features

- Stable to 500°F
- Continuous operating temperature: 428°F (220°C)
- Contains radiant heat to prevent damage to nearby components
- Cut- and Abrasion-resistant
- Halogen and asbestos free
- Resists gasoline and engine chemicals
- Available in red or black
- Wall thickness: 0.08″

The thick, high temperature fiberglass sleeve is jacketed with a non-permeable, heavy silicone coating that is flexible enough to follow tight radius curves, resists all automotive chemicals and solvents, and provides a substantial level of abrasion and puncture protection. Completely non-conductive, will not melt, delaminate, become brittle or support combustion under normal conditions, and provides a professional level solution to thermal protection needs in any application.

BRAIDED FIBERGLASS ELECTRICAL SLEEVING

RoHS Compliant Available

pro-POWER

- Class 240C Insulation
- Heat Annealed
- UL Recognized (File E92997)

Tightly braided fiberglass sleeving designed as Class 240C insulation that is heat annealed to remove organic impurities, improve handling and reduce end fraying. Compatible with varnishes, epoxies and bonding agents where maximum reinforcement between the glass and encapsulant is needed. Can be used as primary and secondary insulation for motor leads, small appliances, brush assemblies, electric resistance heating elements, and similar low voltage applications. Ideal for abrasion and cut-through protection over insulated leads. Operating temperature: –76°F (-60°C) to +1200°F (649°C). **Sold in spools of 100′.**

HOOK AND LOOP SLEEVING

RoHS Compliant Available

pro-POWER

Lightweight, expandable, braided monofilament sleeving with hook and loop fastening system is designed to allow easy wrap bundling and protection for wire, cable, hoses, and tubes. Monofilaments are constructed from durable P.E.T. providing continuous protection against abrasion, fungus, and rotting in addition to being unaffected by most chemical environments, and solvents. Temperature rating: –75°C to +125°C. Melt temperature: +250°C. **Sold in 25′ spools.**

RAYCHEM VERSAFLEX EXPANDABLE, BRAIDED, POLYESTER SLEEVING

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Excellent abrasion and cut-through resistance
- Lightweight
- Flexible, even at low temperatures
- Expands and contracts easily for a perfect fit
- Fungus-proof
- Not affected by most chemicals and solvents
- Cuts easily with hot knife

Raychem™ Versaflex™ expandable, braided polyester sleeving is suited for the mechanical protection of wire harnesses and hoses, and all other applications where the highest level of flexibility and abrasion/cut-through resistance is required. Versaflex™ sleeving serves as an economical means for wire bundling that will not trap heat or moisture, expanding easily to fit over irregular shapes, then contracting to conform to substrates. Available in a flame retardant (FR) version which meets the UL VW-1 flammability requirement. Operating temperature: -50°C to 150°C. **Sold only in spool sizes listed in table below.**

FP-301 SERIES (2:1) SHRINK RATIO, MULTIPURPOSE, FLEXIBLE, POLYOLEFIN HEAT-SHRINK TUBING

MADE IN USA

RoHS Compliant Available

3M

FP-301 series flexible heat-shrink tubing offers an excellent balance of physical, electrical and chemical properties for protecting a wide variety of electronic, electrical and mechanical applications, such as: cable splices, wire marking, harness covering, strain relief and component packaging. Rated for -55° to +135°C (+275°F) and 600V continuous operation. Self-extinguish flammability meets UL224 All-Tubing Flame Test requirements (except clear). Shrink ratio: 2:1. Specifications: UL39100, CSA LR 38227 and Military MIL-DTL-23053/5 Class 1 (opaque), Class 2 (clear). **NOTE:** stock numbers in table below are for black color tubing only. Colors: black and clear tubing available in all sizes listed in table below; white, red, yellow, blue and green color tubing is available in selected sizes and assortment packs; *go online or call.* **Sold in spool sizes listed below and in packages of 4′ long and 6″ long pieces.**

EPS-200 SERIES (2:1) SHRINK RATIO, ADHESIVE-LINED, FLEXIBLE, POLYOLEFIN HEAT-SHRINK TUBING

MADE IN USA

RoHS Compliant Available

3M

EPS-200 series tubing features one step environmental protection of electronic, electrical, automotive, and marine wiring. As the flame retardant, flexible polyolefin outer wall shrinks to a skin-tight fit; the hot melt adhesive is pushed into voids and crevices. Upon cooling the adhesive solidifies and bonds to form a permanent moisture-proof barrier. 2:1 shrink ratio. Jacket meets UL 224 all tubing flame test. –55°C to +110°C continuous operating temperature. Meets MIL-DTL-23053/4 Class 2 specifications. Black only. UL recognized. **Sold in packages of 4′ long and 6″ long pieces.**

EPS-300 SERIES (3:1) SHRINK RATIO, ADHESIVE-LINED, FLEXIBLE, POLYOLEFIN HEAT-SHRINK TUBING

MADE IN USA · RoHS Compliant Available · 3M

Meltable inner wall of **EPS-300 series** tubing forms a moistureproof barrier, making it the product of choice for outdoor, automotive, or marine applications. 3:1 shrink ratio helps to seal uneven surfaces such as connectors and components. Jacket meets UL 224 all tubing flame test, –55°C to +110°C continuous operating temperature, meets MIL-DTL-23053/4 Class 3. Black only. UL recognized. **Sold in packages of 4′ long and 6″ long pieces.**

EPS-400 SERIES (4:1) SHRINK RATIO, ADHESIVE-LINED, SEMI-RIGID POLYOLEFIN HEAT-SHRINK TUBING

MADE IN USA · RoHS Compliant Available · 3M

EPS-400 series tubing provides one step environmental protection in the same way as **EPS-300 series**, *order separately on this page*, but a thicker meltable inner wall makes it ideal for sealing multiple wire bundles. 4:1 shrink ratio helps seal uneven surfaces such as in-line components. Heavy outer wall provides tough mechanical protection. –55°C to +110°C continuous operating temperature. Black only. UL recognized. **Sold in packages of 4′ long and 6″ long pieces.**

MFP SERIES (2:1) SHRINK RATIO, SPECIAL-PURPOSE, MODIFIED POLYVINYLIDENE FLUORIDE (PVDF) HEAT-SHRINK TUBING

MADE IN USA · RoHS Compliant Available · 3M

MFP series heat-shrink tubing is ideal for extremes in temperature or environment. A cross-linked, thin-walled, heat-shrinkable tubing offering a high degree of mechanical strength and high-temperature resistance. Modified polyvinylidene fluoride makes it resistant to corrosive, flame-retardant, semi-rigid and highly-resistant to most industrial fuels, chemicals and solvents, as well as mechanically tough for cut-through and abrasion resistance with a high 900V/mil dielectric strength. Rated for continuous operation from –55°C to +175°C. Rigidity and transparency make this shrink tubing a good choice for strain relief and identification. Shrink ratio: 2:1. UL recognized E-39100, VW-1, E-69751; CSA certified LR 38227, OFT; meets MIL-DTL-23053/8,DTL-23053/18, Class 1 specifications. Color: clear. **Sold in packages of 4′ long and 6″ long pieces.**

HEAT-SHRINK TUBING

MW SERIES (2.5:1) SHRINK RATIO, ADHESIVE-LINED, SEMI-RIGID, POLYOLEFIN HEAT-SHRINK TUBING

MADE IN USA · RoHS Compliant Available · 3M

Encapsulates and seals in one step in the same way as **EPS-200 series** tubing. Semi-rigid outerwall gives superior abrasion and cut-through resistance. 2.5:1 shrink ratio. –55°C to +110°C continuous operating temperature. Meets MIL-DTL-23053/4 Class 1 specifications. Black only. UL recognized. **Sold in packages of 4′ long and 6″ long pieces.**

FP-301VW SERIES (2:1) SHRINK RATIO, FLAME-RESISTANT, FLEXIBLE, POLYOLEFIN HEAT-SHRINK TUBING

MADE IN USA · RoHS Compliant Available · 3M

FP-301VW series offers the same physical, electrical, and chemical properties as **FP-301 series** tubing, *order separately*, with the addition of superior flame resistance. Ideal as fire resistant coverings of components and flammable wire assemblies. Meets MIL-DTL-23053/5 Class 3 requirements. Rated for continuous operations from -55°C/-67°F to 135°C/275°F and withstands elevated temperatures to 300°C/572°F for short periods of time. Shrink ratio: 2:1. Minimum shrink temperature is 100°C/212°F. Black only. Selected sizes of **FP-301VW series** tubing also available in assortment packs, *order separately; go online or call.* **Sold in packages of 4′ long and 6″ long pieces.**

FIT®-221 MULTIPURPOSE IRRADIATED POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available · AlphaWire — Cables you trust. Service you deserve.

FIT®-221 is an irradiated flexible, flame-retardant polyolefin tubing. Use for harnessing, wire bundling, strain reliefs, or any application where components must be insulated or packaged. Operating temp.: –55°C to +135°C (125°C UL/CSA), 2:1 shrinkage ratio @ 121°C. Meets AMS-DTL-23053/5, Class 1, 2. UL recognized standard 224, CSA certified standard 198 (except Clear color tubing). Colors: black and clear; also available in white, red, yellow, blue, or green; *go online or call.* **Sold in packages of 4′ and 6″ lengths and spooled lengths indicated in table below.** Additional spooled lengths and other cut pieces are available; *go online or call.*

FIT®-221 IRRADIATED POLYOLEFIN (2:1) HEAT-SHRINK TUBING IN PRE-CUT 1″ PIECES

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

FIT®-221 irradiated polyolefin heat-shrink tubing conveniently cut in one inch pieces. Applications include strain reliefs and electrical insulation. Shrink ratio: 2:1. Color: black. UL recognized, CSA certified. **Sold in packages of 1000 one inch pieces.**

FIT®-221V LOW SHRINK TEMPERATURE, FLAME-RETARDANT, IRRADIATED POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

VW-1

FIT®-221V is radiation cross-linked polyolefin heat shrinkable tubing. Passes VW-1 vertical wire flame test. For electrical insulation, harness bundling, and cable jacketing. Shrink ratio: 2:1 at 90°C. Operating temperature: –55°C to +135°C (125°C UL and CSA). Color: black. Meets AMS-DTL-23053/5, Class 1, 3. UL recognized standard 224 and CSA certified standard 198. Also available in white, red, yellow, blue, or green; *go online or call.* **Sold in packages of 4′ (1.219m) and 6″ (152.4mm) lengths.**

FIT®-300 SURFACE IRRADIATED/ DUAL EXTRUDED POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

FIT®-300 heat-shrink tubing features a tough, thick outer wall that shrinks and an inner wall that melts and seals. Halogen-free dual-wall semi-rigid crosslinked polyolefin. Operating temperature -55°C to 135°C (UL 125C). Shrinkage ratio: 2.5:1. Ideally used for component encapsulation, end cap transitions, connector strain relief. Meets AMS-DTL-23053/4, Class 1. UL recognized standard 224. **Sold in packages of 4′ (1.219m) or 6″ (152.4mm) lengths.**

FIT®-321 MEDIUM-WALL, ADHESIVE-LINED, IRRADIATED (3:1) POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

FIT®-321 offers 3:1 shrink ratio at 110°C. Meets AMS-DTL-23053/4, Class 3. UL recognized standard 224, CSA certified standard 198. Meltable encapsulating adhesive inner wall. Water resistant. Excellent bonding to substrates. Flexible flame-retardant outer wall. Uses include: replacement of potting/molding compounds; strain relief for electrical connections; cable-to-connector transitions. **Sold in packages of 4′ (1.219m) or 6″ (152.4mm) lengths.**

FIT®-600 HIGHLY-FLEXIBLE IRRADIATED ELASTOMER HEAT-SHRINK TUBING

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

FIT®-600 heat-shrink tubing is a highly flexible irradiated elastomer tubing with outstanding abrasion resistance properties. For outdoor use as a cable jacketing and harness material where maximum abrasion protection is required. Shrinkage ratio: appoximately 2 to 1 at 130°C. Does not contain polychloroprene/neoprene, but meets physical properties of AMS-DTL-23053/1, Class 1 and 2. Operating temperature: –75°C to +121°C. Color: black. **Sold in spools of 25′.**

FIT®-CLEAR TRANSPARENT, HIGHLY FLAME-RETARDANT, HEAT-SHRINK TUBING

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

- "Crystal Clear" even after application — perfect for visual inspection and identification
- Ideal in applications where flame retardancy is critical
- Resistant to heat, chemicals, mechanical-abrasion and cut-through
- Low recovery temperature (150°C) saves installation time and protects underlying substrate from excessive heat
- Passes UL VW-1 Flame Test
- UL recognized

FIT® -CLEAR series polyvinylidene fluoride (PVDF) based, transparent heat-shrink tubing offers a 2-to-1shrink ratio at the low shrink temperature of 150°C. Passes UL VW-1 flame retardancy test, meets UL Standard 224 and meets or exceeds the requirements of AMS-DTL-23053/18, Class 1. Applications include automotive wiring, jacketing for resistors, capacitors, fuses and other components, high-temperature, caustic and chemical environments, wire markers, and wire insulation and component stress relief. Just right for use with **XTRA•GUARD® 4** and **XTRA•GUARD® 5** cable; *ordered separately online.* Operating temperature: -55° to +175°C (150°C UL). Color: clear. **Sold in spool sizes indicated in table below.**

FIT®-FLEX HIGHLY-FLEXIBLE IRRADIATED SILICONE RUBBER HEAT-SHRINK TUBING

RoHS Compliant Available

AlphaWire — Cables you trust. Service you deserve.

FIT®-Flex provides strain relief, terminal insulation, cable jacketing, and wire harnessing protection in applications where flexibility and durability are mandatory. Durable in wide range of temperature extremes. Flame retardant. Passes UL VW-1 flame test. Resists extreme heat shock. Outstanding thermal insulator. Suitable sheathing for fiber-optic bundles. Other applications include: electrical appliances, medical equipment, robotic, and other moving equipment. Provides outstanding strain relief and thermal insulation. Conforms to peculiar shapes and sizes. UL Standard 224. Shrink ratio: 1.7 to 1. Operating temperature: –50°C to +200°C (90°C UL). Color: slate. **Sold in spools of 25′.** Also available in 100′ spools; *go online or call.*

FPS SERIES (2:1) SHRINK RATIO, GENERAL-PURPOSE, FLEXIBLE POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

pro-POWER

FPS series general-purpose, flexible polyolefin heat-shrink tubing is fungus/chemical-, split-, and cold flow-resistant. Mechanically-tough and easily marked. Ideal for use as electrical insulation over cable splices and termination, lightweight harness covering and wire bundling. Shrink ratio: 2:1. Minimum shrink temperature: 100°C. Operating temperature range: –55°C to +135°C. Color: black. Meets MIL-I-23053/5, Class 1, Class 2 and AMS 3636, AMS 3637 requirements. **Sold in spools and in bags of 4′ and 6″ lengths.**

HIGH-TEMPERATURE, CROSS-LINKED FLUOROELASTOMER HEAT-SHRINK TUBING

RoHS Compliant Available

pro-POWER

MADE IN USA

- 2:1 shrink ratio
- Outstanding high-temperature performance
- Superior retsistance to highly corrosive chemicals, fuels, lubricants, acids and solvents
- Highly impact, abrasion and cut-through resistant
- Very flexible
- Easily marked

High-temperature, cross-linked fluoroelastomer heat-shrink tubing has an operating temperature range of -55°C to 200°C (-67°F to 392°F). Minimum shrink temperature: 175°C (347°F). Ideal for protecting wiring and component covers in aircraft and aerospace applications. For use in hydraulic fluid transport mechanisms, automotive and chemical processing applications up to 200°C. Meets SAE-AMS-DTL-23053/13 and MIL-R-46846, Type III, Class 1 military specifications. Color: black. **Sold in packages of five 6″ or 48″ long pieces.**

MIL-DTL-23053/5 SPECIFIED POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

pro-POWER

- Meets military specification MIL-DTL-23053/5
- 2:1 shrink ratio
- Minimum shrink temperature at 70°C
- Choice of 7 colors: black, clear, white, yellow, red, green, blue
- Choice of 100′, 50′ spools and bags of 4′ and 6″ lengths

Pro-Power® Mil.-Spec. polyolefin heat-shrink tubing is used as electrical insulation over cable splices and termination, lightweight harness covering and wire bundling. Operating temperature range: –55°C to +135°C. **Sold in spool sizes indicated in table below and in bags of 4′ and 6″ lengths.** Select sizes also available in 500′ spools; *go online or call.*

(2:1) SHRINK RATIO, LAYFLAT PVC HEAT-SHRINK TUBING

RoHS Compliant Available

pro-POWER

Layflat PVC heat-shrink tubing is a thin-wall material offering good electrical and mechanical characteristics. When exposed to heat in excess of 275°F for a few seconds, the specially-formulated polyvinyl chloride material shrinks rapidly and uniformly to conform to the shape of the object being covered. Applications include insulating and jacketing of batteries, capacitors and similar objects; protective covering of precision machine parts and cutting tools; wire and cable identification; industrial equipment; toys, sporting goods, electronics, medical and consumer products. Operating temperature: +85°C to –20°C. Shrink ratio: 2:1. A heat gun can be used for shrinking in most applications; *order separately online or call.* Wall thickness: 0.004″. Meets flammability requirements of UL VW-1 and MIL-I-631 specifications. Color: white. UL listed. **Sold in 100′ spools.**

FOOD-GRADE, NONTOXIC, ACRYLATED OLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

pro-POWER

MADE IN USA

- Meets USFDA Reg. C.F.R. 177.1330 requirements
- 2:1 shrink ratio
- Low shrink temperature: 121°C (250°F)
- High flexibility
- Resistant to many chemicals, oils, sunlight, moisture and fungus
- Color: clear

Nontoxic, food-grade acrylated olefin heat-shrink tubing is constructed from premium-grade, virgin polymers making it ideal for applications involving contact with food and beverages. Provides smooth, tight-fitting insulation. Tensile strength: 2500psi. Dielectric strength: 1800vpm. Operating temperature range: -55°C to 121°C. Color: clear. Made in the U.S.A. **Sold in spool sizes indicated in table below.**

(4:1) HIGH SHRINK RATIO, SEMI-RIGID, PTFE HEAT-SHRINK TUBING

RoHS Compliant Available

pro-POWER

PTFE (polytetrafluoroethylene) heat-shrink tubing, upon application of heat in excess of 350°C (662°F), shrinks and conforms to the geometry of the part being covered. Stiffness, combined with chemical inertness, makes it an excellent strain relief for high-temperature electrical connections within contaminated environments. Tubing will become completely clear when it reaches the gel state and will completely recover to its specified size provided a slow cooling process is allowed. Shrink temperature: 662°F/350°C. Continuous operating temperature range: –100°F to +500°F (–73°C to +260°C). Overheating will damage the tubing, so do not heat above 700°F/327°C. Meets AMS-DTL-23053/12 Class 5, ASTM D2902-Type I, and AMS 3584 specifications. Offers good abrasion resistance and excellent fungus, chemical, oil, solvent and acid resistance. Color: natural. **Sold in packages of 4′ and 6″ lengths.**

PHD SERIES (2:1) SHRINK RATIO, ADHESIVE-LINED POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

pro-POWER

PHD series heat-shrink tubing is made of thin-walled, flame-retardant polyolefin. Features one-step, environmental protection for electronic, electrical, automotive, and marine wire splices, harness breakouts and strain reliefs. As tubing shrinks to skin-tight fit, melted adhesive covers substrate and solidifies to form permanent waterproof barrier. Has –55°C to +110°C operating range, 121°C (250°F) minimum shrink temperature, and –1 to +5% longitudinal change. Meets MIL-I-23053/4, Class 2 requirement. Color: black. UL recognized. **Sold in packages of 4′ and 6″ lengths.**

PHS SERIES (3:1) HIGH SHRINK RATIO, ADHESIVE-LINED POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

pro-POWER

PHS series thin wall heat-shrink tubing offers the advantages of integral, multiple-wall construction. Flame-retardant, flexible polyolefin, lined with an internal layer of thermoplastic adhesive. Heat-shrinkable outer wall is radiation cross-linked, while the adhesive maintains high flow and excellent adhesion. Protects electronic components, wire splices, wire bundles, and harness breakouts. Rapidly shrinks to a skin-tight fit, forcing the melted adhesive to flow and cover the substrate. Upon cooling the adhesive solidifies, forming a permanent, non-drying, flexible and waterproof barrier. Minimum shrink temperature is 121°C (250°F). Specifications: Physical: Tensile strength of 2100 PSI, ultimate elongation of 5%, longitudinal change of –5%, secant modulus of 14,000 PSI. Electrical: dielectric strength of 700 V/mil, volume resistivity of 10^{12} ohm-cm. Chemical: corrosion-resistant, non-nutrient fungus-resistant, 0.3% water absorption. Excellent fluid resistance properties. Operating temperature range: –55° to +110°C with max. temp. (short period) of 250°C. Meets requirements of MIL-I-23053/4, Class 3 specifications. Color: black. UL recognized (file E165738). **Sold in packages of 4′ and 6″ lengths.**

PVHR SERIES IRRADIATED PVC HEAT-SHRINK TUBING

MADE IN USA · VW-1 · RoHS Compliant Available

pro-POWER

- 2:1 shrink ratio
- High flexibility
- Flame retardant
- Highly abrasion and cut-through resistance
- Chemical resistant
- Made from premium-grade, virgin polymers
- Meets MIL-I-23053/2 Class 1 specifications

PVHR series irradiated PVC heat-shrink tubing is ideally used for electrical insulation, protection, strain relief, jacketing and bundling. Features outstanding 3000psi tensile strength and 1083vpm dielectric strength. Shrinks quickly at 100°C (212°F). Operating temperature range: -20°C to 105°C. Meets UL Subject 224-VW-1, CSA OFT rated for 600V, ASTM D 3150 requirements. Color: black. Made in the U.S.A. **Sold in spool sizes indicated in table below.**

PVS SERIES FLEXIBLE, FLAME-RETARDANT, PVC HEAT-SHRINK TUBING

MADE IN USA · VW-1 · RoHS Compliant Available

pro-POWER

- 2:1 shrink ratio
- Low shrink temperature: 100°C (212°F)
- Highly flame retardant
- Flexible and abrasion resistant
- Resists many chemicals, oils, chlorine, moisture, salt-water and fungus
- Outstanding resistance to UV light
- Superior 3000psi tensile strength — 30% stronger than polyolefin
- Sizes up to large 4″ diameter

PVS series flexible, flame-retardant PVC heat-shrink tubing is constructed from premium-grade virgin polymers specifically engineered for total compatibility with all PVC insulated and jacketed wire and cable. Ideal for electrical insulation and strain relief of wire harnesses, terminals and wire splices.Offers protection, indoors and out, from UV light, fading, harsh chemicals, dirt, fungus, moisture, abrasion and splintering. Operating temperature range: -20C° to 105°C. Dielectric strength: 1083vpm. Meets UL Subject 224 VW-1, CSA OFT rated for 600V, ASTM D 3150, SAE-AMS-DTL-23053/2 Class 2 specifications. Color: black. *Also available in crystal clear; go online or call.* Made in the U.S.A. UL recognized, CSA certified. **Sold in spool sizes indicated in table below.**

SRM SERIES (2.5:1) SHRINK RATIO, SEMI-RIGID, MULTIPLE WALL POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

pro-POWER

Co-extruded and selectively cross-linked to provide meltable inner wall enabling contact between underlying surfaces. For installations that may require rework, retrofit or repair in the field. **SRM series** offers the advantage of easy removability. Ideal for one-strip approach to jacketing, encapsulating, and environmental sealing of splices, terminations, and components. Capable of 2.5:1 shrink ratio, +1 to –10% longitudinal change, –55°C to +110°C operating temperature, and has +135°C (275°F) minimum shrink temperature. Meets MIL-I-23053/4, Class 1 and AMS 3634 requirements. Color: black. UL recognized (file E165738). **Sold in bags of 4′ and 6″ lengths.**

RAYCHEM ATUM SERIES HIGH-EXPANSION RATIO 3:1, ADHESIVE-LINED HEAT-SHRINK TUBING

RoHS Compliant Available

TE connectivity

Authorized Distributor

ATUM series heat-shrink tubing is radiation-crosslinked and adhesive-lined to provide environmental sealing in a wide variety of electrical applications such as sealing connector backshells and cable breakouts and to repair damaged cable. Tubing and adhesive remain flexible, so the moisture-seal withstands bending. High-expansion ratio (3:1) makes it possible to repair cable without removing connectors. Full recovery temperature: 125°C. Operating temperature range: -55°C to 110°C. Meets military AMS-DTL-23053/4, Class 3 specifications. UL recognized at 110°C, 600V. Color: black. **Sold in 4 ft lengths.**

RAYCHEM DURASEAL HEAT-SHRINKABLE, ENVIRONMENTALLY-SEALED, NYLON-INSULATED CRIMP SPLICES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Heat-shrinkable crimp splices completely insulate and protect electrical connections from water, condensation, salt and corrosion. Provides strain relief and protects against wire pull-out and vibration in rugged environments. Easy-to-install, 1-pc. construction. Pre-installed nylon heat-shrink tubing is adhesive-lined for added protection against abrasions and cuts. Shrink ratio: 2:1. Operating temperture range: -55°C to 125°C. Ideal for wire-to-wire splicing in marine electronics, fleet maintenance, commercial wiring, and automotive/truck wiring maintenance applications. UL listed.

RAYCHEM DWP-125 HEAT-SHRINK TUBING KIT #3

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Adhesive-lining helps seal out moisture
- 3:1 shrink ratio
- Min. full recovery temperature: 125°C
- Operating temperature: -40°C to 110°C
- UL recognized, CSA certified @ 125°C, 600V

Flexible **DWP-125** adhesive-lined, medium-wall, flame-retardant polyolefin heat-shrink tubing is a versatile, environmentally friendly choice for many commercial applications that require mechanical protection and sealing against moisture and chemical ingress. As it shrinks, the inner adhesive liner melts and flows to seal and encapsulate components or splices contained within.

Mfg. part no. DWP-125-KIT3 is comprised of 111 pieces of heat-shrink tubing in 6″ pre-cut lengths packaged in a durable, six section plastic storage box with hinged lid. Assortment consists of: 25 ⅛″ I.D. pieces (15 black, 5 white, 5 red), 25 3/16″ I.D. pieces (15 black, 5 white, 5 red), 24 ¼″ I.D. pieces (20 black, 4 red), 10 ½″ I.D. pieces (7 black 3 red), five ¾″ I.D. pieces (3 black, 2 red), and three 1″ I.D. black pieces. Also included are 19 pieces of clear Thermofit® **ES1000** adhesive-lined, medium-wall, semi-rigid polyolefin heat-shrink tubing (4:1 shrink ratio) consisting of six pieces of No. 1, five pieces each of No. 2 and No. 3 and three pieces of No. 4 Thermofit® **ES1000** tubing, which is used for environmental sealing and electrical insulation of wire splices, terminations and components. *Order refills for* **DWP-125** *tubing separately below.*

RAYCHEM HIGH-TEMPERATURE HEAT-SHRINKABLE SEALING SLEEVES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Low profile, lightweight but tough
- Robust fluid and temperature resistance
- Sealing material is pre-installed in sleeve for moisture sealing and corrosion protection
- Protects against abrasion and chaffing
- 2:1 shrink ratio

High-temperature fluoropolymer sealing sleeves provide a robust, lightweight cover which shrinks to environmentally seal in-line connections, compression joints, terminals, and other substrates used in the aerospace, defense, and marine industries. Available in a variety of diameters and lengths for numerous uses, including cable jacket repair. Molded of black, heat-shrinkable, radiation cross-linked modified fluoropolymer with a light blue, meltable sealing insert made of environmentally-resistant, modified thermoplastic fluoroelastomer. Meets FAR Part 25 appendix F of the FAA standards. Rated for continuous use from -65° to +200°C with excursions to 260°C for up to 500 hours. Provides electrical insulation up to 200V/mil of thickness and volume resistivity to 10E11 ohm-cm. No need for oven curing equipment; a heat gun, rated at 2200W or greater, is recommended for application.

RAYCHEM C-WRAP SIDE ENTRY HEAT-SHRINKABLE REPAIR SLEEVES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features

- 150°C rated
- Easy-to-install — saves time, manpower, cost
- Side-entry for easy access to damaged wire
- Color-coded for proper sizing of each application
- Long-term performance provides a permanent repair
- Low-profile — small diameter, short length
- Wrap-around design eliminates de-pinning of connector for repair
- Prevents galvanic corrosion on center conductor
- Environmental- and immersion-resistant
- Meets fluid and sealing requirements in SAE-AS81824
- Length: outer sleeve 19.05mm, inner adhesive 21.59mm

Applications

- Used as a side-entry repair kit
- Aerospace
- Defense
- Marine

C-Wrap side-entry repair sleeves are designed to repair and seal a damaged wire jacket that has been chafed or has a radial crack or cut on the insulation. C-Wrap repair sleeves consist of two pieces: the outer heat-shrinkable radiation cross-linked modified fluropolymer insulation sleeve and a meltable modified thermoplastic fluroelastomer adhesive inner layer. The side-entry and low-profile construction offers easy access to repair and seal a damaged wire jacket. Ideal for use on insulations rated at 135°C or higher. Temperature range: -65°C to +150°C.

RAYCHEM MICRO MOLDED HEAT-SHRINKABLE SHAPES (BOOTS)

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Small size, lightweight
- Supplied in expanded form
- Fluid and temperature resistant
- Environmental sealing against moisture and dirt ingression
- Provides protection against mechanical abuse at cable connector interface
- 2:1 shrink ratio

Micro Molded heat-shrinkable shapes (boots) are ideal for use with micro circular connectors to provide connector/cable strain relief. Molded of heat-shrinkable, semi-rigid, elastomer, designed to offer excellent performance in harsh environments. Ideal for use in military and commercial vehicles where high temperatures and long term exposure to hot fluids is expected. On application of heat, boots shrink to a predetermined size and shape, providing a tough, protective covering for the components over which they are installed. Color: black.

HEAT-SHRINK TUBING

RAYCHEM NT-MIL SERIES FLEXIBLE MODIFIED ELASTOMERIC HEAT-SHRINK TUBING

RoHS Compliant Available

TE connectivity

Authorized Distributor

NT-MIL series modified elastomeric heat-shrink tubing offers outstanding resistance to abrasion and physical abuse while providing flexibility and strain relief needed in many harnessing and wire bundling applications in military and aerospace industries. Meets stringent requirements of AMS-DTL-23053/1, Classes 1and 2. Remains flexible at low temperatures without cracking. Withstands heat shock at 200°C without dripping, flowing or cracking. Resistant to common fluids and solvents. Shrink ratio: 1.75:1. Full recovery temperature: 135°C. Continuous operating range: -70°C to 121°C. Color: black. **Sold in spool sizes indicated in table below.**

RAYCHEM RNF-100 FLEXIBLE HEAT-SHRINK TUBING

UL CSA RoHS Compliant Available

TE connectivity

Authorized Distributor

- Highly flame retardant
- Flexible to conform to irregular shapes
- Excellent durability
- Chemical resistant

RNF-100 series general-purpose polyolefin heat-shrink tubing is designed to provide superior mechanical- (abrasion, cut-through and strain relief), thermal- and fluid-resistance performance in demanding environments. Ideal for wire bundling, light-duty harnesses and wire identification. Black tubing is flame-retardant and meets AMS-DTL-23053/5, Class 1 military requirements. Clear tubing meets AMS-DTL-23053/5, Class 2 military requirements. Shrink ratio: 2:1. Minimum shrink temperature: 95°C. Continuous operating temperature range: -55°C to 135°C. UL recognized, CSA certified at 125°, 600V. **Sold in 4 ft. (1.22m) lengths and in mini or regular spool sizes indicated in tables below.**

RAYCHEM RT-780 TYPE 1 NBCCS HEAT-SHRINK TUBING

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:

- Tyco Electronics materials have been hardened to withstand the damaging effect of NBC contamination and decontamination
- Maximum use of fluoropolymers that do not absorb contaminants and facilitate rapid removal with decontaminants
- Survivable after live agent exposure to HD, VX and TGD at interior and exterior exposure levels
- Chemical agent tested – desorption and hazard contact area data available for NBC survivability modeling

Specifications:

- Tested to SCX-15112 and SCX-15111 for survivability in a variety of the harshest vehicle fluids at elevated temperatures
- Tested to the Army Materiel Requirements for NBCCS in accordance with Test Operation Procedures for TOP 8-2-510, NBC Contamination Survivability
- Creates compliance of chassis and engine compartment electrical harnesses in accordance with the Army Regulation 70-75 "Survivability of Army Personnel & Materiel"

The RT-780 Type 1 tubing is part of Tyco Electronics Raychem integrated 780 system for harnessing applications requiring Nuclear Biological and Chemical contamination survivability (NBCCS). This system consists of Raychem heat-shrinkable tubing, molded parts, wire, adhesives, adapters, and other components necessary to build harnesses from one connector side to the other. These components in each system are specifically designed for application environments they may be exposed to. Examples of these environmental elements may include common vehicular or aerospace fluids, extreme high or low temperatures, or mechanical abuse during installation, operation, and storage.

RAYCHEM RMW SERIES MEDIUM-WALL, ADHESIVE-LINED POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

NEW

TE connectivity

Authorized Distributor

- Medium-wall provides reliable electrical insulation
- Withstands mechanical abuse for increased product reliability
- Resistant to impact and abrasion
- Resistant to chemicals and moisture
- Provides a moisture-proof seal preventing corrosion of underlying components
- Adhesive liner seals to most common insulation materials and metals
- Easy to install with torch or heat gun
- UV resistant

RMW series rugged, medium-wall, adhesive-lined polyolefin heat-shrink tubing is specifically designed foruse in a broad range of low-voltage applications. insulating, protecting and sealing electrical connections and joints in low-voltage cable. Tough and semi- flexible, makes it suited for the insulation and protection of cable joints in low voltage electrical systems as well as cable repair. Typical applications include power distribution, trucks and buses, heavy equipment, rail cars, shipyards, and underground wells. High shrink ratio of 3:1 to cover uneven substrates. Minimum shrink temperature: 110°C. Minimum full recovery temperature: 125°C. Operating temperature range: -40°C to 110°C. Color: Black. **Sold in 4' lengths.**

RAYCHEM TAT-125 SERIES FLEXIBLE, ADHESIVE-LINED POLYOLEFIN HEAT-SHRINK TUBING

RoHS Compliant Available

TE connectivity

Authorized Distributor

TAT-125 series heat-shrink tubing is adhesive-lined, flexible and thin-walled making it suitable for electrical insulation and moisture sealing in a wide variety of applications. Tubing and adhesive remain flexible, so the moisture-seal withstands bending. Shrink ratio: 2:1. Full recovery temperature: 121°C. Operating temperature range: -55°C to 110°C. Meets military AMS-DTL-23053/4, Class 2 specifications. UL recognized. Color: black. **Sold in 4 ft lengths.**

RAYCHEM VERSAFIT HIGHLY FLAME-RETARDANT, LOW-RECOVERY TEMPERATURE HEAT-SHRINK TUBING AND KITS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 2:1 Shrink ratio
- Min. shrink temperature: 70°C (158°F)
- Min. full recovery temperature: 90°C (194°F)
- Operating temperature: -55°C to 135°C

Versafit™ series heat-shrink tubing is ideal for a variety of functions in commercial and military applications, such as insulating and protecting in-line components and wire bundles for very flexible harnesses. Constructed from a crosslinked polyolefin to provide high flame-retardance (VW-1), excellent flexibility and a low shrink temperature. Meets military AMS-DTL-23053/5, Classes 1, 3 specifications. UL recognized, CSA certified at 125°C, 600V, with VW-1 flammability rating. Color: black. **Sold in mini and regular spool sizes indicated in table below.**

FP-301VW SERIES (2:1) SHRINK RATIO POLYOLEFIN HEAT-SHRINK TUBING KITS

RoHS Compliant Available

3M

- General-purpose, flexible polyolefin
- Variety of popular tubing sizes
- Choice of all-black or multi-colors assortments
- Packaged in a plastic storage case

The all-black tubing kit contains 102 pieces of 6" tubing lengths, in six sizes ranging from 3/16" to 1". *Order replacement tubing packs separately on this page.*

Mfg. Part No.	Description	Stock No.	Price Each
FP-301 KIT BLACK	All-Black Heat-Shrink Tubing Kit	16P8446	85.61

The assorted color kit contains over 66 feet — a total of 133 pieces of 6" lengths in six diameters and seven colors: black, red, white, yellow, blue, green, and clear. Includes: five of each color in 3/32" (2.36) size, four of each color in 1/8" (3.18) size, three of each color in 3/16" (4.75) size, three of each color in 1/4" (6.35) size, two of each color in 3/8" (9.53) size, and two of each color in 1/2" (12.70) size. *Order replacement tubing packs separately on this page.*

HEAT-SHRINK TUBING KITS

8420 SERIES COLD-SHRINK CONNECTOR INSULATORS

RoHS Compliant Available

3M

- Simple installation, requires no tools
- No torches or heat required
- Seals tight, retains its resiliency and pressure
- Good thermal stability
- Water-resistant — meets water seal requirements of ANSIC 119.1
- No mastic or tape required to seal
- Resists fungus, acids, alkalies and ozone
- For indoor and out applications — direct burial or submersible

Cold-Shrink connector insulators are ideal for insulation and environmental sealing of electrical connections indoors and out. Offers excellent abrasion resistance and toughness. Insulators are open-ended, tubular, EPDM rubber sleeves that are factory expanded and assembled onto a removable plastic core. After the tube is positioned for installation over an inline connection, coupling or terminal lug, etc., the core is removed allowing the tube to shrink and form a water-resistant seal. Unwind the core to install. No tools are required. Color: black. Other sizes also available; *go online or call.*

NST SERIES (2:1) SHRINK RATIO, THICK-WALL, NEOPRENE HEAT-SHRINK TUBING

3M

NST series neoprene thick-wall heat-shrink tubing provides superior cut-through and abrasion resistance. Excellent resistance to oils too. Maintains flexibility at low temperature. Rated for continuous operation from -70°C (-94°F) to 121°C (250°F). Recommended for applications requiring a tough, highly-flexible covering to operate in severe environmental conditions. Oil resistance properties make tubing ideal for auto, military and construction equipment industries. It is particularly useful for fabrication and repair of flexible harnesses and wire bundles and for covering hydraulic couplings. Meets millitary specifications: MIL-R-46846, Type 1, Class 1; MIL-DTL-23053/1, Class 1,2; AMS-3623. Color: black. **Sold in spool sizes indicated in table below.**

Cables you trust. Service you deserve.

Choose FIT MGKIT 1 FIT® Heat-Shrink Tubing Variety Pack with MiniGun for:

- A convenient variety pack of Alpha Wire's FIT® -221 general-purpose irradiated polyolefin heat-shrinkable tubing (consisting of 60 6" long cut pieces in 5 sizes and 6 colors)
- Alpha's smallest heat gun, FIT® MiniGun, with a nozzle temperature to 1000°F, 6' cord, rated 120V, 350W, 3A, UL listed
- Convenience in the field or in the shop
- Cost-effective solution for electrical and electronics technicians

These completely portable and extremely compact kits include all necessary materials to satisfy strain relief, splicing, connecting, identification, environmental protection and cable repair applications. Select the variety pack needed, with or without the FIT® MiniGun, or *order additional MiniGuns separately below.*

175-PC. PVC HEAT-SHRINK TUBING ASSORTMENT

RoHS Compliant Available

pro-POWER

VW-1

MADE IN USA

- All black PVC tubing cut into 6″ lengths
- Mix of five popular diameter sizes: 3⁄32″, 1⁄8″, 3⁄16″, 1⁄4″, and 3⁄8″
- 2:1 shrink ratio
- Highly flame retardant
- Low shrink temperature
- Highly flexible
- Abrasion resistant
- Resists many chemicals, oils, UV light, fungus, moisture and salt-water

175-pc. assortment of all-purpose PVC heat-shrink tubing in the most popular diameter sizes used for electrical insulation, protection, strain relief, jacketing, and wire bundling. Packed in a rugged, transparent container that sits upright on shelves, workbenches and tabletops for easy accessibility. Ideal for engineers, R&D labs, shop floor and maintenance departments. Meets UL Subject VW-1, SAE-AMS-DTL-23053/2 Class 2 specifications. UL recognized, CSA approved.

POLYOLEFIN HEAT-SHRINK TUBING KITS

RoHS Compliant Available

pro-POWER

- Choose between 2:1 or 3:1 shrink ratios
- Nominal diameters: 1⁄8″, 3⁄16″, 3⁄8″, and 1⁄2″
- Lengths: 2″ and 2 3⁄4″
- Colors: black, blue, yellow, red and white

Pro-Power adhesive-lined polyolefin heat-shrink tubing kits are the perfect solution for the all-around wiring professional. Each kit contains 180 pieces of tubing in a number of different sizes and assorted colors to accommodate almost any heat-shrink tubing situation. UL recognized, CSA certified.

Mfg. Part No.	Description	Stock No.	Price Each
PP2220	180-Pc. Heat-Shrink Tubing Kit — 2:1 Shrink Ratio	54M5897	35.76
PP2221	180-Pc. Heat-Shrink Tubing Kit — 3:1 Shrink Ratio	54M5898	72.24

HEAT-SHRINK TUBING KITS • INSULATING TUBING

HEAT-SHRINK TUBING KITS

pro-POWER

Kits contain a wide assortment of heat-shrink tubing, listed in the table below, enabling the engineer to choose the best kind for each application before putting a prototype into production. The basic kit contains 88 pieces of tubing, each 6″ (150) long. The advanced kit contains 174 pieces of tubing, each 3″ (75) long. Both kits are packaged in a sectioned, high-impact polystyrene storage box with "Quick-Scan" chart identifying contents.

KIT CONTENTS

Mfg. Part No.	Description	Basic Kit Pcs.	Advanced Kit Pcs.
PVS	Flexible Polyvinylchloride 105 Shrink Tubing	18	18
FPS	Flexible Polyolefin Shrink Tubing	18	18
FPF	Flexible Polyolefin Flame-Retardant Shrink Tubing	18	18
KYS	Polyvinylidene Fluoride (PVDF) Shrink Tubing	15	16
PHD	Multiple Wall Polyolefin Shrink Tubing with Thermoplastic Adhesive Liner	9	10
SRM	Semi-Rigid, Multiple Wall Polyolefin Shrink Tubing	10	10
LTP	Flexible Polyolefin, Low-Temp. Shrink Tubing	...	18

SHRINK-A-SHIELD TUBING KIT

RoHS Compliant Available

pro-POWER

Heat-shrink tubing with EMI/RFI shielding. 2:1 shrink ratio polyolefin with conductive cloth liner combines an efficient shield with a shrink-fit jacket. Ideal for shielding wire or cable, adding additional shielding, or repairing shielding that has been stripped back for wire termination. Meets MIL-I-25053/5, Class 1 specifications. Passes VW-1 vertical wire flame test. Dielectric strength: 300 volts/mil. Attenuation averages 85dB from 1MHz to 1GHz. Temperature range: -40°F to +250°F. Kit includes 1′ of shielding tubing and 3′ of 24 AWG grounding wire.

PVI SERIES PVC INSULATING TUBING

RoHS Compliant Available

pro-POWER

MADE IN USA

- Superior high dielectric strength: 870vpm
- Tensile strength: 2780psi
- Flexible
- Rugged and abrasion resistance
- Environmental and UV stability
- Resistant to many chemicals, oils, acids, corrosives, heat and fungus
- Made of premium-grade, virgin polymers

PVI series all-purpose flexible PVC tubing for electrical insulation, ground strap and chafing protection, bundling and protecting wire harnesses. Operating temperature range: -20°C to 105°C. UL Subject 224 VW-1, CSA OFT. Size #24 through #1 UL rated for 300V; Sizes 5/16 through 2″ UL rated for 600V. Meets AMS 3631, ASTM D922 requirements. MIL-I-631 D Grade C QPL approved. Colors: black or clear. Made in the U.S.A. **Sold in spool sizes indicated in table below.**

PTFE INSULATING TUBING

MADE IN USA

RoHS Compliant Available

pro-POWER

Non-toxic, chemically inert tubing offers superior insulating and highly stable electrical properties. Features excellent electrical resistance and translucent clarity. Withstands wicking, moisture absorption, and contamination. Continuous operating temperature: –230°C to +260°C. UL 94V-0 flammability rating. **TTI series** is used for miniaturized and compact installations. **TSI series** is used where extra-dielectric or mechanical strength is needed. Made in the U.S.A. **Sold in 100 spools.**

PANDUCT® TYPE NNC HALOGEN-FREE METRIC WIRING DUCT

RoHS Compliant Available

PANDUIT®

- Made of halogen-free modified polyphenylene oxide (mPPO) material and verified with IEC 60754-2 test method (test on gases evolved during combustion of electric cabling)
- UL recognized continuous-use temperature: 203°F (95°C)
- UL94 Flammability Rating of V-0
- Conforms with NFPA 79-2002 section 14.3.1 requirement for flame-retardant material
- Provided with DIN 43 659 mounting holes
- **Sold duct base and cover packaged together in 2 meter lengths***

PANDUCT® TYPE TNC LOW-SMOKE, HALOGEN-FREE SLOTTED WALL WIRING DUCT

RoHS Compliant Available

PANDUIT®

- Low-smoke, halogen-free material meets the regulatory requirements of the mass transit industry and other regulated environments
- UL recognized continuous-use temperature: +221°F (+105°C); shipping, handling, and installation to -94°F (-70°C)
- Flammability rating of UL94 V-0
- Rail standard compliance/rating: NFPA 130, DIN 5510-2, BSS 7239, NF F 16 101, NF F 16 102, EN UNI 11925-2
- Provided with DIN 43 659 mounting holes
- Metric sizing and finger progression
- Duct and cover packaged together in 2 meter lengths
- Replacement covers and divider walls available
- Non-slip cover liner ensures cover does not slide during shipment, vibration, or when in vertical orientation
- Score lines allow for easy breakouts

PANDUCT TYPE F NARROW SLOTTED WIRING DUCT

RoHS Compliant Available

PANDUIT®

- Narrow-finger design provides proper spacing for use with high-density terminal blocks
- Panduit® exclusive rounded edges will not cut hands or abrade wiring insulation
- Double scoreline saves installation time, and ultimately lowers installed cost
- Nonslip cover, *ordered separately*, will not slide when installed on duct base
- Flush cover design holds more wires than traditional duct designs
- Specially formulated lead-free PVC eliminates health concerns associated with PVC that contains lead
- Restricted slot design reduces installation time, providing low installation cost to the end user

Panduct® Type F wiring duct features smooth rounded edges to protect wires and installer's hands from abrasion. Narrow-finger design and more slots allow greater wiring flexibility for newer, compact terminal blocks. Ideal for use in control panels and communications closets. Flammability rating of 94V-0. Color: light gray. *Order nonslip covers separately online or call.* UL recognized, CSA certified, CE compliant. **Duct priced per foot. Sold in packages of four 6' lengths.** Additional sizes and a full line of accessories are available; *go online or call*.

PANDUCT® PANELMAX™ TYPE-G EMI SHIELDED SLOTTED WIRING DUCT

RoHS Compliant Available

PANDUIT®

- Up to 20dB noise reduction
- 90% noise voltage reduction (up to 6 inches air space)
- Lead-free PVC with metallic foil finish
- UL recognized continuous use temperature: 50°C (122°F)
- 6 foot length

Panduct® PanelMax™ Type G EMI shielded wiring duct routes, separates, and shields sensitive wiring from noise emission. Use with **mfg. part no. C2LG6** Type C duct cover and PanelMax™ Noise Shield; *order separately on pages 1264-1265.* Mounting holes make it easy to install with 10-32 x ½" screws (not included). Color: light gray. **Priced per foot. Duct base sold in packages of 6' lengths.**

RACEWAYS

PANDUCT TYPE G — WIDE SLOTTED WIRING DUCT

RoHS Compliant Available

PANDUIT®

- Wide-finger design provides greater rigidity and larger slot width
- Panduit® exclusive rounded edges will not cut hands or abrade wiring insulation
- Double scoreline saves installation time and ultimately lowers installed cost
- Nonslip cover, *ordered separately*, will not slide when installed on duct base
- Flush cover design holds more wires than traditional duct designs
- Specially formulated lead-free PVC eliminates health concerns associated with PVC that contains lead
- Restricted slot design reduces installation time, providing low installation cost to the end user

Panduit® Type G wide slotted wiring duct features smooth, rounded edges to protect wires and installer's hands from abrasion. Flammability rating of 94V-0. Color: light gray. *Order nonslip duct covers separately online or call.* UL recognized, CSA certified, CE compliant. **Duct priced per foot. Sold in packages of four 6′ lengths.** Additional sizes, colors, and a full line of accessories are available; *go online or call.*

For the full line of NEMA enclosures, see the **Enclosures, Boxes and Racks** section.

PANDUCT TYPE H — HINGED COVER SLOTTED WALL WIRING DUCT/RACEWAY

RoHS Compliant Available

PANDUIT®

- Unique hinged cover design reduces time spent on maintenance or reinstallation of wire
- Slotted duct and hinged cover come attached and packaged together
- Mounting holes provided
- UL94V-0 flammability rating
- Continuous use temperature rating: 50°C (122°F)

Panduct® Type H dual-sided hinged cover, slotted wall wiring duct/raceway is perfect to route and protect wire and cable in electrical control panels and data communications applications. The unique push-on hinged cover is simple to install and remove, and once installed can be opened from either side of the duct making access to wiring fast and easy. Material: lead-free PVC. Color: light gray. Slot width: 0.31″. UL recognized, CE compliant. **Priced per foot. Sold in packages of eight 3′ lengths or four 6′ lengths for a total of 24′.**

PAN-WAY TYPE LD — HINGED COVER SURFACE RACEWAY

RoHS Compliant Available

PANDUIT®

- Hinged cover design allows cable to be laid-in instead of pulled through
- Factory-applied adhesive backing speeds installation
- Terminates using surface mount outlet box solutions or Mini-Com® surface mount boxes

Pan-Way® Type LD low-voltage, single-channel surface raceway is designed to route, protect and conceal data, voice and video cabling. Features a one-piece hinged cover design. Suited for low-voltage cabling (under 48V) and can be used with the PAN-NET™ networking cabling system for Category 5 UTP, ScTP, coax and fiber-optic cabling applications. Color: electric ivory. Other colors and sizes available; *go online or call. Order raceway fittings separately; go online or call.* **Priced per foot. Sold in packages of four 6′ lengths.**

PANDUCT® PANELMAX™ NOISE SHIELD

RoHS Compliant Available

PANDUIT®

Bonding Clip and Cable Tie Slots Integrated into Shield

Noise Shield Installed Inside Duct

- Metal noise barrier installs easily inside wiring duct — choice of three height
- Reduces EMI noise coupling between noise emitting and sensitive cabling
- Provides up to 20dB noise reduction (equivalent up to 6" of air spacing)
- Bonding clips maintain electrical continuity and reliable system performance
- Perforated and pre-scored sections speed installation — just snap off to easily cut to length
- Vertical wall slots allow wires to cross the barrier providing greater design flexibility
- Horizontal cable tie slots allow cable bundles to be held in place using cable ties

PanelMax™ Noise Shield with Bonding Clips

Panduct® PanelMax™ noise shield separates motor drive cable and sensitive communication/signal cable within industrial control panels to reduce electromagnetic interference (EMI) while saving valuable space. Designed to install easily within Panduct® 2", 3", or 4"H wiring duct or when mounted directly to metal panel surface, delivering greater design flexibility to satisfy a wide range of applications. Zinc-plated steel surface in contact areas with sub-panel and bonding clip provides continuity and is corrosion resistant. Durable black powder coated vertical surface for smooth edges. Meets UL 508/508A requirements as a barrier between conductors. Each kit includes two 3-foot noise shield sections, bonding clips, and anti-oxidizing paste.

Mfg. Part No.	Description	Stock No.	Price per Kit

PANDUCT PANELMAX DIN RAIL WIRING DUCT

RoHS Compliant Available

PANDUIT®

- Space-saving design allows for 30%+ smaller enclosure footprint
- DIN rail and DIN component compatible — including 35 or 15mm rails
- Integrated DIN rail fastening slots for up to 50% faster duct and rail installation and reduced labor costs
- Hinged and flexible cover remains attached for easier maintenance and upgrades
- Slotted platform and sidewalls provide optimal wire management and aesthetics
- Channel pass through slots shorten the wiring path between components on the same DIN rail
- Lead-free PVC construction meets UL94 flammability rating

PanelMax™ DIN Rail Wiring Duct (Shown in Application with DIN Rail and Components — not included)

Panduct® PanelMax™ DIN rail wiring duct is an innovative wire management solution that maximizes space utilization within industrial enclosures for flexibility in panel layout and reduced material and installation costs. The unique design raises components from the panel surface for easier access and faster terminations. DIN rail wiring duct is compatible with common DIN rail and DIN mount components to satisfy a wide range of applications. Three DIN rail wiring duct sizes accommodate user supplied DIN rail and a variety of DIN mount components for application flexibility. Comes complete with wiring duct base, covers and DIN rail fasteners. Replacement parts and accessories ordered separately below. Color: light gray. Also available in white; *go online or call*. UL recognized, CE compliant. **Priced per foot. Duct base and replacement cover sold in packages of 6' lengths.**

PANDUCT PANELMAX CORNER WIRING DUCT

RoHS Compliant Available

PANDUIT®

- Space-saving one-piece construction
- Angled four-sided channel design fits in unused space in vertical corner of enclosures
- Single channel with co-extruded flexible hinges for fast installation
- Integrated mounting feature allows divider wall to snap onto base and create two channels
- Lead-free PVC meets UL94V-0 flammability rating

Panduct® PanelMax™ corner wiring duct is an innovative one-piece wire management product that makes more efficient use of space inside enclosures, speeds installation, and reduces control panel assembly costs. PanelMax™ corner wiring duct is used in the vertical corners of medium to large electrical control panels (with both side and back panels) to route, conceal, and protect electrical wiring. Color: light gray. Also available in white. Compatible with Panduct® 3" and 4"H wiring duct and uses standard 2"W Panduct® wiring duct cover, all ordered separately; *go online or call*. UL recognized, CSA certified, CE compliant. **Priced per foot. Duct base and divider wall sold in packages of 6' lengths.**

ADHESIVE-BACKED SURFACE MOUNT RACEWAY DUCT

pro-POWER

Ivory

White

¾″ Duct 1¼″ Duct 1¾″ Duct

Surface mount raceway is a one-piece latching duct designed to contain, route, and protect wire and cable when it can't be run within a wall. Designed with a special flexible hinge, this raceway duct allows numerous openings without creating stress, cracking or discoloration. The self-locking, hidden positive latch allows for quick re-entry and secure installation of wire and cable. Constructed from durable PVC, rated UL 94V-0. Adhesive backing is 1/16″ thick urethane foam tape which features good high-temperature and solvent resistance. Raceway duct is paintable with a latex-based paint to fit any office or home decor. Choice of ivory or white. **Sold in packages of 24′ in four 6′ lengths.**

HIGH-DENSITY SLOTTED-WALL WIRING DUCTS

High-density slotted-wall ducts come with narrow fingers, equaling a 2-to-1 ratio compared to standard slotted wiring ducts. The narrow fingers reduce fanning of the wires to the terminal blocks for a neater appearance and to accommodate more compact designs and components in control panels, communications closets, and other applications. Made with a versatile mounting hole pattern which lines up with DIN 35 rail; the mounting hole rows are also consistent with standard slotted wiring duct, so the two ducts can easily be interchanged. Double-scored breakaway duct fingers make larger breakouts easy. Restricted opening design prevents unintended removal of wires. Color: gray. Flammability rated UL94V-0. UL recognized, CSA certified. Made in the U.S.A. *Order duct covers separately below.* **Sold in packages of 24′ in four 6′ lengths.**

SOLID-WALL WIRING DUCT

Solid-wall design ducts for straight wire runs where no breakouts are required. Color: gray. Flammability rated UL94V-0. UL recognized, CSA certified. Made in the U.S.A. **Sold in packages of 24′ in four 6′ lengths.**

Mfg. Part No.	Nominal W x H (in.)	Stock No.	Price per Pkg. 1-199
WDWT-0303-72	0.75 x 0.75	08X6012	3.82

UNIVERSAL WIRING DUCT COVERS

Designed for used with slotted- and high-density slotted- wiring ducts, *ordered separately above.* Versatile snap-on design with nonslip liner. Made of high-impact PVC material. Color: gray. Flammability rated UL94V-0. UL recognized, CSA certified. Made in the U.S.A. **Sold in packages of 24′ in four 6′ lengths.**

300 SERIES PVC DUCT AND FITTINGS

WIREMOLD Shape Electronics Division

- One-piece latching design
- Rugged PVC construction
- Adhesive backing for easy and fast installation
- Smooth texture ivory finish

300

317

300 series™ nonmetallic PVC duct conceals electrical cords and low voltage wiring. Full compliment of fittings to facilitate virtually any installation; *order separately below.* Ivory finish blends with almost any decor or can be painted with latex paint to blend into the wall surface. ***Duct sold in cartons of 100′, priced per foot.**

Mfg. Part No.	Description	Dimensions H x W (mm)	Stock No.	Price per Foot 1-99

ECLIPSE PN03, PN05 AND PN10 SERIES NONMETALLIC RACEWAY SYSTEMS

WIREMOLD Shape Electronics Division

Eclipse™ PN03, PN05 and **PN10 series** workstation nonmetallic raceway is a single compartment system for power or communications wiring. Ideal for use in classrooms, offices, and hotel applications, or anywhere a small, low profile raceway is needed. Durable, flexible, co-extruded hinge allows for repeated openings and closings while maintaining product integrity and aesthetics. Adhesive backing allow base to be pressed onto surface for easy and fast installation. Color: ivory. Full compliment of fittings, *ordered separately below*, to facilitate virtually any installation . UL listed. ***One-piece raceway sold in cartons of 32', priced per foot.**

PN03 SERIES NONMETALLIC RACEWAY SYSTEM

CABLE MOUNTS AND WIRING ACCESSORIES FOR USE WITHOUT CABLE TIES

RoHS Compliant Available

PANDUIT®

- **Mfg. part no. ARC.68** (Fig. 1) Adjustable Releasable Clamp Provides a Fast, Convenient Method of Securing Bundles
- **Mfg. part no. ACC** (Fig. 2) Cord Clip Easily Snap Bundles Into or Out of the Clips; Available in 3 Sizes to Hold Cords, Tubing, Cable or Wire Bundles
- **Mfg. part no. BECP** (Fig. 3) Offer Beveled Entry for Easy Snapping; Available in Adhesive-Backed and Pushback Styles
- **Mfg. part no. AMC** (Fig. 4) Holds a Single Cable; Can Be Mounted on Any Flat, Smooth Surface
- **Mfg. part no. LC** (Fig. 5) Latching Clip Retains and Supports Wire; Offers a Quickly-Installed Mount with a Locked Cover for Withstanding Vibration
- **Mfg. part no. MACC** (Fig. 6) Metal Adhesive Cord Clip can be Opened and Closed without Damage to the Clip
- **Mfg. part no. AJC** (Fig. 7) Low-Profile "J" Clips Retain Cords, Wires or Tubing; Flexible Design for Easy Insertion but Secure Performance
- **Mfg. part no. PMCC** (Fig. 8) Push-Mount Cord Clip Snaps Easily into Pre-Drilled Hole in Panels up to .105" Thick; Integral Mounting Device and Winged Design Holds Mount in Place
- **Mfg. part no. CCS** (Fig. 9) Fixed Diameter Cable Clamps are Constructed of Durable Nylon.
- **Mfg. part no. CCH** (Fig. 9) Clamps are Heavy-Duty Nylon

CUSHIONED CABLE CLAMPS

RoHS Compliant Available

pro-POWER

Cushioned clamps are used in many industries to route and protect tubes, pipes, wire bundles and cables. Neoprene is a general usage cushion with excellent weather and ozone resistance and medium oil resistance. Temperature range: –40°F to +250°F. Silicone rubber can be used in applications requiring moderate temperature silicone elastomer. It has superior ozone and weather resistance and an operating temperature of –65°F to +450°F. **Sold in packages of 100.**

DURA-TY CABLE TIES

RoHS Compliant Available

PANDUIT®

- Allows customized cut-to-size tie length
- Separate head with double stainless steel locking barb
- Constructed of weather-resistant acetal
- Excellent UV, chemical and moisture resistance
- High-tensile strength and high-impact resistance

Dura-Ty™ cable ties are used to secure and route cable in tough outdoor power and communication applications. Acetal material provides excellent weatherability, UV resistance, strength, and durability for a long service life. Dura-Ty™ cable ties (strapping) is available in two cross sections and comes packaged in cut-to-size reels for application flexibility. Heavy-cross section features a robust head design that allows the tie to be tightened over a wide range of angles for a safe and reliable installation, and incorporates a textured strap surface that improves gripping ability. Extra-heavy cross section meets Telcordia TR-TSY-000789 guidelines for lashed cable supports and is also available in pre-cut lengths for fast installation. Color: black

DURA-TY™ PRE-CUT CABLE TIES — EXTRA-HEAVY CROSS SECTION ONLY

PAN-STEEL STAINLESS STEEL CABLE TIES

RoHS Compliant Available

PANDUIT®

Pan-Steel® high-strength 304 stainless steel cable ties are designed for bundling, identifying and fastening applications in harsh environments. Fast and easy to install. Resistant to abrasion, radiation, weathering corrosion and temperature extremes. Self-locking, no sharp edges and easily installed by hand or tool; *order installation tool separately on page 1283*. For extra protection, choose polyester-coated 316 stainless steel ties, *ordered separately below*. **Sold in package quantities indicated in table below.**

PAN-TY FLUOROPOLYMER CABLE TIES

RoHS Compliant Available

PANDUIT®

- Low-smoke density and excellent flammability rating of UL94V-0
- Commonly accepted solution for bundling qualified cable without conduit in air handling space applications
- Distinctive maroon color recognized by many inspectors

Pan-Ty® fluoropolymer cable ties are rated UL listed, UL recognized as suitable for use in plenum or air handling spaces per NEC, Sec. 300-22(C) and (D).

PAN-TY METAL DETECTABLE CABLE TIES

RoHS Compliant Available

PANDUIT®

- Metal impregnated material — choice of polypropylene or nylon 6.6
- Identifiable by metal detectors and x-ray inspection equipment
- Distinct blue color facilitates quick visual detection
- Standard cross section
- One-piece cable tie design with locking wedge construction for consistent performance and reliability
- Curved tie tip for easy pick up and faster threading
- Smooth, round edges won't damage cable

Pan-Ty® metal detectable cable ties are designed to help the food, beverage, and pharmaceutical industries meet product manufacturing safety standards. Featuring metal impregnated material, these metal detectable products are identifiable by metal detectors and x-ray inspection equipment. Help companies comply with the U.S. Food and Drug Administration HACCP (Hazard Analysis and Critical Control Points) standards and the European Union (EU) hygiene monitoring regulations. Matching cable tie mounts are available; *go online or call*.

POLYPROPYLENE CABLE TIES — DARK BLUE

Polypropylene metal detectable material is ideal for use in processing and packaging areas where aggressive acid and alkaline chemicals are used to clean the equipment. Excellent chemical resistant cable tie and mount solution for food and pharmaceutical processing equipment manufacturing applications. Max. continuous use temperature per test method UL 746B: 239°F (115°C).

Super-Grip™ Cable Tie

SGABM20-A-C

SGABM25-A-C

SGABM30-A-C

SGABM40-A-L

SGTA1S8-C

Innovative Solution for Bundling Wire and Cable

- High grip strength grips tight preventing ties from moving laterally along length of bundle
- Thin, wide strap body improves tie flexibility while maintaining loop tensile strength
- Flared neck and strong locking wedge provides improved strength for rough installation and excellent small bundle performance
- Tapered tip with aggressive grips thread easily and alows positioning prior to locking for faster, accurate installation
- Low profile tie heads and mounts help conserve space, reduces height
- Stronger bridge design allows mount to support increased installation force

Super-Grip™ cable ties and mounts are designed to withstand rough installation practices that occur in MRO and construction projects. Super-Grip™ cable ties provide superior bundle tightness, increased excellent tensile strength, and excellent strap flexibility. Super-Grip™ cable tie mounts are available in a wide variety of styles to maximize application flexibility. Constructed of durable white nylon 6.6. Also available in black weather-resistant nylon 6.6; *go online or call.*

TAK-TAPE HOOK AND LOOP CABLE TIE ROLLS

RoHS Compliant Available

PANDUIT®

- Hook and loop fastener for general-purpose bundling
- Thin and flexible to quickly wrap around bundle
- Adjustable, releasable and reusable
- Cut-to-length continuous rolls

Tak-Tape™ hook and loop cable tie rolls are made of a unique material with polypropylene hooks on one side and nylon loops on the other so it fastens to itself. Color: black. **Mfg. part nos. TTS-20R0 sold in single 6.1m rolls, TTS-35R3-0 sold in packages of three 10.7m rolls, and TTS-35RX0 sold in packages of ten 10.7m rolls.**

TAK-TY AND TAPE-TY HOOK AND LOOP CABLE TIES

RoHS Compliant Available

PANDUIT®

8″ and 12″ Lengths — 6″, 12″, 18″ Lengths and Continuous Rolls

- Tak-Ty® — Durable polyethylene hook and nylon loop material (non-plenum use ties)
- Adjustable, releasable, and reusable
- No risk of over-tensioning or damaging high-performance copper and fiber optic cable
- Available in many styles, sizes and colors to suit a variety of applications

Tak-Ty® **HLTP** and **HLSP** style hook and loop cable ties are UL listed for plenum use in air handling spaces per NEC Section 300-22(c) and (d) and have a flammability rating of UL94V-2. Color: black. Other colors are available; go online or call. **Sold in packages of 10 ties in convenient perforated rolls of 6″, 12″, 18″ strips lengths and 8″ and 12″ loop tie lengths, except for mfg. part nos. with R0 suffix which are sold in cut-to-length continuous rolls of 15″.**

TAPE-TY™ HLTT STYLE — LOW-PROFILE, PRE-CUT CABLE TIES WITH NON-SLIP LEADER

Tape-Ty™ **HLTT** style low-profile hook and loop cable ties are constructed of ultra-thin, flexible polypropylene hook and polyamide loop materials. An adhesive non-slip applicator prevents lateral movement of tie and allows tighter fastening of cable bundle. Leaves no residue and is safe to use on high-performance cabling. Pre-cut ties eliminate cutting ties to length and staging them for each job. Adjustable, releasable, and reusable. Color: black. **Sold in coreless reel of 100 cable ties.**

ULTRA-CINCH HOOK AND LOOP TIES

RoHS Compliant Available

PANDUIT®

- Unique material with hooks and loops on same side
- User can secure a greater range of bundle diameters, including smaller bundles
- Adjustable, releasable and reusable multiple times
- Low-profile contoured cinch-ring
- Soft material used on high performance cabling to protect against over-tensioning
- Tapered tip threads easily for fast installation

UCT, UGCTE and UGCTC (Top to Bottom)

Ultra-Cinch™ hook and loop ties feature grommet on **mfg. part no. UGCTC** (center mount) and **UGCTE** (end mount) to provide reliable installations, that resists pull-out, and allows cable bundles to be securely fastened to surfaces. Color: black. Available in 7 other colors; *go online or call.* **Sold in packages of 10.**

WEATHER-RESISTANT PAN-TY CABLE TIES

RoHS Compliant Available

PANDUIT®

- Weather resistant — ideal for outdoor use
- Greater resistant to ultraviolet light
- High strength and low thread force
- One-piece construction for consistent performance and reliability
- Curved tip design allows for easy pick up, faster initial threading and installation

Pan-Ty® weather-resistant cable ties are constructed of Nylon 6.6. Color: black. UL listed (except where noted), UL recognized.

WEATHER-RESISTANT DOME-TOP BARB TY CABLE TIES

RoHS Compliant Available

PANDUIT®

- Weather resistant — for outdoor use
- Greater resistance to ultraviolet light
- Dome-Top head features unique patented design with round, smooth edges
- Stainless steel locking barb provides consistent performance and reliability
- Infinitely adjustable for tight bundles throughout its entire bundle range
- High-strength and low thread force

Dome-Top® Barb Ty weather-resistant cable ties are constructed of Nylon 6.6. Color: black. UL listed, UL recognized (except where noted).

DOUBLE-SIDED, DOUBLE-LOCKING CABLE TIES

RoHS Compliant Available pro-POWER

Natural

Black UV-Resistant

- Double-locking molded teeth design on both sides of tie provides greater tensile strength
- Availble in popular natural or ultraviolet black
- Black ties resist degradation by UV rays -- great for outdoor use
- Meets UL94V-2 flammability classification
- UL recognized component listing E125869

NATURAL NYLON TIES

Flexible double-sided, double-locking cable ties are great for bundling wire, cable, hoses, duct and countless other applications. Constructed from durable nylon 6/6 material. Serviceable in temperatures of -40° to +185°F (40° to 85°C).

WEATHER-RESISTANT NYLON CABLE TIES

RoHS Compliant Available

pro-POWER

- Ideal for outdoor use
- Resistance to UV light
- Large selection of sizes and tensile strengths
- Durable weather-resistant nylon
- Adjustable for tight, secure bundles
- Fast and easy installation

These weather-resistant cable ties are constructed of durable nylon with Carbonate A added for a greater resistance to ultra violet light. Color: black. **Sold in package quantities indicated in tables below.**

NYLON CABLE TIES

pro-POWER

- Large selection of sizes
- Durable nylon 6.6 construction
- Easily adjustable for tight, secure bundles
- UL94V-2 flammability rated
- UL recognized, CSA certified

Natural

Black

Choose general-purpose cable ties for indoor applications in popular natural and black, black weather-resistant cable ties for outdoor use. Releasable cable ties that permit easy release and reuse are also available in natural and black; *go online or call.* **Sold in package quantities indicated in tables below.**

VRT, VHRT, VHST, VUVT AND VTZT SERIES CABLE TIES

MADE IN USA · RoHS Compliant Available · pro-POWER

VRT series is for general-purpose indoor applications. UL94V-2 rated flammability. –40°F to +185°F continuous temp. range. **VUVT series** is for general-purpose outdoor applications. UL94V-2 rated flammability. –40°F to +185°F continuous temperature range. **VHST series** for higher-temp., indoor applications. UL94V-2 rated flammability. –40°F to +220°F continuous temp. range. **VTZT series** are for high-temp., chemical, radiation applications. –50°F to +302°F continuous temp. range. **VHRT series** for plenum wiring applications. Low smoke density. –50°F to +248°F continuous temp. range. *Order cable tie installation tools separately; go online or call.* **Sold in packages of quantities listed below.**

CATAMOUNT® TWISTTAIL® CABLE TIES

RoHS Compliant Available

Thomas&Betts

- Quick, easy, tool-less installation
- Remove excess tail with "bend and twist" motion
- Tail breaks off neat and clean
- Durable nylon construction
- Easily adjustable for tight, secure bundles

Just Twist Tail Off...DONE!

Catamount® TwistTail® cable ties are designed to lower installation costs and ease fastening for harness fabrication and wire bundling. Constructed of durable nylon available in natural or weather- and UV-resistant black for outdoor use. Temperature range: -40°F to 185°F. Flammability rating: UL94V-2. UL recognized. **Sold in packages of 50.**

TY-RAP® LOW-PROFILE CABLE TIES

RoHS Compliant Available

Thomas&Betts

Natural

UV Black

- Low-profile, contoured head reduces clearance and overall bundle size
- Classic oval design prevents snags, damage, and is easier to pull through
- Safeguard wall eliminates exposure to sharp edges so ties are easier on hands
- Non-magnetic stainless steel locking device for maximum strength and tightness

- Versatile nylon 6.6 material provides high strength and a wide temperature range
- No-slip tail with ribbed design for easy gripping and pulling during tensioning
- Turned-up tip provides quick pick-up and orients tie for easier assembly

Ty-Rap® low-profile cable ties securely fasten wire and cable in a variety of electrical and non-electrical applications. Its smooth, notchless body provide an infinite number of locking positions to fastening at the precise bundle diameter needed. Constructed of durable nylon 6.6 available in natural or weather- and UV-resistant black for outdoor use. Temperature range: -40°F to 185°F. Flammability rating: UL94V-2. UL listed, UL recognized, CSA certified, CE complaint. **Sold in package quantities indicated below.**

CATAMOUNT® CABLE TIES

RoHS Compliant Available

Thomas&Betts

Standard

Outdoor Weatherable

Catamount® cable ties are constructed of nylon 6.6 and designed to lower installation costs and ease fastening for harness fabrication and wire bundling in the manufacturing environment. Integrally formed nylon pawl combines low insertion and high locking strength. Rounded, low-profile head reduces number of snags. Tails have 2-sided finger-grip design that helps the operator grasp and pull ties snug. "Sure Grip" tab keeps tail from popping out while being threaded, then holds it securely for final tightening by hand or tool. Quick, easy pull-through increases productivity and reduces operator fatigue. Smooth edges prevent damage to wire insulation, reducing the opportunity for shorting. Color: natural (standard) or black (outdoor weatherable). Temperature range: –40°F to +185°F. **Sold in package quantities indicated below.**

TY-RAP DETECTABLE CABLE TIES

RoHS Compliant Available

Thomas&Betts

- Detectable by metal detectors, x-ray equipment and visual detection equipment
- Rated to 1.5mm ferrous sphere
- Nylon 6.6 patent-pending detectable compound
- Oval, low-profile head and smooth molded body strap
- Stainless steel locking device for superior holding power
- Adjustable design for a perfect fit
- Bright blue for easy visual detection

Ty-Rap® detectable cable ties are the perfect alternative to using expensive stainless steel fasteners. Ideal for food and beverage processing, pharmaceutical production, chemical and compounds manufacturing, tobacco processing, tie and airbag manufacturing and any other industry sensitive to contamination using detection equipment. Made from Nylon 6.6 but incorporating a unique, patent-pending compound that's detectable by metal detectors and x-ray equipment. Flammability rating: UL94V-2. Maximum operating temperature: 185°F/85°C.

IDXPERT HAND-HELD LABELER KITS AND ACCESSORIES

RoHS Compliant Available

BRADY.

Keyboard Layout

General Identification

Electrical Panel Identifcation

- Produces 300 dpi thermal transfer printing that stays crisp and bright
- Creates a wide variety of labels: self-lams, sleeves, continuous tapes and more
- Choose from assorted label materials up to 1.5″ wide
- Prints characters up to 1.25″
- 82 built-in symbols plus barcodes
- Quick-loading "Smart Cartridge" auto-senses label type and size
- Intuitive user interface for easy access to complex functions
- Memory stores frequently used set-ups
- Larger, more informative display
- Ergonomic design fits comfortable in hand

Patch Panel Identification

IDXPERT™ portable, hand-held labelers offer two printer keyboard layouts with identical functionality and supplies. Delivers edge-to-edge label printing to reduce materials expenses. Tough, drop-tested construction and easy-to-see bright yellow color make these labelers ideal for the field. Quick-loading label cartridges make switching jobs really fast. Choose from several label materials in a variety of sizes and colors; *ordered separately from table below.* Perfect for a variety of applications including wire and cable marking, terminal block marking, patch panel, outlet and faceplate marking, electrical component marking and for racks, data centers, labs and general industrial identification.

IDXPERT™ LABELER KITS

IDXPERT™ labeler kits include hardside carrying case, serial communications cable for upgrades only, one 1.5″ x 30′ continuous tape label cartridge and product CD-rom.

BMP41-KIT-VD DataComm Starter Kit

- Ergonomic design fits comfortably in user's hand
- Built tough — drop-tested and environment resistant
- Easy-to-see case with impact-resistant rubber bumpers
- Large informative LCD display with backlight provides clear visibility
- Produces clear 300dpi thermal transfer printing that stays legible
- Print speed of 1.3" per second
- QWERTY keypad, graphics library, hot keys and menu functions make label design simple
- Easy-to-use WYSIWYG functionality — design shown in printer display is what you get on label
- 4 to 103 point font sizes with autosizing
- 445 built-in symbols and barcodes, additional via software
- 48MB memory stores up to 25000 labels
- Quick, easy-to-load, drop-in label cartridges with already matched ribbon
- Long life rechargeable battery delivers power to print anywhere
- Prints up to 300 labels per day for high volume printing
- Prints true-sized 1" wide identification to maximize amount of data on label
- Prints on a wide variety of label materials including nylon cloth, self-laminating vinyl and heat-shrink sleeves
- Prints on die-cut and continuous length materials
- Two-year manufacturer's warranty

BMP®41 hand-held, portable label printer is an affordable, easy-to-use, quick-to-print, must-have labeling tool that's built tough for the field. It can print up to 300 labels per day, including die-cut or continuous labels up to 1" wide. This rugged device withstands harsh conditions to get the job done where you need it. It is built with additional protection to survive falls of up to six feet high. With an ergonomic design, long rechargeable battery life and easy-to-use features, this printer is engineered for the worker on-the-go. Lightweight, only 2.85 lbs. Dimensions: 10.3" H x 6" W x 3.6" D. Choice of two starter kits — Electrical or DataComm — everything needed to start making quality, professional-looking labels. *Order additional* **M series** *labeling cartridges in an array of types, sizes, materials, and colors separately on pages 1286-1287.*

BMP®41 ELECTRICAL STARTER KIT

Mfg. part no. BMP41-KIT-EL Electrical starter kit includes: BMP®41 label printer, rechargeable battery pack, USB cable assembly, AC adapter, hard-side storage case, M-143-427 1" black on white self-laminating vinyl wire marker cartridge (200 ea.), **M-48-498** 1" black on white vinyl cloth wraparound wire marker cartridge (180 ea.), **M-187-075-342** 0.75" black on white PermaSleeve® heat-shrink wire marking sleeve cartridge (80 ea.), **MC1-1000-595-OR-BK** 1" black on orange vinyl tape cartridge (25'L), two **MC1-1000-595-WT-BK** 1" black on white vinyl tape cartridges (25'L), product CD, Brady printer drivers CD and quick start guide.

BMP®51 AND BMP®53 LABEL MAKER PORTABLE PRINTERS AND ACCESSORIES

RoHS Compliant Available

BRADY.

BMP-51 Label Maker

75447314708 BMP-53 Label Maker with AC Adaptor

Self-Laminating Cable Markers

Cable Flags

Patch Panel

Barcodes

General I.D.

Quick and Easy Label Design

- Prints FAST — 1" per second
- Produces clear 300dpi thermal transfer printing
- Multiple line printing, serialization and barcodes
- Built-in label apps for fast, easy label design
- Built-in Bluetooth® or optional Wi-Fi and Ethernet cards for wireless printing from a network
- USB PC connectivity with Label Mark™ 5 label design and printing software compatibility
- Durable built-in cutter that retains label after it's cut until needed
- Automatic label formatting and label material recognition
- Prints on a variety of continuous and die-cut materials
- Prints labels up to 1.5" wide or continuous labels up to 40" long
- 3 battery power options: AA batteries, AC adaptor or rechargeable Li-Ion battery

Hassle-Free Printer Cartridges

- Ribbon and label materials in ONE easy-to-load cartridge
- "No jam" technology so cartridges snap easily into place
- Worry-free printing -- always the right ribbon for the material
- Wide variety of tough, durable label materials that won't fade, smear or fall off

Wireless Printing Capabilities

- Brady Network Card with Bluetooth® technology comes standard with printer
- Create, edit, print and save labels with an Android® phone using FREE Brady Mobile apps
- Optional Wi-Fi and/or Ethernet cards allow user to connect to a network

BMP®51 Label Maker has all the latest features for portable printing on the go: QWERTY keyboard, large graphical display screen with backlight, easy-to-use label design apps, fast print speed, extensive connectivity, networking options, and much more. It offers built-in Bluetooth® technology or an optional Wi-Fi or Ethernet card, which means you can print wirelessly to this printer from a computer or Android phone. **BMP®53** Label Maker has many of the same features as the BMP®51 Label Maker, minus the display screen and keyboard. It uses the same label cartridges to create labels with LabelMark™ software from a PC or by using a Brady Mobile App on a smart phone.

BMP®51 AND BMP®53 LABEL MAKER PRINTERS

All Label Maker printers come with hard-sided carrying case, battery tray for AA batteries, USB cable, drivers CD, product CD, Quick Start guide, and one **mfg. part no. MC-1500-595-WT-BK** label cartridge. Select from a wide assortment of printer starter kits, printer accessories, and labeling cartridges in an array of different materials to meet every printing need; *order separately below.*

BMP71 THERMAL TRANSFER LABEL PRINTER AND ACCESSORIES

RoHS Compliant Available

BRADY.

One Smart, Fast Printer That Does It All

- Produces 300 dpi thermal transfer printing that stays crisp and clear
- Choose from assorted label materials including self-laminating, raised panel labels and PermaSleeve™ heat-shrink sleeves, and more
- Large 3.5" full-color graphical LCD display with on screen indicators
- Easy to operate QWERTY style keypad layout
- Fast — print speed of 1.5" per second
- Prints on over 400 continuous and die-cut label materials
- Prints labels up to 2" wide on continuous label materials
- Prints characters from 4pt to 174pt (scalable)
- Built-in label design wizards, bar code symbologies, serialization,and graphics
- 200mb memory — storage space for over 100,000 label files
- Quick-loading label and continuous tape rolls
- Built-in touch cell in labels and ribbons allows printer to automatically format label
- Stand alone and PC compatible
- Rechargeable NiMH battery pack or AC powered
- Portable with convenient large carrying handle

BMP™71 portable, industrial thermal transfer label printer is perfect for a variety of applications including wire and cable marking, electrical component marking, PCB labeling, data communications labeling, facility, safety and maintenance identification, general and industrial labeling, health care identification, lab identification, panel identification and security identification. **Mfg. part no. BMP71-QC** includes BMP™71 label printer, quick charger, hard-sided storage/carrying case, NiMH rechargeable battery pack, battery charger/AC power supply, roll of M71-31-423 BradyBondz™ polyester labels (1.5" W x 1" H), M71-R6000 black high-density ribbon cartridge, cleaning strip, USB cable, CD (contains user's manual, print driver and tutorial) and Quick Start guide. Choose from several label materials in a variety of sizes and colors; *order separately below. Order Brady LabelMark® label design and MarkWare Express® sign and label design software separately; go online or call.* Size: 12"L x 9.5"W x 4.5"H. Manufacturer's 12-month warranty.

BMP™71 SELF-LAMINATING LABELS

Self-laminating vinyl labels have a matte finish and provide a white printable zone with a protective, translucent overlaminating area and permanent acrylic adhesive. Offers excellent abrasion, smudge, water and oil resistance. Material has good clarity, conformability and is self-extinguishing. Ideal for panel identification and wire and cable marking applications.

IP THERMAL TRANSFER PRINTER

RoHS Compliant Available

BRADY.

Smart Cell Technology
- Printer, materials and ribbon communicate with each other making printing fast and hassle-free

Intelligence by Design
- No more calibration for notched, gapped or continuous material
- Center justified material guides keep print image consistent
- Easy loading with straight feed path

Intuitive LCD Display
- Correct material and ribbon match displayed
- Sensor position visually shown
- Monitors material and ribbon usage
- Intelligent troubleshooting with corrective action

Ready for Work
- 300dpi or 600dpi models
- Lightweight, compact design with convenient flip top
- USB, serial and Ethernet 10/100 connectivity

IP™ thermal transfer printer, material and software system is fully integrated and easy-to-use. The system offers material and ribbon recognition monitored on an LCD display, automatic formatting and user-friendly printer features. Material information is sent to the software, where template and settings are automatically populated. The user simply creates data on template, then clicks and prints. These high-performance printers come complete with power cord, USB cable, ribbon centering take-up spindle, printed Quick-Start manual, product CD including: Windows® printer driver, electronic Quick-Start manual, Brady IP™ Printer Operator/Configuration manual and web links, software demo CD, and printer cleaning film. Both models accept a variety of Brady **THT** and **THTEP** labels, **B-593 series** raised panel labels, specialty die-cut labels, sleeves and tags, **4300, 6000** and **6100 series** IP-R thermal transfer ribbons, and LabelMark™ labeling software; *go online or call.*

LABELING SUPPLIES FOR KROY DURATYPE 240 AND 244 LABEL PRINTERS

RoHS Compliant Available

KROY®

Labeling Tape Cartridge — Shrink Tubing Reels — Resin Printer Ribbons

Select from a variety of labeling supplies, cartridges and ribbons for Kroy DuraType **240** and **244** printers including general-purpose tape cartridges and industrial tape cartridges. Specialty labels include self-laminateing wire wrap to professionally mark wire and cable, and shrink tubing. Other colors, sizes, and types are available; *go online or call.*

GENERAL-PURPOSE LAMINATED POLYESTER LABELING TAPE CARTRIDGES

2.0-mil polyester with thermal transfer ribbon and over-laminating film contained in an easy load, snap in cartridge for the **240SE** and **244RS** printers. Suitable for most general-purpose labelling applications. Chemical and water resistant.

SHRINK TUBING REELS

Premium heat-shrink tube labeling comes on a continuous 100′ reel to provide a cost-effective method for marking and identifiying shrink tubing, wire and cable. Ultra-thin wall, cadmium-free polyolefin tubing with a low recovery temperature of 194°F and a shrink ratio of 3:1. Tubing is flame-, temperature-, chemical-, water- and abrasion-resistant. Meets MIL-I 23053/5 Class 1 and 3, MIL-I R 46846 Type V specifications and UL-224VW-I rating. **Sold in reels of 100′.**

WIRE IDENTIFICATION & MARKING SYSTEMS

LS8E SERIES PANTHER HAND-HELD THERMAL TRANSFER PRINTERS AND ACCESSORIES

RoHS Compliant Available

PANDUIT®

- **LS8EQ** models with innovative QWERTY keypad for improved productivity
- Cut-to-length functionality eliminates label waste
- Partial cut feature provides tear-apart strips of labels
- Fast-loading label cassette includes both labels and ribbon
- Large graphic display with backlight for improved visibility
- Compact, rugged and easy-to-use on site

LS8EQ with QWERTY Keypad LS8E

LS8E series PanTher™ hand-held, thermal transfer printers print self-laminating labels, heat-shrink labels, flag labels, marker plates,continuous tapes and die-cut labels for wire and cable, patch panels, faceplates and other network applications. The fast-loading P1™ label cassettes contain an integrated memory device for automatic formatting, recalling last legend used and number of labels remaining in cassette . Select the printer that best fits your needs. *Order additional printer accessories separately below.* An assortment of P1™ label cassettes are available; *go online or call.*

LS8EQ PANTHER™ HAND-HELD THERMAL TRANSFER PRINTER

LS8EQ PanTher™ printer includes an innovative QWERTY style keypad for faster text entry and label design for enhanced productivity.

TDP43ME THERMAL TRANSFER DESKTOP PRINTER

RoHS Compliant Available

PANDUIT®

Mfg. part no. TDP43ME 300 dpi thermal transfer desktop printer creates crisp, clear legends with superior legibility at speeds up to 4″ per second. Compact, lightweight design enables use in office or remote locations. Use to print a wide variety of self-laminating labels, component labels, non-laminated labels, heat-shrink labels, marker plates and continuous tapes up to 4.25″ wide. This thermal transfer printer comes complete with Panduit's Easy-Mark™ labeling software, **RMEH4BL** hybrid black printer ribbon, AC power adapter with U.S. power cord, USB cable, user manual, Quick-Start card, and driver disk. Can also be used with Panduit's Pan-Mark® 2.5 for Windows® labeling software, *order separately; go online or call.* Easy-loading hybrid and resin printer ribbons are available; *order separately on this page.*

SELF-LAMINATING LABEL CASSETTES

RoHS Compliant Available

PANDUIT®

- Vinyl label material and ribbon in one cassette
- Fast loading makes changing labels easy
- For hand-held thermal transfer printers
- Offers crisp, clear legends with superior legibility
- Clear overlaminate protects label for clear, permanent identification

P1™ self-laminating vinyl label cassette includes both label and ribbon. Ideal for wire and cable identification, these adhesive-backed labels feature a white print-on area and clear, protective overlaminate. Designed for use with Panduit's **LS8E series** hand-held thermal transfer printer; ordered separately *on this page.* Ribbon and label color: black on white.

HEAT-SHRINK LABEL CASSETTES

RoHS Compliant Available

PANDUIT®

- Heat-shrinkable label material and ribbon in one cassette
- 3:1 shrink ratio
- Fast loading makes changing labels easy
- For hand-held thermal transfer printers

P1™ heat-shrink label cassettes are ideal for cable and wire identification. Die- cut, flattened, Mil-grade polyolefin heat-shrink labels feature a crisp, clear white printable area for superior legibility. Meets MIL-M-81531, MIL-STD-202F Method 215A, Solution A, C, D print performance requirements. Meets UL Standard 224 for flammability. Temperature rating: -67°F to 275°F (-55°C to 135°C). Color: white print-on area, black ribbon. Designed for use with Panduit's **LS8E series** hand-held thermal transfer printers; *ordered separately on page 1292*.

RAYCHEM CM-NMX SERIES PRINTABLE, MILITARY-GRADE TIE-ON CABLE MARKERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Extremely lightweight
- Ultimate tensile strength and tear resistance — 25N/mm (min.)
- Flame-resistant
- Excellent solvent resistance
- Meets MIL-STD-202, Method 215K for fluid resistance
- Thermal transfer printable — meets SAE-AS-5942 for print permanence
- Easily attached using cable ties

CM-NMX series printable, military-grade tie-on cable markers identify wire and cable bundles, hose and pipe, and conduit in a variety of applications, such as industrial, energy, aerospace and defense industries where light weight and resistance to harsh environments are important. Ideal for post termination assembly, as well as, retrofit and repair capability. Four pre-cut holes allow for easy attachment to cable or wire bundles using cable ties. Compatible with the latest, economical thermal-transfer printable technology for faster printing and sharper print resolutions. Meets requirements of DMS 2325, DMS 2409, ASTM-G-154-26, ASTM-D-570, ASTM-D-568. Constructed of highly-durable and flame-resistant meta-aramid material. Colors: white and yellow. *Order cable ties separately; go online or call.* **Sold in rolls of 2500 markers.**

Mfg. Part No.	Color	Printable Height (mm)	Printable Length (mm)	Stock No.	Price per Roll Each

RAYCHEM CM-SCE SERIES POLYOLEFIN TIE-ON CABLE MARKER TAGS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Side-entry provides access to big size wire bundles as well as retrofit and repair capability
- Highly flame-retardant
- Highly resistant to abrasion, mechanical abuses, fluids, lubricants and solvents
- Standard cable tie-wraps install markers
- Excellent print permanence when printing on the rough side of marker

CM-SCE series polyolefin tie-on cable marker tags are flat, rigid, non-adhesive labels that can be used to identify large cable and wire bundles in environments such as military and aerospace. Marker tags feature 4 tie-wrap holes and are easily applied to cable or wire bundles with standard cable ties. Print performance meets or exceeds the requirements of SAE AS81531 4.6.2 and MIL-STD-202F, Method 215J. Operating temperature range: -55°C to +135°C. Color: white. **Sold in rolls of 250 tags.**

Mfg. Part No.	Label Size (in.)	Markable Height (in.)	Markable Length (in)	Stock No.	Price per Roll 1-2

200 IDENT THERMAL TRANSFER PRINTER AND ACCESSORIES

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:
- Lightweight, portable — only 4kg (8.82 lbs)
- Automatic calibration
- Simple ribbon and media loading procedure
- Superior print position accuracy
- Cutter and perforator option; *available separately below*
- Touch screen
- Full DHCP (Dynamic Host Configuration Protocol)
- USB 2.0 (full speed)
- USB master ports on the front and back of printer
- LAN 10/100 Base (Ethernet) connection

Specifications:
- Printing speeds: 30, 40, 50, 75, 100, 125mm/s (recommended 50mm/s)
- Print width:108mm (4.25") max.
- Label width: 10 to 116mm (backing paper width)
- Label height: 6 to 1000mm
- Printer dimensions: 253mmW x 322mmD x 189mmH
- Rated: 100V to 240V; 50/60Hz, 45W typical / 100W max.
- Power save mode: 1.8W
- RAM 64MB, Memory IFFS flash 16MB
- Operating system: Windows™ XP
- Operating temperature range: 5°C to 40°C (40°F to 104°F)
- Operating humidity: 25% to 85% non-condensing RH
- UL listed, CE compliant, FCC Class A, CB, CCC (China Compulsory Certification), GOST

Applications:
- For TE identification marker sleeves, cable markers, and labels
- Ideal low volume printing

T200 Ident thermal transfer printer with 300dpi print head is the perfect solution for cable identification plus a whole range of basic labeling printing applications. The increased accuracy and added flexibility of a movable media sensor extends the variety of products approved for this portable printer while reducing the number of misprints. Touch screen provides an easier user interface for set-up and enhances the user experience. Printer includes parallel communications cable, power supply, print head cleaning pen and CD ROM user guide. Designed to print on a wide range of TE Connectivity identification marker sleeves, cable markers, and labels. *Order* **WinTotal 5** or ***PEP-5*** (Express, Pro, Suite) *wire identification and basic labeling printing software separately; go online or call.*

RAYCHEM RPS SERIES COMMERCIAL-GRADE HEAT-SHRINKABLE WIRE IDENTIFICATION SLEEVES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Permanent identification sleeves
- Computer-printable
- Excellent print performance
- Configured for ease of kitting
- Good chemical and solvent resistance
- 3:1 shrink ratio

RPS series commercial-grade heat-shrinkable marker sleeves are designed to meet commercial and industrial wire and cable identification needs. Made from durable, heat-shrinkable polyolefin. Meets the performance requirements of SAE-AMS-DTL-23053/5 classes 1 and 3 and SAE AS81531 4.6.2, MIL-STD-202F Method 215J specifications. A standard heat gun with reflector is used to shrink the sleeves onto the wire or cable. Operating temperature range: -30°C to +105°C. UL recognized (Standard 224, file E35586), CSA certified (file 31929).

RAYCHEM TMS-SCE SERIES MILITARY-GRADE HEAT-SHRINKABLE WIRE IDENTIFICATION SLEEVES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Permanent identification sleeves
- Computer-printable
- Lightweight for aerospace applications
- Military specification material and print performance
- 3:1 shrink ratio
- VW all flame tubing test rated
- Quick recovery for heat-sensitive areas

TMS-SCE series military-grade heat-shrinkable marker sleeves are made from durable, flame-retardant, radiation cross-linked polyolefin. Printable by dot matrix or thermal transfer printers, the marks are permanent immediately after printing and remain legible even when exposed to abrasion, aggressive cleaning solvents, and military fuels and oils. The sleeves meet the mark permanence requirements of SAE-AMS-DTL-23053/5 classes 1 and 3, as well as SAE AS81531 4.6.2 and MIL-STD-202F both before and after shrinking. Operating temperature range: -55°C to +135°C. UL recognized (Standard 224, file E35586), CSA certified (file 31929).

T312M

Mfg. part no. T312M robust, computer-driven thermal transfer printer is specially designed to produce high-quality alpha/numeric text, graphic images, barcodes and 2D Data Matrix marks for UID applications using PrintEasy label design and printing software; *ordered separately, go online or call.* Ideal for use with TE/Raychem's range of thermal transfer printable label products; *order separately on pages 1284 and 1294.* Rugged and durable metal construction makes this printer suitable for demanding industrial and commercial environments. Features a 4.1" printhead and print speeds of 8" per second. Enhanced memory and 32 bit processor provide fast data processing and print speeds. *Order printer ribbons separately below.*

4304H AND 4301H1/5 SERIES T-1 ¾ SUPER BRITE LED LAMPS

RoHS Compliant Available

Chicago Miniature Lighting, LLC
Lighting the world since 1910

LED lamps with 5mm T-1¾ Super Brite LEDs. **4304 series** lamps feature high-intensity light output, wide viewing angle and diffused package type. **Mfg. Part No. 4301H1/5** features red and green in the same two-lead package. Chips are brightness-matched for uniform red and green light output. Continuous forward current: 25mA max.

CREE 5mm ROUND, HIGH BRIGHTNESS LEDs

RoHS Compliant Available

CREE

Applications:
- Advertising signs
- Indicators
- Traffic Lights
- Automotive Lighting

These round LED families offer superior light output for excellent readability in outdoor applications. The lamps are made with an advanced optical-grade epoxy that offers superior high-temperature and high-moisture resistance performance in outdoor sign and signal applications. The encapsulation resin contains UV inhibitors to minimize the effects of long-term exposure to direct sunlight, resulting in stable light output over the life of the LED.

521 SERIES 3mm DIAMETER LEDs

RoHS Compliant Available

Dialight

3mm subminiature LED lamps are ideal where space is limited. Diffused lens available in green, yellow, red, orange and bicolors red/green, yellow/green. Single LEDs provide multiple colors. Use low-current (2mA) where power is limited. Viewing angle ±30°. Snap mount Clip: 515-0006F.

THROUGH-HOLE LEDS

521 SERIES 5mm DIAMETER LEDs

RoHS Compliant Available

Dialight

5mm diameter LED lamps available in diffused, non-diffused and water-clear high-brightness lens. Two and three-leaded bicolors, resistor for 5V operation and 2 x 7mm rectangular LEDs also available. Viewing angle ±30°.

20mm 6-CHIP JUMBO LED DOME

RoHS Compliant Available

LUMEX — Creating LED and LCD Solutions Together™

Features:
- State-of-the-Art, High Brightness Chip Technology
- Easy-to-Solder Leads, Tin Finish
- Available Bulk or on Tape and Reel
- Custom Shapes/Easily/Tooled/Low Minimum
- PCB with Chips on the Board Construction
- With Internal Resistor for 5V and 12V Operations

Applications:
- Board or Panel Indication or Illumination
- Backlighting of Overlays and Graphics
- Annunciator and Control Panels
- Telecom Switches and Central Station Equipment
- Large Panel Indicators

HI-RELIABILITY VISIBLE LEDs

RoHS Compliant Available — TT electronics, OPTEK Technology

Features:
- Hermetically sealed TO-46 package
- Choice of blue, green, red or yellow
- High-brightness with well-defined spatial radiation patterns
- ESD protection built in

"Hi-Reliability" Visible LEDs function in the abnormally severe levels of mechanical, environmental and electrical stress that are typical of military and harsh industrial applications.

LEDS SCREENED AND QCI PROGRAM-PATTERNED AFTER MIL-PRF-19500

ALMD SERIES HIGH BRIGHTNESS SMT ROUND LEDs

RoHS Compliant Available

AVAGO TECHNOLOGIES

Features:
- Compact form factor
- High brightness material
- Jedec MSL 2A
- Compatible with industrial reflow soldering process
- Typical Viewing angle: 30°
- Tinted, non-diffused

The new Avago **ALMD-xx3D** LED series has the same or just slightly less luminous intensity than conventional high brightness, through-hole LEDs. The LEDs are made with an advanced optical grade epoxy for superior performance in outdoor sign applications.

Mfg. Part No.	LED Color	Luminous Intensity (cd)	Forward Voltage @ 20mA (V)	IF	Wavelength (nm)	Stock No.	Price Each

LUMEX TitanBrite™ HIGH POWER LEDs

RoHS Compliant Available

LUMEX — Creating LED and LCD Solutions Together™

Features:
- Offers high intensity light of up to 58, 210 and 300 lumens respectively
- Provides thermal resistance as low as 7°C/Watt
- 2-Watt version is available in yellow (591 nm typ) and red (623 nm typ)
- 3-Watt and 5-Watt are offered in blue (465 nm typ), warm white (2700K), and cool white (6000K) with red, green and yellow versions available at no additional cost

Applications:
- Appliances
- Automotive
- Communications equipment
- Industrial controls
- Life safety equipment
- Medical equipment
- Meter displays
- Military applications
- Security electronics
- Test and measurement

CMD15-21 AND 22 SERIES (1206 & 1210) SURFACE MOUNT LEDS

RoHS Compliant Available

Chicago Miniature Lighting, LLC — *Lighting the world since 1910*

SMD

The **CMD15 series** surface mount LEDs are designed to permit easy post-reflow solder joint inspection. All types have clear lenses and viewing angle of 140° except **mfg. part nos. CMD15-21VRD, VGD,** and **VYD** which are diffused and have viewing angle of 160°. Average forward current: 30ma except for Green which is 25ma. Reverse voltage (@ I_R = 100μA) = 5.0V. **Also available in tape on reel for high-speed insertion.**

597 SERIES SURFACE MOUNT LEDs

RoHS Compliant Available

Dialight

Mfg. Part Nos. 597-3xx1-1xxF

Mfg. Part Nos. 597-3xx1-5xxF

Mfg. Part Nos. 597-3xxx-4xxF

Mfg. Part Nos. 597-77x1-5xxF

Compatible with automatic placement equipment and infrared reflow processes. Meet EIA-481-1 standard. Help to eliminate mixed technology PC board processing. Compatible with Dialight's Optopipe™ series light pipes. **Sold individually on 8mm tape except packages of 20 pieces.** Suffix **xx2F** in mfg. part nos. = Cut Tape; suffix **xx7F** = full reel quantities of 2000.

598 SERIES MICRO LED® SMD LEDs

RoHS Compliant Available

Dialight

0603 1208 1210

The *598 Series* of microLED® SMD LEDs is comprised of 10 different package styles incorporating the most popular color combinations. Single color, bi-color, tri-color and right angle package styles are available. Common wavelengths are available in various package styles to maintain color consistency.
All *598 Series* LEDs are RoHS compliant and many colors offered conform to the ANSI/VITA 40 standard regarding status indication. The *598 Series* is available in both small quantities and tape and reel.

POWER MINI SMD LED

RoHS Compliant Available

VISHAY.

Features:

- Utilizing latest advanced AlInGaP technology
- Luminous intensity and color categorized per packing unit
- Luminous intensity ratio per packing unit Ivmax./Ivmin. ≤1.6
- ESD-withstand voltage: up to 2 kV according to JESD22-A114-B
- Preconditioning: acc. to JEDEC level 2a
- IR reflow soldering
- Compliant to RoHS Directive 2002/95/EC and in accordance to WEEE 2002/96/EC
- AEC-Q101 qualified

The new **MiniLED series** has been designed in a small white SMT package. The feature of the device is the very small package 2.3 mm x 1.3 mm x 1.4 mm. The **MiniLED** is an obvious solution for small-scale, high-power products that are expected to work reliability in an arduous environment. This is often the case in automotive and industrial application.

SUPER THIN ChipLEDS

RoHS Compliant Available

VISHAY.

Features:

- Super thin ChipLED with exceptional brightness 1.6 mm x 0.8 mm x 0.8 mm (L x W x H)
- High reliability PCB based
- Temperature range - 55 °C to + 85 °C
- Wavelength (465 to 475) nm (blue), typ. 525 nm (true green), typ. 571 nm (yellow green), (584.5 to 597) nm (yellow), typ. 605 nm (soft orange), typ. 631 nm (super red)
- InGaN blue available with protection diode, device type VLMB1310 with HBM 8000 V
- AlInGaP and InGaN technology
- Viewing angle: extremely wide 130°
- Grouping parameter: luminous intensity, wavelength, VF
- Available in 8 mm tape on 7" diameter reel
- Compatible to IR reflow soldering
- Compliant to RoHS Directive 2002/95/EC and in accordance to WEEE 2002/96/EC
- Preconditioning: according to JEDEC level 2a

The new **ChipLED** series have been designed in the smallest SMD package. This innovative ChipLED technology opens the way to smaller products of higher performance, more design in flexibility, enhanced applications
The 0603 LED is an obvious solution for small-scale, high brightness products that are expected to work reliably in an arduous environment.

Little Star® 1W POWER SMD LED

RoHS Compliant Available

VISHAY.

Features:

- Super high brightness surface mount LED
- High flux output; up to 113 lm
- 120° viewing angle
- Compact package outline (L x W x H) in mm: 6.0 x 6.0 x 1.5
- Ultra low height profile - 1.5 mm
- Designed for high current drive; up to 350 mA
- Low thermal resistance; RthJP = 10 K/W
- Qualified according to JEDEC moisture sensitivity level 2a
- Compatible with IR reflow soldering
- Little Star® are class 1M LED products. Do not view directly with optical instrument
- Compliant to RoHS Directive 2002/95/EC and in accordance to WEEE 2002/96/EC
- ESD-withstand voltage: up to 2 kV according to JESD22-A114-B

The **VLMW712U2U3XV**, **VLMW712T3U3US**, and **VLMW712T2T3QN** use new nitride phosphor system display negligible color shift across operation temperature range. With its extremely high level of brightness and the ultra low high profile, which is only 1.5 mm are highly suitable for both conventional lighting and specialized application such as automotive signal lights, traffic lights, channel lights, tube lights and garden lights among others.

LED EMITTERS & ARRAYS

MULTI-COLOR SURFACE MOUNT LEDS

RoHS Compliant Available

TT electronics
OPTEK Technology
NEW

- Full color RGB
- Luminous intensity: Red = 105mcd, Green = 330mcd, Blue = 200mcd
- Wavelength: Red = 625nm, Green = 530nm, Blue = 475nm
- Compatible with automatic placement equipment
- Compatible with infrared and vapor phase reflow solder process

Applications:
- Automotive backlighting for dashboard and switches
- Telecommunications (backlighting for telephones and faxes)

The OVSRRGBCC3TM is compact full color in a miniature surface mount package with a 150° viewing angle. This 1204 package provides top emitting mounting. The device can be used on smaller boards with a higher packing density and is ideal for handheld applications.

CREE PLCC4 SMD LEDs CLA1B SERIES

RoHS Compliant Available

CREE

Features:
- Size (mm):3.2 x 2.8
- Typical CRI for Cool White is 75
- Typical CRI for Warm White is 80
- Viewing angle: 120 degree

The CLA1B is packaged in an industry standard footprint with an improved package to provide high reliability & performance. They are designed to work under a wide range of environmental conditions. The wide viewing-angle makes these LEDs ideally suited for linear lighting, panel lighting and general illumination applications.

1W POWER LED LIGHT SOURCE

RoHS Compliant Available

AVAGO TECHNOLOGIES

Features:
- Energy Efficient
- Exposed Pad for Excellent Heat Transfer
- Suitable for SMT Process
- High Current Operation
- Long Operating Life
- Wide Viewing Angle
- Silicone Encapsulation
- InGaN Technology
- 120° Viewing Angle

ASMT-Ax00

Applications:
- Portable (Flashlight, Bicycle Headlight)
- Reading Light
- Architectural Lighting
- Garden Lighting
- Decorative Lighting

1W Power LED Light Source is a high performance energy efficient device which can handle high thermal and high driving current. The low profile package and exposed pad design has excellent heat transfer from the package to the motherboard. Compatible with SMT reflow soldering process and manual soldering.

LED EMITTERS & ARRAYS

1W MOONSTONE POWER LED

RoHS Compliant Available

AVAGO TECHNOLOGIES

Applications:
- Portable lighting – flash light, bicycle headlight & miner light
- Safety / security lighting – exit and emergency sign light
- Task lighting – reading light, spot light, track light
- General lighting – street lighting, interior lighting
- Decorative lighting – cove lighting, contour lighting and garden lighting
- Billboard backlighting – sign backlighting

Avago's **Moonstone™** high-power LED-family has the widest high power offering on the same platform (0.5W, 1W, and 3W). The industry-proven power transistor package grants a robust and reliable performance. The exposed pad design has excellent heat transfer from the package to the motherboard.
The advanced 3x1Watt **RGB Moonstone™** package delivers typ.108lumens at 350mA. The selection of the Red, Green, and Blue dies helps to achieve a high flux (typ. 90 lumen) D65 white color point and a wide color gamut. The robust package design makes it an excellent choice for color mixing applications.

Mfg. Part No.	Color	IF (mA)	Lumin. Flux (lm)	View. Angle (°)	Stock No.	Price Each 1-9

1WATT HIGH-POWER AstraLEDs®

RoHS Compliant Available

LUMEX Creating LED and LCD Solutions Together™

Features:
- Delivers a total flux level of up to 30lm with power input of 350mA
- Designed for use with automatic surface-mount soldering processes
- Available with two different lens shapes for maximum viewing angle
- Extended metal backplanes to allow efficient heat transfer to the PCB or other mounting surface

Applications:
- Appliances
- Automotive
- Communications equipment
- Industrial controls
- Life safety equipment
- Medical equipment
- Meter displays
- Military applications
- Security electronics
- Test and measurement

Mfg. Part No.	Emitted Color	Wave-length (nm)	V_F Typ. (V)	I_F Typ. (mA)	Lumin. Flux (lm)	Viewing Angle (°)	Stock No.	Price Each 1-9

3W POWER LED LIGHT SOURCE

RoHS Compliant Available

AVAGO TECHNOLOGIES

Features:
- Available in Red, Red Orange, Amber, Blue, Royal Blue, Cool White, Neutral White and Warm White color
- Energy efficient
- Exposed metal slug for excellent heat transfer
- Compatible with reflow soldering process
- High current operation
- Long operation life
- Wide viewing angle at 140°
- Silicone encapsulation
- Non-ESD sensitive (threshold > 16 kV)
- MSL 2a products

Applications:
- Architectural lighting
- Channel backlighting
- Contour lighting
- Retail Display lighting
- Decorative lighting
- Garden lighting
- Safety, exit and emergency signs lighting
- Specialty lighting
- Task lighting

This 3W Power LED Light Source is a high performance energy efficient device which can handle high thermal and high driving current. The exposed pad design enables excellent heat transfer from the package to the motherboard.

3W MINI POWER LED LIGHT SOURCE

RoHS Compliant Available

AVAGO TECHNOLOGIES

Features:
- Small footprint and low profile
- Symmetrical outline
- Energy efficient
- Direct heat transfer from metal slug to mother board
- Compatible with reflow soldering process
- High current operation
- Long operation life
- Wide viewing angle
- Silicone encapsulation
- Non-ESD sensitive (threshold > 16kV)
- MSL 1 products

Applications:
- Sign backlight
- Safety, exit and emergency sign lightings
- Specialty lighting such as task lighting and reading lights
- Commercial lighting
- Accent or marker lightings, strip or step lightings
- Portable lightings, bicycle head lamp, torch lights.
- Decorative lighting
- Architectural lighting
- Street lighting
- Tunnel lighting

The 3W Mini Power LED Light Source is a high performance energy efficient device which can handle high thermal and high driving current.

LZ1 HIGH LUMINOUS EFFICACY LED EMITTERS

RoHS Compliant Available

LED ENGIN BRIGHT LIGHT. TINY PACKAGE.

Applications:
- Indoor and outdoor Architectural Lighting
- Stage and Entertainment Lighting
- Backlighting
- Traffic and signal Lights
- Full Color Displays
- Projectors
- Emergency Lighting
- Medical
- Automotive

Color LEDs - SMT

White LEDs - SMT

Features:
- Ultra-small foot print – 4.4mm x 4.4mm x 3.1mm
- Surface mount ceramic package with integrated glass lens
- Very high Luminous Flux density
- New industry standard for Lumen Maintenance (>90% at 100,000 Hours)
- JEDEC Level 2 for Moisture Sensitivity Level
- Autoclave compliant (JEDEC JESD22-A102-C)
- Lead (Pb) free and RoHS compliant
- Reflow solderable (up to 6 cycles)

LZ4 HIGH LUMINOUS EFFICACY LED EMITTERS

RoHS Compliant Available

LED ENGIN BRIGHT LIGHT. TINY PACKAGE.

Features:
- Ultra-small foot print – 7.0mm x 7.0mm x 4.1mm
- Very low Thermal Resistance (3°C/W)
- Individually addressable die
- Very high Luminous Flux density
- New industry standard for Lumen Maintenance (>90% at 100,000 Hours)
- JEDEC Level 2 for Moisture Sensitivity Level
- Autoclave compliant (JEDEC JESD22-A102-C)
- Lead (Pb) free and RoHS compliant
- Reflow solderable (up to 6 cycles)

Applications:
- Emergency vehicle lighting
- Strobe and warning lights
- Marine and buoy lighting
- Aviation and obstruction lighting
- Roadway beacons and traffic signaling
- Architectural lighting
- Stage and studio lighting
- Landscape lighting
- Automotive signal and marker lights

ES RECTANGLE ARRAY SERIES

RoHS Compliant Available

BRIDGELUX
The Magic of Light™

Features:
- Delivers between 400 and 2000 "hot" lumens
- Compact high flux density light source
- High quality uniform illumination without pixilation
- Industry's lowest thermal resistance
- Plug and play solution enables rapid design integration
- More energy efficient than incandescent, halogen and fluorescent lamps
- Long operating life and reduced operating costs

The Bridgelux ES Array Series enables lamp and luminaire manufacturers to cost effectively meet rapidly increasing global regulatory standards for general lighting such as Energy Star, Title 24, Part L and others. These new arrays are 30-60% more energy efficient than previous product generations while dramatically reducing the price per lumen. The series delivers between 400 and 2000 "hot" lumens (lumens under normal operating conditions) in a compact high flux density light source, enabling the replacement of incandescent, halogen and fluorescent conventional light sources.

LED ARRAY HOLDERS FOR BRIDGELUX ES & RS ARRAYS

RoHS Compliant Available

molex

ES LED Holder Without Cover

ES LED Holder With Cover

RS LED Holder

Features:
- Compression contacts to power array
- Double-ended wire-trap terminal to attach power source
- Screw-mount attachment method for securing array to heat sink
- Snap-lock feature allows for attaching an optic or clear protective cover
- Releasable wire trap for rework or replacement
- High-temperature thermoplastic housing
- Overall form factor is fewer than 50.00mm (1.96") in diameter
- Clear LED protective cover is available with a snap-lock feature

Molex's LED Array Holder, ideal for OEM light-fixture manufacturers, simplifies the LED installation process for Bridgelux energy-efficient ES and RS Arrays. LED array holders simplify the LED installation process by eliminating the need for hand or SMT soldering and expensive SMT equipment. The holders will allow customers to install LED arrays quickly into fixtures, enable field replacements and facilitate upgrades to current applications.

BRIDGELUX. The Magic of Light™

Features:
- Compact high flux density light source
- High quality uniform illumination without pixilation
- Plug and play solution enables rapid design integration
- More energy efficient than incandescent, halogen and fluorescent lamps
- Long operating life and reduced operating costs

BXRA-C4500-00000

BXRA-W3000-00000

The **Bridgelux** family of LED Array products delivers high performance, compact and cost-effective solidstate lighting solutions to serve the general lighting market. These products combine the higher efficacy, lifetime, and reliability benefits of LEDs with the light output levels of many conventional lighting sources. The **Bridgelux RS Array** Series has been specified to enable lamp and luminaire designs with comparable performance to existing high wattage CFL and HID conventional light sources for retail, commercial, industrial and outdoor/street lighting applications. The CFL and HID light sources cannot be readily dimmed; **Bridgelux Arrays** are extremely well equipped for all types of light-on-demand applications, where they can be instantaneously and smoothly dimmed up or down without any effect on lifetime.
The **Bridgelux RS Array** series provides a high performance alternative to conventional solid state solutions, delivering between 3000 and 8500 lumens under application conditions in warm, neutral and cool white color temperatures. These compact high flux density light sources deliver uniform high quality illumination without pixilation or the multiple shadow effect caused by LED component based solutions, enabling excellent beam control for precision lighting. To simplify system design for appropriate light output, **Bridgelux LED Arrays** are specified to deliver performance under typical use conditions.

SOLDERLESS LED SOCKETS FOR BRIDGELUX RS LED

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:
- Allows solderless termination to Bridgelux RS LED's
- Poke-in terminals accepts 18–22 solid, 18–20 pre-bond, or 18 AWG stranded wire
- Cleared area designated for reflector mounting
- LED retained in housing with slight press-fit (LED not included)
- Four screw attachment using M3 or #4 screws (not included)
- Integrated features for polarization on heat sink
- Features molded in wire strain reliefs
- 70mm approximate overall diameter
- Mating cycles: 1 mating cycle for poke-in; 5 mating cycles for LED heat sink
- Alignment pins use same hole size as mounting screws
- Accepts standard LEDIL OY Britney Series reflectors
- Current rating: 3A max.
- Voltage rating: 60VDC
- Dielectric Withstand Voltage: 500VDC
- Terminals: Tin plated, copper alloy
- Housing: UL 94V0 rated high temperature thermoplastic, UV FI resistant
- Continuous operating temperature: -40°C to 105°C

The TE Solderless LED Socket, Type BR is a quick termination connector system for use with the Bridgelux RS LED. The one piece connector assembly features the TE poke-in wire termination to wire types ranging from 18 – 22 AWG wire. Termination to the Bridgelux RS LED is simplified with locating features that properly position the LED into the socket prior to mounting the full assembly onto the heat sink with four screws. The socket is designed to accept commercially available LEDIL Britney Series Optics but ample space is available to allow for the use of other custom optical solutions.

BRIDGELUX VERO™ SERIES LED ARRAYS

RoHS Compliant Available

BRIDGELUX. The Magic of Light™

Vero 10

Vero 13

Vero 18

Vero 29

Features:
- Lumen output performance ranging from 800 to 20,000 lm
- Broad range of CCT options from 2700K to 5000K
- CRI options include minimum 80, 90, and 97 CRI Decor products
- 3SDCM standard for 2700K-4000K CCT options
- Reliable operation at up to 2X rated drive current
- Radial die pattern and improved lumen density
- Thermally isolated solder pads
- Onboard connector port
- Top side part markings

Benefits:
- Broad application coverage for interior and exterior lighting
- Flexibility to respond to application driven lighting design requirements
- High quality true color reproduction
- Uniform consistent white light
- Flexibility in design optimization
- Improved optical control
- Enhanced ease of use and manufacturability
- Solder-less connectivity enables plug & play installation and field upgradability
- Improved inventory management and quality control

LED EMITTERS & ARRAYS

V6 SERIES LED ARRAY LIGHT ENGINES

NEW

BRIDGELUX The Magic of Light™

- Enhanced optical control
- Clean white light without pixilation
- High quality true color reproduction
- Significantly reduced thermal resistance and increased operating temperatures
- Uniform consistent white light
- Easy to use with daylight and motion detectors to enable increased energy savings
- Environmentally friendly with no disposal issue

The Bridgelux V6 LED Array products delivers high quality light in a compact solid state lighting solution. These products can be efficiently operated at twice the normal drive current, enabling design flexibility. This high flux density light source is designed to enable a wide range of sub 1000 lumen directional luminaires and replacement lamps for commercial and residential applications.

V8 SERIES LED ARRAY LIGHT ENGINES

RoHS Compliant Available

NEW

BRIDGELUX The Magic of Light™

- Enhanced optical control
- Clean white light without pixilation
- High quality true color reproduction
- Significantly reduced thermal resistance and increased operating temperatures
- Uniform consistent white light
- Easy to use with daylight and motion detectors to enable increased energy savings
- Environmentally friendly with no disposal issue

The Bridgelux V8 LED Array products delivers high quality light in a compact solid state lighting solution. These products can be efficiently driven at twice the normal current, enabling design flexibility not previously possible. This high flux density light source is designed to enable a wide range of sub 1000 lumen directional luminaires and replacement lamps for commercial and residential applications.

CREE® XLAMP® XQ-D LED ARRAYS

RoHS Compliant Available

CREE

Features:

- Cree's smallest lighting class LED: 1.6 x 1.6 x 1.6mm
- Binned at 25°C
- 700 mA maximum drive current
- Low thermal resistance: 7.5°C/W
- Wide viewing angle: 145°
- Reflow solderable - JEDEC J-STD-020C compatible
- Unlimited floor life at 30°C/85% RH
- UL-recognized component (E349212)

Cree **XLamp XQ-D** LEDs revolutionize high-power LEDs by delivering lighting-class reliability and a wider spread of light than typical plastic packages. The XQD's innovative wide light emission can improve the omnidirectionality of replacement lamps, while also reducing system cost by using fewer LEDs. Using Cree's newest generation of silicon carbide-based LED chips, XQ-D is optimized to dramatically lower system cost in replacement lamp, non-directional

CREE XLamp® XB-D LEDs

RoHS Compliant Available

CREE

Features:
- Cree's smallest lighting class LED: 2.45 x 2.45 mm
- Up to 136 lm/W in cool white (@ 85°C, 350 mA)
- 1 A maximum drive current
- Low thermal resistance: 6.5°C/W
- Wide viewing angle: 115°
- Reflow solderable - JEDEC J-STD-020C compatible
- Unlimited floor life at ≤ 30°C/85% RH
- Electrically neutral thermal path

The **XLamp XB-D** is Cree's newest lighting class LED, bringing the next generation of performance and price to LED lighting applications. The **XLamp XB-D** delivers similar performance to the XP-G LED in a package that is 48% smaller than the **XLamp XP** footprint.

CREE XLamp® XP-C LEDs

RoHS Compliant Available

CREE

Features:
- Maximum drive current: up to 500 mA
- Low thermal resistance: as low as 12 °C/W
- Wide viewing angle: 125°
- Unlimited floor life at ≤ 30 °C/85% RH
- Reflow solderable - JEDEC J-STD-020C compatible
- Electrically neutral thermal path

Applications:
- Color-changing lighting
- Portable and personal lighting
- Outdoor lighting, indoor directional lighting
- Commercial lighting
- Emergency-vehicle lighting

The XLamp XP-C LED combines the proven lighting-class performance and reliability of the XLamp XR-E LED in a package with 80% smaller footprint. The XLamp XP-C LED continues Cree's history of innovation in LEDs for lighting applications with wide viewing angle, symmetrical package, unlimited floor life and electrically neutral thermal path.

CREE XLamp® XR-E LEDs

RoHS Compliant Available

CREE

Features:
- Colors: White, Royal Blue, Blue, Green
- Maximum drive current: up to 1000 mA
- Industry's lowest thermal resistance: 8°C/W
- Max junction temperature: 150°C
- Industry-leading JEDEC standard prequalification testing
- Surface Mount Technology
- Electrically Isolated Thermal Path
- Integrated Lens
- Small Footprint — 7.0mm x 9.0mm
- Lumen Maintenance of Greater Than 70% on Average After 50,000 Hours

The **XLamp XR-E LED** is leading the LED lighting revolution with its unprecedented lighting-class brightness, efficacy, lifetime and quality of light. These lighting-class features enable the XLamp XR-E LED to replace many traditional light sources and save money with energy-efficient light and long lifetimes. Cree XLamp LEDs bring high performance and quality of light to a wide range of lighting applications, including color-changing lighting, portable and personal lighting, outdoor lighting, indoor directional lighting, commercial lighting and emergency-vehicle lighting.

CREE XLamp® XM-L LEDs

RoHS Compliant Available

CREE

Features:
- Delivers 1000 lumens at 100 lumens per Watt
- Low thermal resistance: 2.5°C/W
- ANSI-compatible chromaticity bins
- Unlimited floor life at <=30°C/85% RH
- Reflow solderable - JEDEC J-STD-020C
- Electrically neutral thermal path

Applications:
- Street and roadway
- Outdoor area
- LED replacement lamps
- Indoor commercial
- High-bay and industrial

The **XLamp XM-L** is the industry's brightest, highest-performing lighting-class LED, now available in the full spectrum of white. With breakthrough light output and efficacy, **XM-L** is designed for very high-lumen applications such as high-bay, indoor commercial or roadway lighting. **XLamp XM-L** LEDs offer the unique combination of very high efficacy at very high drive currents, providing a 20% efficiency gain over the **XLamp XP-G** LED at the same current. With this available efficacy, **XM-L** can lower total system cost by reducing the number of LEDs and optics in the system. Also available in tape and reel; *go online or call.*

- Royal Blue wall plug efficiency of up to 53% (@ 85 °C, 350 mA)
- Wide viewing angle: 115-140°
- Thermal resistance: 5 °C/W
- Maximum drive current: 1.5 A
- Electrically neutral thermal path
- Vf binning supported for XT-E White
- Unlimited floor life at ≤ 30 °C/85% RH
- Reflow solderable - JEDEC J-STD-020C Compatible

Cree XLamp LEDs bring high performance and quality of light to a wide range of lighting applications, including remotephosphor, color-changing, portable and personal, outdoor, indoordirectional, transportation, stage and studio, commercial and emergency-vehicle lighting.

CREE® XLAMP® XH-B AND XH-G SERIES LED ARRAYS

RoHS Compliant Available

CREE

Features:
- Package size: 3.0 x 3.0mm
- Available in white, 70-minimum
- CRI cool white, 80-minimum
- CRI white and 85- and
- 90-minimum CRI warm white
- Unlimited floor life at 30°C/85% RH

Cool White

Specifications:
- Thermal resistance: 45°C/W
- Viewing angle (FWHM): 130°
- DC forward current: 125mA
- Reverse voltage: -5V
- Forward voltage: 65mA
- LED junction temperature: 150°C

The **XLamp XH-G LED** is a new type of mid-power LED that delivers the unique combination of high performance and reliability. Unlike common mid-power plastic packages of today, the ceramic-based XH LEDs are designed to deliver the long calculated L70 lifetimes of Cree's other high-power LEDs, such as XP or XT LEDs. XH LEDs are optimized for fluorescent replacement lighting applications, such as troffers and panel lights, where high efficacy, long lifetime and smooth appearance are critical. The XH LEDs allow lighting manufacturers to offer products that meet the lifetime expectations of LED technology without compromising performance. The **XH-G LED** delivers leading efficacy levels of up to 170 lumens-per-watt at 65 mA, 5000 K, 80 CRI. The **XH-B LED** delivers leading efficacy levels of up to 140 lumens-per-watt at 65 mA, 5000 K, 80 CRI.

X-LAMP XB-E AND XB-G SERIES HIGH-VOLTAGE HVW LEDS

NEW

RoHS Compliant Available

CREE

Features:
- Cree's smallest lighting class LED: 2.45 X 2.45 mm
- Binned @ 85 °C
- Available in white, 80-minimum CRI white
- Wide viewing angle
- Reflow solderable - JEDEC J-STD-020C compatible
- Unlimited floor life at ≤ 30°C/85% RH
- Electrically neutral thermal path

Specifications:
- Thermal resistance, junction to solder point: 7.5°C/W
- Reverse voltage: 0.1V
- Forward voltage (@ 44 mA, 85 °C): 26.5V
- LED junction temperature: 150°

XLamp **XB-E** and **XB-G** high-voltage, white, omni-directional replacement lamps. the XLamp XB-E High-Voltage White LED delivers high efficacy in the small XB footprint. Built on Cree's SC³ Technology™ Platform, the XLamp XB-E High-Voltage White LED enables smaller and more efficient driver circuits than standard-voltage LEDs. In addition, the XB-E and XB-G LED has a wider light distribution that can improve the omni-directionality for ENERGY STAR replacement lamps. These system optimizations together with the wide light distribution enable more-efficient and better LED replacements for omni-directional lamps.

CREE XLamp® ML-B LEDs

RoHS Compliant Available

CREE

Applications:
- Linear Lighting
- Fluorescent Retrofits
- Retail Display Lighting

Features:
- Available in white (2,600 K to 8,300 K CCT)
- ANSI-compatible sub-bins
- Maximum drive current: 100 mA
- 120° viewing angle, uniform chromaticity profile
- Electrically neutral thermal path
- Unlimited floor life at ≤ 30°C/85% RH

The **Cree® XLamp® ML-B LED** brings lighting-class reliability and performance to ¼-watt LEDs. With XLamp lighting-class reliability, a wide viewing angle, uniform light output, and industry-leading chromaticity binning in a 3.5-mm X 3.5-mm package, the **XLamp ML-B LED** continues Cree's history of segment-focused product innovation in LEDs for lighting applications. Also available in tape and reel; *go online or call.*

CREE XLamp® ML-C LEDs

RoHS Compliant Available

CREE

Specifications:
- Available in both parallel and series
- ANSI-compatible sub-bins
- Maximum drive current: 350 mA for parallel, 175 mA for series
- 120° viewing angle, uniform chromaticity profile
- Electrically neutral thermal path

The Cree XLamp ML-C LED brings lighting-class performance to ⅓-watt LEDs and continues Cree's history of leading-edge innovation in LEDs for lighting applications. The XLamp ML-C LED brings high performance and a smooth look to a wide range of lighting applications, including linear lighting, LED replacement lamps, fluorescent retrofits and retail-display lighting.

CREE XLamp® MX-6S LEDs

RoHS Compliant Available

CREE

Features:
- Available in white (2,600 K to 8,300 K CCT)
- Wide viewing angle: 120°
- 20 VDC nominal with voltage binning available
- Electrically neutral thermal path
- Qualification at max drive current
- Unlimited floor life at ≤ 30°C/85% RH

The **Cree XLamp MX-6S** LED provides the proven lighting-class performance and reliability of Cree XLamp LEDs in a high voltage, PLCC configuration. The **XLamp MX-6S** LED brings a high quality of light to a range of lighting applications that require near-line-voltage configuration, including LED light bulbs, fluorescent retrofits and retail-display lighting.

SOLDERLESS LED SOCKETS FOR CREE XLAMP MP-L LED

RoHS Compliant Available

TE connectivity

Authorized Distributor

Features:
- Operating current: 500mA
- Operating voltage: 30VDC
- Housings: UL94V-0 rated high temp thermoplastic
- Contacts Silver plated copper alloy interface to LED, tin interface to wire or PCB
- Dielectric withstanding voltage: 500 VDC
- Select silver plated contact interface to Cree XLamp MP-L LED
- 6 line termination in both wire and board termination versions
- Secure attachment to substrate using three standard #4 or M3 screws
- Wire version incorporates 6 position AMP Mini CT header (ordered separately)
- Low profile- <3 mm height around dome (w/o latches; 5.20 mm high at connector interface)

Tyco Electronics' Solderless LED Socket, Type CM provides a solderless quick termination to the 1500 lumen output Cree XLamp® MP-L™ LED. This solderless termination technique facilitates easy integration of the LED into the end customer's lighting fixtures with simple screw-down installation. Multiple versions are offered to provide application flexibility. To further enhance functionality to the fixture manufacturer, the socket also features integral, robust, snap attachment of LEDIL Tyra series reflector optics.

CREE XLamp® MC-E LEDs

RoHS Compliant Available

CREE

Features:
- Industry's first lighting-class multi-chip LED
- Highest XLamp lumen density (lm/mm²)
- Individually addressable LED's
- Lowest XLamp thermal resistance:3° C/W
- Electrically isolated thermal path

Specifications:
- Viewing Angle = 110°
- Forward Voltage = 3.2 V
- Maximum Drive Current: 700 mA per LED die

Mfg. Part No.	Color	CCT Range Min.	CCT Range Max.	Luminous Flux (lm) @ 350 mA	Stock No.	Price Each 1-9

CREE XLamp® MC-E COLOR LED EMITTERS

RoHS Compliant Available

CREE

Features:
- High lumen density
- Small, multi-color optical source for efficient color mixing
- Max drive current: 700 mA per emitter
- Thermal performance: 3°C/W

Applications:
- Architectural/decorative lighting
- Stage and studio lighting
- Retail display

CREE® XLAMP® MK-R LED ARRAYS

RoHS Compliant Available

CREE

Features:
- Available in ANSI white bins as well as 4-step and 2-step EasyWhite bins at 2700 K, 3000 K, 3500 K, 4000 K, 4500 K and 5000 K CCT
- Maximum drive current: 1250 mA
- Low thermal resistance: 1.7 °C/W
- Maximum junction temperature: 150 °C
- Binned at 85 °C
- Viewing angle: 120°
- Available in cool white, 70-, 80- and 90.CRI minimums
- Unlimited floor life at 30 oC/85% RH
- Reflow solderable - JEDEC J.STD.020C
- Electrically neutral thermal path
- UL-recognized component (E349212)

Built on Cree's revolutionary SC3 Technology. platform, the **XLamp MK.R** LED brings new levels of performance to directional LED arrays, enabling lighting manufacturers to create the next generation of high-lumen indoor and outdoor LED lighting systems. In single-LED systems, the **XLamp MK.R**, with EasyWhite. color binning, provides the LED industry's tightest unit-to-unit color consistency. For systems using multiple LEDs, the MK-R enables manufacturers to use fewer LEDs while maintaining light output and color consistency, which translates to lower system cost. The **XLamp MK.R** is optimized for directional lighting applications and is a welcome addition to applications requiring high lumen output, a compact optical source and a broad palette of color temperature and CRI values.

CREE HIGH-EFFICIENCY WHITE XLamp® XP-E LEDs

RoHS Compliant Available

CREE

Features:
- Light output and efficiency similar to XLamp XP-G
- Maximum drive current: 1000 mA
- Low thermal resistance: 6°C/W
- Maximum junction temperature: 150°C
- Wide viewing angle: 120°
- Electrically neutral thermal path

Applications:
- Color-changing
- Portable and personal
- Outdoor
- Indoor-directional
- Transportation
- Stage and studio
- Commercial and emergency-vehicle lighting

XLamp XP-E High Efficiency White LEDs upgrade the XLamp XP-E to leading performance levels for diffuse lighting applications. **XP-E HEW** is designed to enable faster adoption of LED light in cost-sensitive, consumer lighting products. Compared to the standard XLamp XP-E, **XP-E HEW** can reduce LED count by 50% and still deliver the same system performance.

Mfg. Part No.	LED Color	CCT	IF (mA)	VF (V)	Lumin. Flux (lm)	Stock No.	Price Each 1-9

(192092)

CREE EASYWHITE XLamp® XM-L LEDs

RoHS Compliant Available

CREE

Features:
- EasyWhite 2- and 4-step color temperatures
- High lumen density
- High CRI options
- 6-V & 12-V high voltage options
- Characterized and binned at 85°C
- Wide viewing angle (115°)
- Electrically isolated thermal path

Applications:
- 20-25W halogen MR, PAR and B10-style replacement lamps
- Small form factor directional lighting
- Track lighting
- Accent lighting

Achieving high light output at a consistent color for small-form-factor applications has been traditionally a design challenge. The **XM-L EasyWhite** LED combines high light output and small footprint of the existing **XM-L** package with Cree's unique **EasyWhite** color temperatures to provide an LED that is optimized for small-form-factor directional lighting.

CREE EASYWHITE XLamp® MT-G LEDs

RoHS Compliant Available

CREE

Features:
- EasyWhite 2- and 4-step color temperatures
- High lumen density
- Minimum 80 CRI (2700 K, 3000 K)
- Electrically isolated thermal path
- Wide viewing angle (120°)

Applications:
- MR-style retrofit lamps
- Accent & track
- Retail display
- Down lights
- Hospitality
- Museums & art galleries

XLamp MT-G LEDs enable designs with consistent color, small form factor and unprecedented performance. While achieving high lumen output from a space-constrained and thermally-constrained form factor has been challenging in the past, MT-G enables 35–50-watt halogen MR16 retrofit lamps. In addition, the **MT-G** LED can be driven to much higher currents in less constrained designs, achieving up to 1525 lumens at 4 A at 85°C in warm-white (3000-K) color temperatures. **XLamp MT-G** LEDs are the industry's first LEDs to be binned for luminous flux and chromaticity at 85°C, which can simplify luminaire design calculations and speed time-to-market.

LED ARRAY HOLDER FOR CREE XLAMP MP-L ARRAYS

RoHS Compliant Available

molex

Features:
- Available in serial and parallel wiring options
- Compression contacts to power array
- Double-ended wire-trap terminal to attach power source
- Screw-mount attachment method for securing array to heat sink
- Releasable wire trap for rework or replacement
- High-temperature thermoplastic housing
- Overall form factor is 44.85 by 42.00mm (1.77 by 1.65")
- Available with and without clear LED protective cover
- Snap lock feature for optional optic

LED Holder Without Cover

LED Holder With Cover

Molex's LED MP-L Array Holder, ideal for OEM light-fixture manufacturers, simplifies the LED installation process for Cree energy-efficient XLamp MP-L arrays and is available in serial and parallel wiring options. LED array holders simplify the LED installation process by eliminating the need for hand or SMT soldering and expensive SMT equipment. The holders will allow customers to install LED arrays quickly into fixtures, enable field replacements and facilitate upgrades to current applications.

Mfg. Part No.	Description	Stock No.	Price Each 1-9

(195376)

CREE® XLAMP® XT-E HVW SMD LED ARRAYS

RoHS Compliant Available

CREE

Features:
- Binned at 85°C
- Cree-standard mechanical footprint of 3.45 X 3.45mm
- Electrically neutral thermal path
- Unlimited floor life at 30°C/85% RH
- Available in standard CRI and 80.minimum CRI configurations
- UL-recognized component (E349212)

The Cree XLamp XT-E High Voltage White LED provides the lightingclass performance and reliability of Cree XLamp LEDs in a smallform, high-voltage configuration. The XT-E HVW LED is an order of magnitude smaller than other high voltage LED arrays, allowing easy implementation of spaceconstrained lighting applications with smaller, more efficient high voltage drivers. Among these applications are small lamps such as B10, GU10 and E17.

Mfg. Part No.	Color	I_F (A)	V_F (V)	Viewing Angle (°)	Stock No.	Price Each 1-999

SOLDERLESS LED SOCKETS FOR PHILLIPS LUMILEDS LUXEON S LED

RoHS Compliant Available

TE connectivity

Authorized Distributor

Type LS Socket w/o Latch

Snap-On Reflector

Trasnfer Punch Guide

Features:
- Solderless termination to LUXEON S LED
- Integral optics attachment features
- LED locator to aid assembly
- Three screw attachment using M3 or #4 screws
- No-strip IDC termination of 24 AWG solid & stranded wires
- Integral thermal spring frame helps provide adequate normal force for LED to heat sink
- Low profile – housing optical interference <2% of total LED light output
- Socket size: 35.9mm x 29.6mm
- Fits within 42.2mm diameter circumscribed circle centered on LED
- 3mm height within optical emission area
- 5.20mm height at the connector interface
- For use with 24AWG UL1007 solid or stranded wire or equivalent
- Current rating: 1.5A
- Voltage rating: 40 VDC
- Dielectric withstand voltage: 1070 VDC
- Terminals: Tin plated, copper alloy, Gold on LED interface
- Stainless steel LED pressure spring
- Housing and locator: UL 94V0 rated high temperature thermoplastic
- Continuous operating temperature: -40°C to 105°C

The TE Solderless LED Socket, type LS is a quick termination connector system for use with the Philips Lumileds LUXEON S. The connector features easy, snap-together tool-less insulation displacement termination to 24AWG wire. Termination to the LUXEON S LED is simplified by the use of an easily applied locator frame that pre-positions the LED on a heatsink prior to final connectorization using the socket. The socket eliminates the need to design, manufacture and integrate a complex metal clad circuit board (MCPCB) assembly into the lighting fixture. This frees the lighting fixture designer to move beyond the limitations inherent in a planar MCPCB LED assemblies. The ability to easily place an LED anywhere in a fixture using simple hand tools provides the fixture designer with a broad range of novel integration possibilities

CREE XLAMP® CXA1304 AND CXA1816 LED ARRAYS

RoHS Compliant Available

CREE

Features:
- Available in ANSI white bins as well as 4-step and 2-step EasyWhite bins at 2700K, 3000K, 3500K, 4000K and 5000K CCT
- 85°C binning and characterization
- 115° viewing angle, uniform chromaticity profile
- Top-side solder connections
- Thermocouple attach point
- NEMA SSL-3 2011 standard flux bins

CXA1304

CXA1816

The XLamp **CXA1304** and **CXA1816** LED array expands Cree's family of highflux, multi-die arrays in a smaller, easy-to-use platform. With XLamp lighting-class reliability, the **CXA1304** and **CXA1816** small, uniform emitting surface enables both directional and non-directional lighting applications including lamp retrofit and luminaire designs. Available in 2-step and 4-step color consistency. The **CXA1304** features a 6mm optical source, and the **CXA1816** features a 12mm optical source. The **CXA1304** and **CXA1816** brings new levels of flux and efficacy to this form factor.

CREE XLamp® CXA SERIES LED ARRAYS

RoHS Compliant Available

CREE

Features:
- Available in ANSI white bins as well as 4-step and 2-step EasyWhite bins at 2700K, 3000K, 3500K, 4000K and 5000K CCT
- 80 and 90 minimum CRI options
- Forward voltage: 37 V
- 85 °C binning and characterization
- 115° viewing angle, uniform chromaticity profile
- Top-side solder connections
- Thermocouple attach point

HIGH EFFICIENCY WHITE LEDS

NEW

RoHS Compliant Available

Panasonic

- Small package size: 3.2mm x 0.3mm x 0.6mm
- High power white LED chip with high reflectance materials
- Low luminous degradation: 40,000 hrs, 70%

Applications:
- LED lighting
- Ceiling lights
- Car cabin lighting
- Under shelf lighting

Featuring a compact, 3230 package size, high power LED chip, and high reflectance materials, these LEDs exhibit a high luminous efficiency of 150lm/W. This is the same luminous efficiency as a fluorescent light! With a low forward voltage and low luminous degradation, the LNJ03004xxD1 series is a perfect fit for energy efficient lighting applications that require low power consumption and long lifetime. Also, with a wide operating temperature range of -40°C to 105°C, these LEDs can even be used in automotive applications.

CREE XLamp® CXA2011 LED ARRAYS

RoHS Compliant Available

CREE

Features:
- High lumen density in a single, easy-to-use package
- Characterized and binned at 85°C
- Wide viewing angle (120°)
- Screw-down attachment

Applications:
- Surface-mount downlights
- Recessed can lights
- Pendant lights
- A19 replacement bulbs
- Exterior area lights
- Commercial wall pack

The first screw-down LED array to be characterized at 85°C, the **XLamp CXA2011** LED delivers high lumen output in a single, easy-to-use package. The **CXA2011** LED can address applications with a wide range of power (11 - 45W), light output and efficacies. From 800 lumen, 60W A19 replacement bulbs to 2000+ lumen downlights and commercial wall packs, the **CXA2011** LED can simplify design and speed time to market.

CREE® XLAMP® CXA2540 SERIES LED ARRAYS

RoHS Compliant Available

CREE

Features:
- Available in ANSI white binsas well as 4-step and 2-step
- Forward voltage: 37 V
- Maximum drive current: 2100mA
- 115° viewing angle
- Uniform chromaticity profile
- Top-side solder connections
- Thermocouple attach point
- NEMA SSL-3 2011 standard flux bins
- Mechanical and optical footprint consistent with CXA2520 and CXA2530

The XLamp CXA2540 LED array expands Cree's family of high flux, multi-die integrated arrays, offering high performance in an easy-to-use platform. With XLamp lighting-class reliability, the CXA2540's uniform emitting surface enables both directional and non-directional lighting applications and luminaire and lamp designs. Available in 2.step and 4.step color consistency, and featuring a 19.mm optical source, the CXA2540 brings new levels of flux and efficacy to this form factor.

L2 SERIES STARBOARD LIGHT ENGINES

NEW

RoHS Compliant Available

BIVAR MOVING LIGHT

The L2 Series is optimized for high light output, high CRI, and lighting uniformity, making it ideal for directional lighting applications. It delivers consistent color in a compact, highly efficient package that enables true halogen performance in a thermally constrained design. The products in this series provide the lighting industry with efficient, environmentally friendly LED lighting.

STARBOARD LIGHT ENGINES

LZC SERIES CONNECTORIZED MCPCB LED STAR BOARD

RoHS Compliant Available

LED ENGIN BRIGHT LIGHT. TINY PACKAGE.

Features:
- Poke-home connectors already mounted on the MCPCB for easy connections
- 1-channel configuration allows for easy driver control for LZC emitters
- Very low Thermal Resistance for MCPCB adds only 0.6°C/W
- Zener Diodes for ESD protection
- On-board thermistor for common constant current source with thermal feedback option
- LuxiGen LZC Lens family (8° / 15° / 23° / 32° / 45°) holders align with the MCPCB cutouts

The LZC-FxxxT1 MCPCB with two 2-pin poke-home connectors provides a convenient method to connect LED Engin's LZC emitters. One 2-pin poke-home connector supports 2 parallel strings of 6 die in series; the second one connects the thermistor.

STAR BOARDS WITH POKE-HOME CONNECTORS AND THERMISTOR

Mfg. Part No.	Color	CCT (K)	Lumin. Intens. (lm)	Vf (V)	If (mA)	Stock No.	Price Each 1-9

(202156)

LZP SERIES CONNECTORIZED MCPCB LED STAR BOARD

RoHS Compliant Available

LED ENGIN BRIGHT LIGHT. TINY PACKAGE.

Features:
- 1-channel configuration allows for easy driver control for LZP emitters
- Very low Thermal Resistance for MCPCB adds only 0.1°C/W
- Zener Diodes for ESD protection
- On-board thermistor for common constant current source with thermal feedback option
- LuxiGen LZP Lens family (15° / 23° / 32°) holders align with the MCPCB cutouts

The **LZP-HxxxT1**, MCPCB with three 2-pin poke-home connectors provides a convenient method to connect LED Engin's LZP emitters. One 2 pin poke-home connector supports 4 parallel strings of 6 die in series; a second one is for connecting to the thermistor, and a third one is available for an optional center die for custom emitters.
The **LZP-Dxxxxx**, MCPCB is provided with five channels: four independent channels with strings of six white LED dies in series each and one channel for optional center pad function (not used with LZP-0xxx00 emitter). The MCPCB contains zener diodes for each channel resulting in enhanced ESD protection. It also provides six mounting features that allow for M3 or #4 screws to attach the MCPCB to a heat sink and allow the alignment of a **LLxx-3T11** series lens holder.

STAR EMITTER BOARDS WITH CREE's MCE LEDs

RoHS Compliant Available

multicomp

Features:
- Available with EasyWhite bins
- ANSI-compatible neutral & warm white chromaticity bins
- Individually addressable LEDs
- Low thermal resistance: 3 ##UndefTag-786##C/W
- Electrically-isolated thermal path

Series

Parallel/Individual

The **MCE** LED is a lighting-class, multi-chip LED that provides high lumen output in a small footprint package. The **MCE** LED is now available with EasyWhite™ bins, which improve LED-to-LED color consistency and reduce manufacturing complexity. Compared to discrete LEDs, **MCE** LEDs reduce the distance between LED die, creating a small optical source for excellent optical control and efficient color mixing. To simplify evaluation and integration the **MCE** LEDs have been placed on MCPCBs.

LED EMITTERS & ARRAYS

CREE EASYWHITE XLamp® MP-L LEDs

RoHS Compliant Available

CREE

Features:
- EasyWhite™ color temperatures
- High lumen density
- Minimum 80 CRI (2700K, 3000K)
- Electrically isolated thermal path

Applications:
- Commercial/residential directional lighting
- LED retrofit bulbs
- General indoor/outdoor illumination

The **XLamp MPL EasyWhite™ LED** offers the performance, color consistency and lumen density to displace conventional light sources, in a breakthrough 12mm x 13mm package design. Combining Cree EasyWhite™ technology with up to 1500 lumens of light at 250mA, the MPL EasyWhite™ simplifies system design and increases color consistency enabling new applications previously achievable only through the use of multiple LED components. The MPL EasyWhite™ LED is the perfect choice for lighting applications where high luminous flux output is required from a single, small point source.

FLEXIBLE LED LIGHT STRIP

RoHS Compliant Available

TT electronics OPTEK Technology

Features:
- High brightness LEDs mounted on flexible circuit board
- Energy saving lighting solution
- Low power consumption
- Operating life longer than fluorescent and incandescent light sources

Applications:
- Commercial and residential decoration
- Under-counter lighting
- Media illumination
- Large area backlighting
- Small to medium channel letters
- Point-of-sale displays
- Neon replacement

This LED Light Strip is a flexible and scalable lighting solution using 30 high brightness LEDs per strip to supply illumination for residential, commercial, and industrial applications. Up to 16 feet (5 meters) can be operated with a single 12V power supply. Dual-sided tape provides easy installation in most indoor applications and allows many different configurations.

HIGH BRIGHTNESS LED POWER MODULES

RoHS Compliant Available

VISHAY.

Applications:
- Automotive internal lighting
- Internal lighting in buildings
- Tunnel lights
- Reading lamp, table lamp
- General lighting application

Features:
- Metal core PCB: Al > 1 thickness
- Single side/single layer PCB
- Shiny white surface
- 6 or 12 LED's minimum 82 lm at 350 mA each
- Prepared to devide in half strips also, by cutting
- Conductive top layer: Cu (min. 18 um)
- Isolation layer prepreg (100 um)
- ESD withstand voltage: up to 2 kV according to JESD22-A114-B
- Color binning
- LM80 certified LEDs

Mfg. Part No.	Description	Stock No.	Price Each 1-9
● VLPC0601A2	6 LEDs in a row on a 240 mm x 14 mm PCB that provides 870 lm	**46T5773**	43.68
● VLPC1201A2	12 LEDs in a row on a 240 mm x 14 mm PCB that provides 1740 lm	**46T5774**	67.19
● VLPC1201A2J	Half a VLPC1201A2J, resulting in two modules each measuring 120 mm x 14 mm with 6 LEDs and luminous flux of 870 lm	**46T5775**	67.25

LZC HIGH LUMINOUS EFFICACY LED ARRAYS AND LENSES

RoHS Compliant Available

LED ENGIN BRIGHT LIGHT. TINY PACKAGE.

Features:
- Ultra-small foot print - 9.0mm x 9.0mm
- Surface mount ceramic package with integrated glass lens
- Very low Thermal Resistance
- New industry standard for Lumen Maintenance (>90% at 100,000 Hours)

Applications:
- Stage and Studio lighting
- Architectural lighting

LED SIGNAGE MODULES

RoHS Compliant Available

wamco

Applications:
- Front-lit or back-lit channel letter signage
- Indoor or outdoor decorative lighting

WL BFL425

WL BFL445 WL BFL645

Features:
- Solid-state reliability with long operating life - reducing maintenance costs
- Low power consumption - providing significant energy savings
- Low voltage (12-24VDC) operation - providing for added safety
- Water resistant (IP67 Rated) for outdoor applications
- Easy installation
- 3-5 year warranty on applicable models

A series of LED modules available in a variety of sizes and configurations to support lighting of all sizes and styles of channel letters and single and double-sided box signs.

- Unlimited floor life at <= 30 degrees C/85% RH
- Electrically-isolated thermal path

The **XPC** LED combines the proven lighting-class performance and reliability of the XRE LED in a package with 80% smaller footprint. To simplify evaluation and integration the **XPC** LEDs have been placed on MCPCBs.

LED LENSES & TRIPLE LENSES

RoHS Compliant Available

Dialight

Designed for Luxeon, Cree, Nichia & Osram leds, the **OPK2, OPTX, OPIO and OPGD series** adhesive backed lenses offer three different illumination patterns: spot, wide and oval. The base lens is attached by its adhesive backing and automatically centered by placing it directly to the PCB over the LED dramatically cutting down on assembly time. The base lens is a spot beam and can be used on its own or with an OPAA clipon sub lens to provide either a diffuse, oval or wide beam pattern. The **OPTX-3, OPK2-3, OPIO-3 and OPGD-3** triple base are also spot lenses. If used on their own, they offer two different **OPTL** sub-lenses for micro (diffuse) or wide beam pattern. The triple base lenses are fixed over the LEDs on the PCB using locating pegs. The sub lenses attach easily to the base lens with an integral snap-lock system. All **OP series** lenses are made from optical grade PMMA (acrylics) to ensure excellent optical properties as well as long-term material stability and durability.

PANEL MOUNT RIGID LIGHT PIPES

RoHS Compliant Available

BIVAR MOVING LIGHT

Features:

- Protect circuits from ESD
- Use with SMD or Thru-Hole Series LEDs
- PLP Series Panel Light Pipes press fit into panel
- For PLP1 Series added retention and contrast, use C-103-SR Self-Retaining Clip
- For PLP5 Series added retention and contrast, use C-105-SR

Light Pipes are ideal for applications where an automatically placed LED requires its output redirected to a front panel. Light pipes are engineered of 94V-0 compliant clear polycarbonate for maximum light transmission and viewing angle to 120°. Light pipes will also protect circuits from accidental damage from ESD by isolating the PCB from potential contact.

BRIGHT PIPES™ OPTICAL LIGHTPIPES FOR 3mm AND SMD MOUNTED LEDs

RoHS Compliant Available

Chicago Miniature Lighting, LLC
Lighting the world since 1910

- Precision engineered with *"ray tracing"* for bright, optically precise even indication and attractive appearance
- ESD protected from circuitry for reliability
- High-contrast and wide-viewing angle for greater visibility
- Designed for use with Bright Chip™ LEDs

Mfg. part nos. 7611D2-S and **7611D2-L** lightpipes are designed for panel mounting. **7511 series** lightpipes are low profile and have matching center lines to allow for side-by-side mounting. Feature large lens for high visibility and parts inserted after reflow to permit LED pad inspection before assembly. **Mfg. part no. 7512FPR-305** Flexpipe™ flexible optical lightpipe with precision fiber-optics for long distance SMT LED to lens. Eliminates need for precision mechanical alignment of components to panel. Feature large lens for high visibility and parts inserted after reflow to permit LED pad inspection before assembly.

Mfg. Part No.	Description	Stock No.	Price Each 1-24	Price Each 25-99

LSV SERIES LITEPIPES FOR PCB MOUNTED LEDs

RoHS Compliant Available

VCC

Designed to transmit light from PCB mounted LED to panel display. Cliplite lenses provide the mounting for Litepipes and produce 180° of viewing angle. Use **mfg. part no. SMB200** lens mount for **LSV series** (3mm) Litepipes and **mfg. part no. CLB300** lens mount for **LCV series** (5mm) Litepipes, ordered separately; *go online or call.* For added security use retaining rings **mfg. part nos. RNG190** (3mm) and **RNG 268** (5mm), also ordered separately; *go online or call.*

LPC SERIES LITEPIPES FOR 3mm AND SMD MOUNTED LEDs

RoHS Compliant Available

VCC

Designed to produce 160° viewing angle of light from PCB mounted LEDs. Accomodates both 3mm and surface mount LEDs. Litepipes are able to display single color devices or mix multi-colored LEDs into a single color. Sizes from 0.200″ (5.08) to 2.00″ (50.80). Use **mfg. part no. RTN150** grommet with sizes 0.200″, (020) through 0.500″ (050) and **mfg. part no. RTN250** spring clip for sizes 0.500″ (050) to 2.00″ (50.80); *both ordered separately below.*

LMS SERIES NEMA 3 MOISTURE SEALED LITEPIPE ASSEMBLIES FOR PCB MOUNTED LEDs

RoHS Compliant Available

The **LMS** series NEMA 3 moisture sealed push-on lightpipes provide a method for transmitting light from surface mount, T1 and T1-3/4 LEDs. Low-profile panel lenses provide 180° viewing angle. Panel hole size: 0.283″ on 0.375″ centers, panel thickness 0.031″-0.125″.

LCS SERIES NEMA 4 MOISTURE SEALED LITEPIPE ASSEMBLIES FOR PCB MOUNTED LEDs

RoHS Compliant Available

The **LCS** series of NEMA 4 moisture sealed **threaded** light pipes provide a method of transmitting light from a surface mount T-1 or T-1 ¾ LED. Low-profile panel Lenses provide 180° viewing angle. Panel hole dia. is 0.312. Can be used with panel thickness of 0.032 to 0.125. The assembly consists of lightpipe, domed lens and mounting hardware. Available in assorted lengths and colors.

2.5MM LMC MICROLITEPIPE

RoHS Compliant Available

The 2.5mm LITEPIPE® provides a method of transmitting the light from PCB mounted LEDs to the front display panel. Both styles of LEDs, surface mount, 3mm and 5mm standard packages can be displayed in this manner. The LITEPIPE® assembly is easily installed. Pass the LITEPIPE® through the panel opening and press on grommet retainer (**RTN 100**)to secure unit to the panel. Slide PCB into position aligning LED with the end of the LITEPIPE®. Mounts in .102″ (2.59mm) hole on 3/16″ centers. Use grommet retainer (**RTN 100**).

FLEXIBLE LIGHT PIPE ASSEMBLIES

RoHS Compliant Available

BIVAR MOVING LIGHT

Features:
- Eliminates need for thru-hole drilling of PCBs
- Exclusively designed for Flexible Light Pipe Lens Cap Assemblies
- Brilliant LED display capable of being extended from 2.5" (63.5mm) to 328" (100m) via the FLP mono-fiber

SMFLP FLPR FLPV

The use of light pipes returns flexibility to the designer and can elimnate components and costly assembly steps resulting in a practical and economical indication solution. Light Pipes are the perfect solution for moving light from the source to the destination. The Light Pipes act as a conduit for the light allowing for distances of a few millimeters up to 100 meters.

LOW PROFILE PANEL FLUSH LIGHT PIPES

RoHS Compliant Available

Features:
- Allows easy panel removal
- Low profile, panel flush design blends in until light is emitted
- Mates to any PCB using SMD 4 (sold seperately)
- Optical grade acrylic for maximum light transmission
- Efficient production assembly
- Available in standard lengths of .300"[7.62] to 1.20"[30.48]

Specifications:
- Light Pipe Color: Clear optical grade acrylic, UL rating 94-H
- Light Pipe Mounting: PC Board
- Light Pipe Shape: Circular w/ Flat top
- SMD 4 (PCB mount): Nylon, (black) UL rating 94-V2

FLEXFIRE™ FLEXIBLE LIGHT PIPES

RoHS Compliant Available

The FLX Series consists of an optical fiber attached to a VCC lens coupler. This lens coupler then attaches firmly to a whole host of VCC lenses. This flexibility allows for an engineer to select from many different lens colors and styles. *Both the lenses and LED couplers are sold separately.* The FLX Series works with the CLB 300, CLF 280, CLR 301, and SQB 400 panel lenses.

ROUND LOW PROFILE LED LENS CAPS

RoHS Compliant Available

KEYSTONE
ELECTRONICS CORP.

- Material: Polycarbonate

The lens cap protects the LED from physical damge while guarding the components from electrostatic discharge (ESD), up to 16KV. The caps feature striated lines and fresnel rings which permit up to 180° viewing angles with either diffused or non-diffused LED's. They provide exceptionally high contrast and visibility. **8659** is T1 LED size clear color. *Other colors available, go online or call.*

PANEL MOUNT INDICATORS

NEW

RoHS Compliant Available

BIVAR MOVING LIGHT

- Forward current: 20mA
- Forward voltage: 24V
- Luminous intensity: 20mcd
- Mounting hole diameter: 8mm
- IP67 rated
- Smart sensor technology automatically senses and adjusts for appropriate intensity
- Wide viewing angle capabilities with a 7mm water clear Fresnel lens
- Black metal housing for ruggedized applications (shock and vibration resistant)
- Non-polarized quick disconnect terminal blades which also work as soldering lugs for wire connection

Applications:
- Servers and server appliances
- Test and measurement equipment
- Electrical and control instrument panels
- Military and utility vehicle dashboards
- Commercial and communication control boxes
- Wireless and power line infrastructure
- Water and waste treatment equipment

5110F SERIES LED PANEL MOUNT INDICATORS

RoHS Compliant Available

Chicago Miniature Lighting, LLC
Lighting the world since 1910

- Low Current: Only 2mA
- Built-In Chip Resistor
- Operates Directly Off 5V Supply
- No External Resistor Needed

Mfg. Part No. 5110F indicator features wire leads and super-brite T-1 LED 20 mcd-diffused lens to allow wide angle viewing. Snap-fits in 0.155-0.158″ (3.93-4.01mm) diameter hole in panels 0.031-0.062″ (0.78-1.57mm) thick. 6″, 26 AWG leads stripped 0.25″ (6.35mm). Black nylon housing. Amber color also available; *go online or call for more information.*

5100H SERIES LED PANEL MOUNT INDICATORS

RoHS Compliant Available

Chicago Miniature Lighting, LLC
Lighting the world since 1910

Fig. 1 Fig. 2

Indicator **type 5100H** snap-fits in 0.249/0.254″ (6.33/6.45) diameter mounting hole in panels 0.031/0.062″ (0.78/1.57) thick. Features 6″ (152.4) wire leads 24AWG insulated, bonded strands, stripped 0.25″ (6.35). **Type 5100H1/5** is bi-color. Lights red or green by reversing polarity. **Type 5102H** features built-in resistor chip (5V or 12V) to operate directly off 5-volt or 12-volt supply without external resistor. **Type 5101H** features wire-wrap 0.45″ (11.3) terminals. Black nylon housing.

NON-RELAMPABLE 5/16″ LED PANEL MOUNT INDICATORS

RoHS Compliant Available

Chicago Miniature Lighting, LLC
Lighting the world since 1910

Fig. 1 Fig. 2 Fig. 3

Neon and LED solid-state indicators mount in 0.313″ (7.95mm) min. diameter hole with push-on speednut (included). All have 4.4-4.8″ (112-122.9mm) long, 22 AWG wire leads **except** Mfg. Part Nos. with Q in the type number which have 0.187″ (4.75mm) tinned brass quick-connect terminals. Neon indicators (**Mfg. Part Nos. 2110, 2120** and **2150**): 105-125VAC. **Mfg. Part No. 2150** has polished stainless steel bezel. Wire lead models feature black leads. LED solid state indicators (**Mfg. Part No. 2191**): 12V and 24V, as indicated by suffix in type number. Polished stainless steel bezel. Wire lead models feature red (+) anode lead.

SPECIAL NON-RELAMPABLE INDICATORS

RoHS Compliant Available

Chicago Miniature Lighting, LLC — *Lighting the world since 1910*

Non-relampable solid state lamps with polycarbonate lens. Solid state indicator lights (**1091M** and **6091M series**) feature built-in current-limiting resistor and rectifier diode. No. 22 AWG wire leads. Stainless-steel bezel. **1091M series** snap-fits into 0.5-0.505″ diameter hole in panels 0.02-0.1″ thick. **6091M series** mounts in a 0.38″ min. diameter hole. Supplied with internal tooth-lock washer and hex nut.

DIALIGHT 593 SERIES 3mm TRI-LEVEL PRISM SURFACE MOUNT INDICATORS

RoHS Compliant Available

Dialight

Features:
- Incorporates latest LED technology, specifically designed for surface mounting
- Patented Tri-level design provides increased indication without increased space
- Illumination areas compatible with industry standard 3mm through-hole Tri-level Circuit Board Indicators
- Helps to eliminate mixed technology pc board processing

The **593 Series** Tri level Prism is available in 11 LED color options including bi-color and tri-color. There are numerous color combinations that can be supplied in any of the three positions from top to bottom depending upon customers needs.

➤ CONTINUED ➤

556 SERIES HIGH INTENSITY WATERTIGHT LED PANEL MOUNT INDICATORS (CONT.)

556 series indicators incorporate inGaN and AlIGaN technologies for higher intensities and feature 100,000-hour life, uniform illumination, watertight, and tamperproof design. For use indoors or out. Suited for instrument panels, electrical/electronic control panels and where highly visible indication is critical. Rugged metal housing. Uses 1″ (25.4mm) mounting hole Operating temperature: –25°C to +85°C. Domed or flat lens.

558 SERIES PANEL MOUNT LED INDICATORS

RoHS Compliant Available

Dialight

Straight Terminals -001 Suffix

14″ Leads - 007 Suffix

558 series snap-in mount LED indicators feature ultra-bright, water-clear LEDs. Require no additional mounting hardware for 0.031-0.062″ thick panels. Power requirements range from 2-20mA. Housing is black polycarbonate. Feature 0.156″ (3.96mm) mounting hole. Termination: mfg. part nos. with **001 suffix** = straight; **003 suffix** = 6″ leads; and **007 suffix** = 14″ leads.

557 SERIES WATERTIGHT LED PANEL MOUNT INDICATORS

RoHS Compliant Available

Dialight

557 series indicators for 0.688″ (17.48mm) mounting hole feature superbright colors, 100,000-hour life, uniform illumination, watertight, tamperproof design and 6″ (152.4mm) wire leads. Suited for instrument panels, electrical/electronic control panels and where highly visible indication is critical. Housing material: polycarbonate with black aluminum bezel. Operating temperature: –25°C to +85°C.

657 SERIES WATERTIGHT LED PANEL MOUNT INDICATORS

RoHS Compliant Available

Dialight

Features:
- IP67 / NEMA 4X
- Cool-to-the-touch operation
- Available with non-tinted lenses to eliminate "phantom effect"
- Daylight viewable
- Resistant to shock and vibration
- Anti-Capillary wire
- LED technology engineered for up to 100k hours of operation

Applications:
- Electrical control panels
- Wastewater treatment controls
- Dashboards - vehicles
- Outdoor pixels on lane control and signage
- Status indication on industrial equipment

400 SERIES LED INDICATOR LIGHTS

RoHS Compliant Available

MLEC

406

407

440

406 series LED indicator features macrodome lens. Voltage range from 2-24V with built-in resistor. Panel hole: 0.244″(6.2mm) - 2V models. All lamps chrome-plated brass bodies except items with **BO** in mfg. part no. are black anodized brass. **407 series** has large dish-shaped reflector around LED to produce a larger illumination area. Panel hole: 0.244″(6.2mm) - 2V models. **406** and **407 series** 5, 12 and 24V models feature 0.28″ (7.11mm) cutout size and solder tab terminations. **440 series** is a larger version of **407 series** to provide even greater illumination. Panel hole: 0.335″ (8.5mm). All lamps feature black anodized body.

MODEL 550 MINIATURE INDICATOR LIGHTS

RoHS Compliant Available

MLEC

550 Flush Style — 551 Top Hat Style — 552 Dome Style

Features:
- 5mm Hole
- High-Impact Plastic Construction
- Nut and Washer Supplied
- Available in a Variety of Light Sources Including Incandescent, Neon or LED
- Available with a Choice of Flush, Top Hat Style or Dome Lens

Wire leads available as an option on 2V LED or all incandescent versions. All others are standard with external resistor and 6″ wire leads. To order top hat lens, replace **550** in Mfg. Part No. with **551**. Dome-type lens are **552**. Incandescent and neon (with resistor) versions are also available. Replace **L** in the Mfg. Part No. with **F** for incandescent or **NR** for neon with resistor.

L59 AND L59UD SERIES SNAP-MOUNT LED INDICATORS FOR 1/4″ MOUNTING HOLE

RoHS Compliant Available

LC&D LEECRAFT

L59

L59U

L59UD Series:
- Built-In Integral Bezel
- Diffused Wide Viewing Angle LED
- 6″-Coded Wire Leads
- Panel Range: 0.115″-0.13″ (2.9-3.3mm)

L59 Series:
- Black Nylon Housing and Bezel
- 0.062″ Max. Panel Thickness
- Dome-Shape Lens

L59 series LED indicators feature long life, solid state reliability. Types listed have 6″ insulated wire leads. 2-volt and 6-volt indicators and indicators with bare wire terminals also available; *go online or call.* **L59UD series** indicators feature termination: 6″-coded wire leads; red = anode(+), black = cathodel(-).

AP22M SERIES LED PILOT LIGHT INDICATORS

NEW

IDEC

- Viewable in direct sunlight
- Visible from all directions
- The use of an ultra bright LED that is not susceptible to external scattered light ensures high visibility and provides for more accurate recognition
- Panel front: IP66 (IEC 60529), UL Type 4X, terminals: IP20

LED PILOT LAMP INDICATORS

RoHS Compliant Available

multicomp

Features:
- Mounting hole diameter: 22mm
- Expected life: 30,000 hours.
- IP rating: IP65.
- Brightness: 600cd/m2.
- Operating temperature: -25°C to +55°C.
- Forward Voltage: 24V ac and DC 110V ac (50Hz) 230V ac (50Hz)

This range of LED lamps offers high illumination output, long life, low temperature and is supplied as a complete unit with encapsulated LED ready to fit. The range provides even lighting in each colour.

FLAT LENSE LED PANEL MOUNT INDICATORS 8mm MOUNTING DIA.

RoHS Compliant Available

wamco™

Specifications:
- Mounts in 8.0 - 8.2mm (0.315"-0.323") diameter hole
- Superflat bezel indicators fit panels up to 10.0mm (0.394") thick
- Solderable faston terminations

Features:
- Solid-state reliability
- Long operating life
- Low power consumption
- Low heat generation

High brightness color diffused LEDs are fitted in high-quality satin chrome or black chrome metal bezels and fitted with fixing nut and washer. Faston/solder tab brass terminals 2.8 x 0.8 mm (0.110" x 0.031"). Anode terminal marked "+" on VDC products.

HIGH HAT LENSE LED PANEL MOUNT INDICATORS 8mm MOUNTING DIA.

RoHS Compliant Available

wamco™

Features:
- Solid-state reliability
- Long operating life
- Low power consumption
- White nylon housing
- Polycarbonate lens
- 6" Wire leads with 0.50" strip
- 0.310" Minimum mounting hole
- Agency approvals

RECESSED BEZEL LED PANEL MOUNT INDICATORS 8mm MOUNTING DIA.

RoHS Compliant Available

wamco™

Specifications:
- Mounts in 8.0 - 8.2mm (0.315"-0.323") diameter hole
- Recessed bezel indicators fit panels up to 8.0mm (0.315") thick
- Solderable faston terminations

Features:
- Solid-state reliability
- Long operating life
- Low power consumption
- Low heat generation

High brightness color diffused LEDs are fitted in high-quality satin chrome or black chrome metal bezels and fitted with fixing nut and washer. Faston/solder tab brass terminals 2.8 x 0.8 mm (0.110" x 0.031"). Anode terminal marked "+" on VDC products.

LED PANEL MOUNT INDICATORS 9.65mm MOUNTING HOLE DIAMETER

RoHS Compliant Available

wamco

Features:
- White nylon housing
- Polycarbonate lens
- Stainless steel bezel
- Fully gasketed construction
- 0.187" x 0.020" Thick tinned brass quick connect terminals or 6" wire leads with 0.50" strip
- Fits 0.380" hole in 0.030" to 0.250" thick panels
- Solid state models include built-in current limiting resistor and rectifier diode
- Neon models include built-in current limiting resistor
- Agency approvals
- IP67 Rated

CNX 480 SERIES LED PANEL MOUNT INDICATORS

RoHS Compliant Available

Technical:
- Mounting Hole: 10.1mm
- Operating Temperature: -40°C to 80°C
- Panel Thickness: 1.5mm min. to 8.1mm max.
- LED Current Output: 20mA
- Socket Body: Aluminum Alloy
- Lens: Polycarbonate, UL Rating 94-V2
- Washer: Steel, Zinc Plated, UL Rating 94-V0
- Retaining Nut: Aluminum Alloy
- Nut and washer to be packaged seperately
- Wire: 24 AWG

SOCKET BODY FINISH - ANODIZED BLACK

RUGGEDIZED LED PANEL MOUNT INDICATOR

RoHS Compliant Available

Features:
- Designed for harsh and outdoor environments
- Wide angle viewable
- Low profile for anti-vandalism
- Direct sunlight visibility
- Resistant to shock and vibration
- ESD protection

Applications:
- Istrument panels
- Disinfection and sterilization environments
- Transportation dashboards
- Safety applications
- Outdoor signage
- Aircraft and military
- Industrial machinery
- Electrical control panels
- Vending and gaming machines

CNX 482 Series offers a robust anodized aluminum body delivering NEMA 4 protection from the elements.

22mm TuffLED™ PANEL MOUNT INDICATORS

RoHS Compliant Available

Features:
- Designed for extreme harsh and outdoor environments
- Variety of connection options for fast, easy installation
- Built-in LED can be used with 5, 12 or 24 volt D/C circuits
- Fast pitch threads ease assembly, requiring only1 turn
- Special nut assembles by finger or with 1" hextool
- Direct sunlight visibility wide angle viewable
- Resistant to shock and vibration
- Moisture sealed, IP 67/NEMA 6P rated

Specifications:
- Installation specification mounting hole: .855-.910" (21.7-23.1mm)
- Panel thickness Up to .300" (7.6mm)
- Operating temperature: -40°C to +80°C
- Body material: Polycarbonate, UL 94-V2

Q SERIES 8MM IP67 PROMINENT BEZEL TYPE PANEL MOUNT LED INDICATORS

RoHS Compliant Available

APEM

Features:
- 5mm coloured diffused epoxy lens
- Bright chrome or black chrome
- (2.8 x 0.8) Terminals
- IP67 sealing option (EN60529)
- Supplied with fixing nut and spring washer

508 SERIES INDUSTRIAL PANEL MOUNTING WATER-TIGHT IP67 LED INDICATORS

RoHS Compliant Available

MARL

Features:
- 8.1mm Mounting Hole
- High-Intensity, Sunlight-Readable LEDs
- Fully Potted Internally to Protect from Vibration, Shock and Water Ingress
- Brass Body for Safe Use in Hazardous Areas

Operating temperature: -20C to +60C. Storage temperature: -30°C to +85°C. Lens: smoked. Mean time between failure: 100,000 hours. Rating: CO2 IP67.

528 SERIES WATER-TIGHT IP67 LED INDICATORS

RoHS Compliant Available

MARL

Features:
- Robust Stainless Steel Housing
- Low-Profile Styling
- Mounting: 13mm

Lens: colored diffused. Wide viewing angle. Operating temperature: -40°C to +60°C. Mean time between failure: 100,000 hours.

514 SERIES WATER-TIGHT IP67 LED INDICATORS

RoHS Compliant Available

MARL

Features:
- 12.7mm Mounting
- Bright Nickel-Plated Brass Housing
- Robust Termination Tags Accept
- Push-On Connectors

Wide viewing angle. Operating temperature: -40°C to +85°C. Lens: coloured diffused. Mean time between failure: 100,000 hours.

651 SERIES WATER-TIGHT IP67 LED INDICATORS

RoHS Compliant Available

MARL

Features:
- 12.7mm Mounting
- Black Anodized Aluminum Housing
- Full Internal Potting Making the Product Ideal for Use in Arduous Environments
- Excellent Wide Viewing Angle Characteristics
- Sealed to IP67

Wide viewing angle. Operating temperature: -20°C to +60°C. Lens: colored diffused. Mean time between failure: 100,000 hours.

PANEL MOUNT INDICATORS

604 SERIES PROFESSIONAL LED INDICATORS 5mm DIA MOUNTING (CONT.)

The **604 Series** is a 5.0mm mounting, Professional LED Panel Indicator featuring a high intensity LED element in a range of colors and voltages. A reverse protection diode is fitted as standard in all voltage models. Termination is achieved by 150mm of color coded flying leads. This particular device is fitted with a low profile, smoked lens assembly to provide excellent wide angle viewing and on/off contrast ratio. The precision turned housing is manufactured from brass with a high quality, bright nickel finish, and is supplied complete with full mounting hardware.

Mfg. Part No.	Color	Voltage (Vopr)	Current (mA@DC)	Luminous Intensity (mcd) I_v @ 20mA	Wavel-ength (nm)	Stock No.	Price Each 1-9

507 SERIES PROFESSIONAL LED INDICATORS 8.1mm DIA MOUNTING

RoHS Compliant Available

MARL

Features:
- Robust bright nickel plated brass housing
- Low profile styling, sunlight readable LEDs
- Sealed to IP67
- Suitable for high vibration applications
- Internal reverse protection diode fitted as standard in all voltage models

The **507 Series** is a 8.1mm mounting, Professional LED Panel Indicator featuring a high intensity LED element in a range of colors and voltages. A reverse protection diode is fitted as standard in all voltage models. Termination is achieved by standard solder/crimp tags. This particular device is fitted with a low profile, colored diffused lens assembly to provide excellent wide angle viewing. The precision turned housing is manufactured from brass with a high quality, bright nickel finish, and is supplied complete with full mounting hardware.

Mfg. Part No.	Color	Voltage (Vopr)	Current (mA@DC)	Luminous Intensity (mcd) I_v @ 20mA	Wavel-ength (nm)	Stock No.	Price Each 1-9

524 SERIES PROFESSIONAL LED INDICATORS 8.1mm DIA MOUNTING

RoHS Compliant Available

MARL

Features:
- Robust stainless steel housing
- Low profile styling, sunlight readable LEDs
- Sealed to IP67
- Wide viewing angle
- Suitable for high vibration applications
- Internal reverse protection diode fitted as standard in all voltage models.

The 524 Series has precision turned stainless steel housing that supports the LED element in a range of colors and voltages. Termination is achieved by standard solder/crimp tags. Fitted with a low profile, colored diffused lens assembly. Comes complete with full mounting hardware.

Mfg. Part No.	Color	Voltage V_f @ 20mA	Current (mA@DC)	Luminous Intensity I_v @ 20mA	Wavel-ength (nm)	Stock No.	Price Each 1-24

690 SERIES HIGH INTENSITY LED PANEL INDICATORS

RoHS Compliant Available

MARL

- Voltage rating: 8 - 48VAC/VDC
- DC current rating: 10mA
- Operating Temperature: -40°C to 80°C
- Power dissipation max.: 480 mW
- UL Certified - Certificate Number 20120419-E349017
- High Intensity LED Panel Indicator
- Black anodised aluminium housing
- Wide viewing angle
- Suitable for high vibration applications
- Sealed to IP67 - weather proof and suitable for use in external applications

538 SERIES PROFESSIONAL LED INDICATORS 12.7mm DIA MOUNTING

RoHS Compliant Available

MARL

Features:
- Each product will operate over a wide voltage input range
- Robust stainless steel housing
- Full internal potting to resist shock and vibration
- Sealed to IP67
- True Bi-polar product for low voltage DC applications

The **538 Series** is a 12.7mm mounting, Professional LED Panel Indicator featuring a high intensity LED element in a range of colors and voltages. This is a truly bi-polar product and operates over a wide voltage range. Termination is achieved by standard solder/crimp tags. This particular device is fitted with a low profile, colored diffused lens assembly to provide excellent wide angle viewing. The precision turned housing is manufactured from high quality stainless steel, and is supplied complete with full mounting hardware.

Neon, incandescent and LED indicators snap-fit into 0.5-0.505" (12.7-12.83mm) diameter hole in panels 0.02-0.100" (0.51-2.54mm) thick. All have 4.4-4.8" (112-122.9mm) long, 22 AWG wire leads **except** Mfg. Part Nos. with **Q** in the part number which have 0.187" (4.75mm) tinned-brass quick-connect terminals. Polished stainless steel bezel, white nylon housing. **Mfg. Part Nos. 1050C/1051C** feature wire leads (Q.C. terminals shown). **Mfg. Part Nos. 1050QA/1051QA** feature Q.C. terminals (wire leads shown). Wire lead models **Mfg. Part Nos. 1030** and **1050** feature black leads; **Mfg. Part Nos. 1031** and **1051** feature one black lead and one red lead. **Mfg. Part Nos. 1090** 12V indicators feature yellow leads for 12V; 28V models feature purple leads.

MIL SPEC PANEL-MOUNT INDICATORS

Dialight

Military type panel-mount indicators are QPL listed per MIL-L-780 (MS25041 & MS25331). The MIL-L-3661 number permits the ordering of a complete assembly, or separate lens cap and base, with the MIL designation for the base only marked on the lamp holder. The MS number specifies a complete assembly and the full MS number (less lamp) is marked on the lamp holder. Available in red, green, amber, blue, clear and white. Uses 5V non-replaceable incandescent lamp.

252 SERIES 0.193″ MOUNTING HOLE

Mfg. Part No.	MIL No.	Color	Fig.	Stock No.	Price Each 1-24	25-99	100-249
252-9951-0971	LHC82/1RT2	Red	1	**25F1295**	38.06	33.40	28.55

LAMP BASED – PANEL-MOUNT INDICATORS

103 SERIES OILTIGHT BASES AND LENSES

RoHS Compliant Available

Dialight

Fig. 1. Screw Terminal

Fig. 2. Dome Lens

Fig. 3. Torpedo Lens

Oil-tight indicators are manufactured with a rubber gasket installed between the plastic lens and metal holder, as well as with a rubber O-ring which fits tightly on to a notch in the base. These make assembly virtually impervious to oil, water and dust. The lens holder is brass with either satin chrome or white nickel finish, and the base is white nickel-plated brass. **103 series** base models can be used with either dome or torpedo lens. Torpedo faceted lens **mfg. part no. 103-1331-403** also available. *Order lamps separately; go online or call.*

051 AND 080 SERIES SPLASH-PROOF INDICATORS, 1″ MOUNTING HOLE

RoHS Compliant Available

Dialight

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Uses S6 candelabra screw base incandescent, convex, torpedo lens style lamp. Watertight. 2 to 120V operation. **Mfg. part no. 051-3101-01-303** terminal: screw with protruding positions. **Mfg. part no. 080-0901-05-303** terminal: screw with side positions.

150 AND 151 SERIES UNIVERSAL INDICATOR LIGHTS

RoHS Compliant Available

MLEC

Features:
- Versatile, High-Impact Plastic Units
- Provide Excellent Visibility
- Mounted in 0.281″ (7.14mm) Hole
- Nut and Washer Supplied

Square Lens

Round Lens

Digits after dash in type number denote voltage.

100 AND 101 SERIES MODULAR INDICATOR LIGHT ASSEMBLIES

RoHS Compliant Available

MLEC

Top Hat

Flush

Features:
- 100 and 101 Series Modular Lights
- Mounted with a Rubber Bushing
- Snap into a 9mm Diameter Panel Cutout
- No Nuts or Washers Required
- 6″ (152.4mm) Wire Leads

A variety of light sources– incandescent, neon, green glow and LED – fit into the bushing. A complete color selection of lens assemblies are slipped in from the top. Lens assemblies may be mounted independently from light source and mated in the final assembly. Lens colors/light sources are interchangeable.

32 SERIES PRESSFIT INDICATORS FOR ½″ PANEL MOUNTING HOLE

RoHS Compliant Available

LC&D Lighting Components and Design Inc. LEECRAFT A Lighting Components and Design Company

Features: Neon, Incandescent and LED indicators; choice of lens: flush, square, flat cylindrical or dome (hi-hat and square lens is available), 6″ wire leads or 3/16″ brass tab terminals (T). **32R** Neon indicators supplied with current limiting resistors for 125V, ⅓W with 25,000-hour life. 28V=.04A with 7,000-hours life (32,000-hour life at 24V). 14V=0.10A with 10,000-hours life. 6V-.20A with 5,000-hours life. **32RG1 Series** for 6V, **32RG3 Series** for 14V and **32RG18 Series** for 28V also available. Other colors and voltages are available; *go online or call.* UL listed, CSA certified.

Fig. 1 Wire Leads — Fig. 2 Midget Flange Base — Fig. 3 Min. Bayonet Base — Fig. 4 Candelabra Screw

Neon glow lamps are used for indicators and circuit control applications. Two closely spaced electrodes cause neon gas to ionize and glow when voltage is applied. Since they have no filament, lamps withstand considerable shock vibration. Neon lamps are ideal for line-voltage AC as well as for 90V and up DC applications. They are rugged and long-lived; properly specified neon lamps will outlast the equipment in which they are incorporated. Neon lamps have tinned leads, and are ideal for use on printed circuit boards. External resistors not included except resistor included in base. Current voltage: 120 except (+) 105-125. **Sold in packages of 10.**

LAMP SOCKETS/HOLDERS • LED REPLACEMENTS

CANDELABRA BAYONET SOCKETS

RoHS Compliant Available

multicomp

These sockets accept single contact candelabra bayonet-based lamps. Single #22 AWG, 6″ wire lead provides voltage to socket. Mounting bracket is electrically connected to socket shell, providing ground connection. Brackets are 0.025/0.42″ cadmium plated steel.

Mfg. Part No.	Fig.	Stock No.	Price Each 1-24
● SPC21736	1*	16M1227	2.64
● SPC21737	2*	16M1228	7.85
● SPC21738	4	16M1229	6.45
● SPC21739	9	16M1230	11.62

These sockets accept double contact candelabra bayonet-based lamps. Two #18 AWG, 6″ wire leads and Nema grade phenolic washers provide insulation from mounting bracket. Brackets are 0.30/0.48″ cadmium plated steel.

● SPC21740	1	16M1231	4.45
● SPC21741	2	16M1232	5.31

LED HEADLAMPS FOR HEAVY DUTY VEHICLES

Dialight

Certifications and Ratings:
- SAE / DOT Compliant
- FMVSS108 Visual Aim

Features:
- 5 year limited warranty
- Expected life >10 Years
- No frequent relamping
- Protection against over-voltage/surge/spikes
- Less prone to alignment errors
- Wide beam pattern
- Industry first reflector based design
- Weatherproof design

4″ X 6″ LED Headlamp

90mm LED Headlamp

Dialight's new LED headlamps are designed for heavy duty vehicles. With their dual voltage capabilities (12 and 24V), they will easily replace any 4″ x 6″ halogen low-beam light or 90mm halogen / HID light in the market as a retrofit without any need for retooling.
All of Dialight's long life LED luminaires are designed to meet the most demanding specification criteria while offering maximum energy savings, reduced maintenance costs, and a superior quality of light.

CREE® LMH2 SERIES LED MODULE AND POWER SUPPLY KITS

RoHS Compliant Available

CREE

Features:
- Cree TrueWhite® Technology; >90 CRI for all available CCT (2700 K to 4000 K)
- LED modules fit standard junction box configurations
- 80 LPW system efficacy
- 850 or 1250 lumens nominal
- Power input of 120 V/60 Hz or 277 V/60 Hz
- Supports dimming to 5% (120 and 230 V)
- UL approval (120 and 277 V)
- California Title 24 compliance (120 and 277 V)
- LED LM-80 data available
- Optional heat sink

Applications:
- LED Retro Fit
- Lighting fixtures - indoor downlight, wall sconces, pendants, track heads
- Residential and commercial

The Cree LMH2 LED module kit is the ideal choice for enabling rapid LED luminaire development where bright, beautiful, long-life lighting is required. The LMH2 module kit incorporates Cree's award-winning TrueWhite® LED technology with a power driver. The kit consists of a system of driver electronics, optics and primary thermal management for use in residential and commercial lighting applications. Additional thermal management availabe with optional heat sink below. The LMH2 module light source and power driver provide a wide selection of mounting and electrical options for design and manufacturing flexibility. *(CREE REQUIRES LICENSING AGREEMENT FOR OEM APPLICATIONS)*

CREE® LMH2 SERIES LED MODULE AND POWER SUPPLY KITS

RoHS Compliant Available

CREE

Flat Lens

120V and 230V Power Drivers

Dome Lens

Features:

- Industry-leading light-source efficacy of 97 lm/W (steady state)
- Available in 2700 K, 3000 K, 3500 K and 4000 K CCT
- >90 CRI for all CCTs
- Minimum 95 CRI available for 3500 K at 3000 lm
- Broad selection of mounting and wiring options
- Industry-leading 5-year limited system warranty
- Designed to last 50,000 hours at L70
- No UV in light output
- No mercury in light source

Cree LED modules provide lighting designers and manufacturers with simple, easy-to-adopt LED lighting solutions that reduce luminaire development time and speed time-to-market. Each kit contains one LED module and one power supply. Cree LMH2 LED modules are the ideal choice for enabling rapid luminaire development where bright, beautiful, long-life lighting is required. The ease of use of the LMH series of modules enables this versatile LED lighting module to jump-start the design process for recessed downlights, wall sconces or pendant lights in demanding end markets such as retail, museums, hospitality, restaurants and studio lighting.

LED REPLACEMENTS

FAA LED REPLACEMENT BEACONS

RoHS Compliant Available

Dialight

L810

L864

Features and Benefits:
- Industry's Longest Warranty = Complete performance 5 year warranty.
- All LED Flash Head with 10+ Years Life Expectancy = Reduction in expensive tower climbs and maintenance costs.
- Uses State-of-the-Art High Flux LED Technology = Long life and resistant to shock and vibration.
- Environmentally Friendly (20 Watt Power Consumption) = Over 90% more efficient than incandescent.
- Very Precise Optics (Patented) = Minimum ground scatter light (Community friendly lighting system).
- Smallest Flash Head in the Industry, 8.41″ high = Significantly less wind loading than a xenon or incandescent.
- IP66 rated = completely sealed from the outside environment.
- Lightest Flash Head in the Industry (20LBS) = Easy to handle and install.

Certified by:
- FAA AC NO: 150 / 5345-43F
- FAA Engineering Brief No. 67

Qualified by:
- Intertek ETL

Technical:
- Unit Weight: 20lbs (9Kg)
- Supply Voltage: 120-240 VAC Universal Input
- Watts: 20W Rated (10 Watts EQ)
- Operating Temp: -40°F to +131°F (-40°C to +55°C)
- Power Factor: >0.9

Compliant to:
- ICAO Annex 14, 5th Edition, 2009
- ICAO Aerodromes Design Manual, Chapter 18
- Canadian Aviation Regulation CAR 621.19 (Transport Canada)
- DGAC Mexico

The **Dialight Vigilant™ D464 Series** LED based medium intensity red beacon utilizes state-of-the-art optical design to achieve the most compact, efficient, FAA compliant **L864** device in the market. While it readily interfaces into existing installations, its robust, low power design will provide years of maintenance free service (*Payback = 1.5 Years*).

L864 RED BEACON

Mfg. Part No.	Description	Stock No.	Price Each 1-24
● D464A13001	L-864 Compliant Red FAA Beacon, 120/230 VAC	32T8748	2825.68

Features:
- Simple retro-fit version using existing wiring and mounting pattern
- Weather/corrosion resistant lamp assembly and housing
- Self-contained wiring compartment eliminates additional boxes
- Threaded 1″ and ¾″ bottom hub for mounting
- Can be operated steady or flashed
- Uses 95% less energy than incandescent
- 5 year warranty
- Resistant to shock and vibration
- IP65 / IP66 / NEMA 4X

Technical:
- Container Weight: 1.25lbs (Retro Unit), 2lbs (Single Unit), 4.6lbs (Dual Unit)
- Nominal Input Power: 6.5W (FAA - 120/230 VAC Units)
- Power Factor: >0.9
- Operating Temp: -40°F to +131°F (-40°C to +55°C)

Meets:
- FAA AC NO: 150 / 5345-43F
- FAA Engineering Brief No. 67
- ICAO Annex 14, 4th Edition, July 2004
- ICAO Aerodromes Design Manual, Chapter 18
- Canadian Aviation Regulation CAR 621.9
- German Air Traffic Control Notices For Pilots Part I 6, January 2005

Qualified by:
- Intertek ETL
- Lighting Sciences Canada
- DGAC Mexico

The **Dialight Vigilant™ RTO Series** obstruction light utilizes a unique optical, electrical and mechanical design . The **RTO** series is the most universal, compact and efficient obstruction light in the world. ETL Certified to the FAA requirements, the **RTO** series fixture is also ICAO and Transport Canada compliant. Also available as a single fixture for direct replacement of incandescent lamp/lens technology (*Payback = 1.5 Years*).

Q-RAY™ DOWNLED LED RECESSED DOWNLIGHTS

RoHS Compliant Available

wamco™

Features:
- No UV light or heat generated through the light beam protect valuables on display and cooling during summer months
- Low power consumption to minimize carbon emission
- Durable & long lasting up to 50,000 hours or more
- No reflector required. Light loss is minimal with long lumens maintenance hours
- Dimmable* down to 5%
- No mercury content

MODULAR LED LIGHTBARS

RoHS Compliant Available

LUMEX

Creating LED and LCD Solutions Together™

Applications:
- Cabinet Lighting
- Undercabinet Lighting
- Kitchen Lighting
- Garage Lighting
- Bookshelf Illumination
- Cupboard Lighting
- Showcase Displays
- Cove Lighting

LED Lightbar Kit

Features:
- 12" Modular LED Lightbar Kit available
- Available in lengths of 6, 12 and 24 inches for extendable design solutions
- Compatible connector cables available in 10", 20" or 40" lengths to connect Lightbars to desired length
- Mounting clips are available in 45° or 90°° angle varieties
- A specially designed transformer is available to allow for simplified installation and immediate wall plug-in
- For brightness control, a dimmer switch is available and effective on an entire line of connected light switches
- Ultra thin heat sink
- CE, UL, IP60, and RoHS compliant
- Warm, neutral and cool white colors are available in standard formats.

The SunBrite family of Modular LED Lightbar technologies combine high-performance, ease-of-installation, flexibility and cost savings. Unlike many alternative lighting technologies, the SunBrite LED Lightbar can be installed with ease without the need to hire an electrician to open walls and install new wiring.

LED LIGHT BARS

RoHS Compliant Available

wamco™

Features:
- Solid-state reliability with long operating life - reducing maintenance costs
- Low power consumption - providing significant energy savings
- Low voltage (24VDC) operation - providing for added safety
- Low heat generation
- 3 year warranty

A linear lighting system for interior and exterior applications such as path, cove, shelf, display case, and signage lighting. Available in white, warm white and full color versions in multiple lengths.

LED REPLACEMENTS

LED LIGHTING SYSTEM i-VIEW 501

RoHS Compliant Available

wamco™

Features:
- Energy efficient (up to 75% energy saving compared to 150W HQI or halogen lamps)
- 35W (around 40W including DC power supply) power consumption
- Available in White: 6500K and Warm White: 3300K
- Long service life (up to 40,000 hours)
- Water resistant (outdoor use, IP65)
- UL Approved
- 3 year warranty

Applications:
- Lighting for small and medium sized billboards and traffic signs
- Wall washing (buildings, bridges, etc)

Wamco **i-View 501** is an LED lighting system designed for small and medium sized billboards or traffic signs as well as a wall washing of buildings, bridges, sculptures, etc. **i-View 501** has much lower power consumption (around 40W including DC power supply) than conventional 150W HQI lamp and Halogen lighting fixtures.

206 SERIES FILAMENT REPLACEMENT LEDS—T1 ¾

RoHS Compliant Available

MARL

Features:
- Direct Replacement for T13/4 MF SX6s
- Reverse Polarity Options
- Center Contact, Anode as Standard

206 series filament replacement LEDs are ideal for replacing incandescent lamps with longer lasting, brighter LEDs. Mean time between failure: 100,000 hours. Typical technical characteristics: Ta = 25°C. Water clear lens. Wide viewing angle. Operating temperature: -40°C ~ +80°C. Storage temperature: -40°C ~ +80°C.

- Low cost operation: 85% electricity savings compared to incandescent
- Maintenance free – long operating life
- Unique thermal system. Maintains LED junction temperature below 90°C, with only 60°C housing temperature
- Excellent color rendering. CRI-80 with warm white
- Dimmable
- UV and IR free
- UL Approved

NEW

3M

Features:
- Approved for use in fully enclosed luminaries
- Over 70% of bulb surface illuminated
- Dimmable
- 0.99 power factor
- Usable in damp environments

Specificatons:
- Voltage: 120VAC 50/60Hz
- Base Type: E26
- Size/Format: A19
- Weight: 130g

PAR20 SERIES LED LAMP REPLACEMENTS

RoHS Compliant Available

multicomp

Features:
- Designed as high quality replacement of 35W halogen PAR20 lamps
- Dimmable 20-100%
- Suitable for indoor environments
- Available in WW CCT with 80CRI
- Reduces energy consumption up to 80%
- Lasts 33 times longer than halogen lamps

Specifications:
- Bulb Size: 60mm
- Supply Voltage: 120V
- Average bulb life: 25000h
- Power factor: 0.95

MR-16 RETROFIT LEDs

RoHS Compliant Available

LUMEX
Creating LED and LCD Solutions Together™

Features:
- Instant light-on
- Quiet (no hum) operation
- Drop in replacement as regular bulbs at compatible rated voltage
- 12V AC/DC power input
- Emits virtually no heat and will not fade fabrics or furnishings
- Equivalent lifespan of up to 17 years assuming Energy Star avg. daily usage of 4 hrs per day

Applications:
- Residential or commercial use
- Hospitality lighting
- Retail lighting
- Indoor lighting
- Spot and flood lights

The SunBrite MR-16 Retrofit LED provides significant cost and performance benefits compared to halogen alternatives widely available in the market today. The SunBrite MR-16 Retrofit LED (SSP-M16 series) technology offers comparable brightness (300 Lumens at 12 volts) and color performance (CRI over 80) to halogen alternatives, while simultaneously providing significant energy, cost and lifespan improvements. The metal body construction of the MR-16 LED serves as a natural heat sink and makes the technology more durable than halogen alternatives. This greatly reduces labor costs associated with bulb replacements – especially in high-ceiling or other difficult to reach locations.

Mfg. Part No.	Color	Beam Angle	Luminous Flux (lm)	CCT (K)	Stock No.	Price Each 1-9

586 SERIES BASED LED LAMPS

RoHS Compliant Available

Dialight

- LEDs Feature 100,000 Life Hours
- Highly Reliable, Shock and Vibration Resistant
- Uses up to 90% less energy than incandescent lamps

Dialight's **586 series** based LED lamps are designed to directly replace many subminiature and miniature incandescent lamps.The benefits of LED technology over incandescent are significant.

T-3¼ MINIATURE BAYONET LED LAMPS (BA9's)

RoHS Compliant Available

Dialight

Replace incandescent lamps with a LED lamp for greater brightness and longer life. The **586 series** LED lamps are polarized single LEDs in a T-3¼ bayonet based package, designed to directly replace popular incandescent lamps. Example incandescent lamp replacement numbers are: 44, 47, 313, 755, 757, 1815, 1819, 1847, 1866, 1889, 1891, 1892, 1893 and 1895. **586-2 models** are 29.21mm (1.15") L x 10.92mm (0.43") W.

T-3¼ BAYONET LED CLUSTER LAMPS

RoHS Compliant Available

Dialight

Cluster

Features:
- LEDs Feature 100,000 Life Hours
- Highly Reliable, Shock and Vibration Resistant
- AC or DC Operation
- 120 Degree Viewing Angle

Replace incandescent lamps with a cluster of LEDs for greater brightness and longer life. **585 series** LED cluster lamps are available polarized or non-polarized, up to 120VAC, in a T-3¼ bayonet based package. The lamps directly replace a wide variety of incandescent lamps, for example: 44, 47, 313, 755, 757, 1815, 1819, 1847, 1866, 1889, 1891, 1892, 1893 and 1895. **585-5 models** are 1.09" (27.7mm) L x 0.430" (10.92mm) W.

255 SERIES FILAMENT REPLACEMENT LEDS— T1 ¾ BAYONET CAP

RoHS Compliant Available

MARL

Features:
- Unique SOLO Technology - Single Product for Multivoltage Operating Range: 8-48VAC/DC
- Resistant to Vibration and Shock

Replace incandescent lamps with longer lasting and brighter LEDs. Lens: water clear. Wide viewing angle. Operating temperature: -20°C to +50°C. Mean time between failure: 100,000 hours.

SCREW THREAD POWER LED

WELDON A DIVISION OF AKRON BRASS

Features:
- Solder-Free mechanical attachment for easy installation and replacement
- Annular contact arrangement eliminates need for radial alignment
- Excellent thermal coupling to lighting system
- Large LED chip allows high drive current
- Outstanding light output
- Wide viewing angle
- UV resistant cover lens
- Operating Temperature Range: -40°C to +85°C

LCD DISPLAYS

WEATHER RESISTANT DATA DISPLAYS

NEW RoHS Compliant Available Storm Interface

Features:
- Impact, shock and vibration resistant
- Sealed for use in wet or dirty environments
- Programmable USB display controller and system interface
- Display connects to the host system via a single USB cable with a USB Mini-B connector
- Resistant to petrochemicals, detergents and most commonly used non-abrasive cleaning agents
- Easy to use API with downloadable object code libraries
- USB 2.0 HID compliant device
- Transflective display mode

- Supply voltage: 5V
- Graphic displays: 128 x 64 pixel
- Character displays: 4 or 8 line x 20 characters

These robust, monochrome displays are ideal for use in exposed or industrial environments. Bright white transflective display technology is securely encased within a sealed and impact resistant bezel. The bezel features a hard coated UV and scratch resistant, polycarbonate window. These USB 2.0 display devices can be easily installed into any control panel or equipment enclosure. The display assemblies can be specified with or without three independently illuminated menu navigation keys. Illumination is under software control (on/off/flashing). The Storm 5100 Series displays are rated for use in either industrial or extreme environments. They offer a ready to use display solution for a wide range of indoor or outdoor applications.

SmartSwitch LCD DISPLAYS

NEW NKK SWITCHES

Features:
- 36X24: up to 3 lines of 6 characters each
- 64X32: up to 4 lines of 10 characters each
- Broad and even light distribution
- Consistent bright backlighting
- Lower energy consumption
- Programmable
- Viewing area 13.9mm x 10.6mm
- Epoxy sealed terminals

These LCD Displays are the smallest off-the-shelf LCD display in the market. This display is about the size of a nickel coin. Use the display for graphics, animations, and alphanumeric messages. Flexible control of backlighting and LCD. Single, Bicolor, and RGB backlighting. SMARTDISPLAY can be used alone or in conjunction with electromechanical switches. Ideal for control panels and keyboards.

INFRARED RECEIVERS

RoHS Compliant Available

VISHAY.

Features:
- Operation with short bursts possible (greater than 6 cycles/burst)
- Photo detector and preamplifier in one package
- Internal filter for PCM frequency
- Improved shielding against electrical field disturbance
- Low power consumption; Output active low
- High immunity against ambient light
- Enhanced data rate of 4000 bit/s
- Transmission Distance: 35m
- Directivity: ±45°
- TTL and CMOS Compatibility

Remote control modules have internal filter for PCM accuracy and improved shielding against all electrical field disturbances. Continuous data transmission possible (1200bits/sec). **TSOP1200 series** has enhanced immunity against all kinds of disturbance light and no occurances of disturbance pulses at the output.

IR RECEIVER MODULES FOR REMOTE CONTROL SYSTEMS

RoHS Compliant Available

VISHAY

Features
- Photo detector and preamplifier in one package
- Internal filter for PCM frequency
- Continuous data transmission possible
- TTL and CMOS compatibility
- Output active low
- Low power consumption
- High immunity against ambient light

Special Features
- Improved immunity against ambient light
- Suitable burst length (≥ 10 cycles/burst)

TSOP362 Series are miniaturized SMD-IR Receiver Modules for infrared remote control systems. PIN diode and preamplifier are assembled on lead frame, the epoxy package is designed as IR filter. The demodulated output signal can directly be decoded by a microprocessor. **TSOP362 Series** is the standard IR remote control SMD-Receiver series, for 3V supply voltage supporting all major transmission codes.

ULTRA-VIOLET LED

RoHS Compliant Available

LUMEX
Creating LED and LCD Solutions Together™

Features:
- TO-46 package with glass lens in a through-hole format
- Available in 385nm, 405nm and 415nm wavelengths at 4-6mW
- Longer lifespan; greater than 50,000 hours
- Alternate wavelengths available

Applications:
- Bacterial and superficial sterilization
- Biohazard detection
- Counterfeit detection
- Dental and dermatology equipment
- Forensic applications
- Ink fluorescing
- Phototherapy
- Water Sterilization
- Polymer Curing

In addition to enhanced life span, QuasarBrite UV LEDs provide several key benefits compared to alternative technologies like CCFLs. QuasarBrite UV LEDs provide a uniform beam pattern. QuasarBrite UV LEDs do not use the hazardous mercury material found in CCFL technology and are more durable in their design, thereby significantly reducing maintenance costs. Finally, Lumex's UV LEDs have up to 70% lower energy consumption than CCFLs. These factors combined allow Lumex's QuasarBrite UV LEDs to provide up to a 50% cost savings compared to CCFLs.

ULTRAVIOLET (UV) LEDs

RoHS Compliant Available

VCC

Applications:
- Commercial Outdoor Sign Board
- Front Panel Indicator
- Dot-Matrix Module
- LED Bulb

Features:
- Low Power Consumption
- I.C. Compatible

VCC Ultraviolet (UV) LEDs are based on InGaN material technology. They have a water transparent lense and emit the color purple (UV).

HCPL-90xx/-09xx DIGITAL ISOLATOR

RoHS Compliant Available

AVAGO TECHNOLOGIES

Features:
- +3.3V and +5V TTL/CMOS compatible
- 3ns max. pulse width distortion
- 6ns max. propagation delay skew
- 15ns max. propagation delay
- High speed: 100 MBd
- 15kV/µs min. common mode rejection
- Tri-state output (HCPL-9000/-0900)
- 2500V RMS isolation
- UL1577 and IEC 61010-1 approved

Applications:
- Digital fieldbus isolation
- Multiplexed data transmission
- Computer peripheral interface
- High speed digital systems
- Isolated data interfaces
- Logic level shifting

HCPL-90xx/-09xx series CMOS digital isolators integrated high speed performance and excellent transient immunity specifications. All devices operate at 3.3V or 5V supply voltages, boasting low power consumption.

AVAGO TECHNOLOGIES

Features:
- 4 Channels
- Typ. Data Rate: 100KBd
- Current Transfer Ratio: 300% min.
- Input Current: 0.5-5mA
- Gold Plated Lead Finish

HERMETICALLY SEALED HIGH GAIN OPTOCOUPLERS

Mfg. Part No.	Class	Stock No.	Price Each 1-9
6N140A	Commercial	09F7267	79.63
6N140A/883B	Class H (Military)	06B4504	80.92

Features:
- Performance Guaranteed over Full Military Temperature Range: -55°C to +125°C
- Hermetically Sealed Packages
- ac/dc Signal & Power Switching
- Connection A 0.8A, 1.0 Ohms
- Connection B 1.6A, 0.25 Ohms
- Input Current 10-20mA

HERMETICALLY SEALED POWER MOSFET OPTOCOUPLER - 90V 1.0 OHM

ACSL-6XX0 15 MBd DIGITAL LOGIC GATE OPTOCOUPLER

RoHS Compliant Available

AVAGO TECHNOLOGIES

Features:
- Available in dual, triple and quad channel configurations
- Bi-directional
- Wide supply voltage range 3.0V to 5.5V
- Wide operating temperature range -40 to 100°C
- High-speed: 15 MBd typical, 10 MBd minimum
- 10kV/µS minimum CMR at Vcm = 1000V
- LSTTL/TTL compatible
- Safety and regulatory approvals (Pending)
  - 2500Vrms for 1 min per UL1577
  - CSA Component Acceptance
  - IEC/EN/DIN EN 60747-5-2
- 16-NSOIC package for triple and quad channels

Applications:
- I2C - Power over Ethernet
- I2C - Extended Bus Transmission
- I2C - Telecommunication (Power Control System)
- Digital isolation for A/D & D/A converters
- Data Acquisition
- Full duplex fieldbus communication
- Instrument I/O isolation
- Pulse transformer replacement
- Computer parallel and serial interfaces
- Microprocessor system interfaces

ACSL-6xx0 series is the markets first 3.3V, 15MBd, Multi-Channel and Bi-Directional Digital Logic Gate Optocoupler. These multi-channel product family offers in dual, triple and quad channels configuration integrated in a single thin 8-SO or 16-SO packages. Both forward and reverse channels configuration are integrated in a monolithic form that is achieved through a patented process technology.

ALL-IN-ONE MULTI-CHANNEL

LOW INPUT CURRENT PHOTOTRANSISTOR OUTPUT OPTOCOUPLERS

RoHS Compliant Available

VISHAY

Features:
- Phototransistor output
- Low input current
- Single Channel
- Low profile package (half pitch)

Specifications:
- High collector emitter voltage, V_{CEO} = 80V
- Isolation test voltage = 3750V_{RMS}
- Ambient temperature range: -55°C to +110°C

VACTROL® ANALOG OPTOISOLATORS

EXCELITAS TECHNOLOGIES

VTL5C

Provide low noise, infinitely variable resistor as output element. Resistance is inversely proportional to input drive current. Applications include: audio limiting and compression, automatic gain control, linear and DC isolators, SCR and TRIAC drives, logic interfacing and noiseless switching.

Mfg. Part No.	Output Resistance On: Input Current (mA)	Output Resistance On: Dark Adapted Typ. (Ω)	Turn-off (Decay) To 100 KΩ Max. (ms)	Stock No.	Price Each 1-24	Price Each 25-49

VOD211 SERIES PHOTOTRANSISTOR OUTPUT DUAL CHANNEL OPTOCOUPLERS

RoHS Compliant Available

Features:
- Two channel coupler
- SOIC-8 surface mountable package
- Standard lead spacing of 0.05"

Specifications:
- Isolation test voltage, 4000 VRMS
- Temperature range: -40°C to + 100°C

8-SOIC

Mfg. Part No.	Isolation Voltage (kV)	Input Current (mA)	Output Voltage (V)	Stock No.	Price Each 1-9

CNY SERIES OPTOCOUPLERS WITH PHOTOTRANSISTOR OUTPUT

RoHS Compliant Available

Applications:
- Switch-Mode Power Supplies
- Line Receivers
- Computer Peripheral Interfaces

CNY series optocouplers consist of a phototransistor optically coupled to a gallium arsenide infrared-emitting diode in a 6-lead plastic dual inline package. The elements are mounted on 1 leadframe using a coplanar technique, providing a fixed distance between input and output for highest safety requirements.

TCMT SERIES OPTOCOUPLERS WITH TRANSISTOR OUTPUT

RoHS Compliant Available

Applications:
- Programable Logic Controllers
- Modems
- Answering Machines and General Usage

TCMT series optocouplers consist of a phototransistor optically coupled to a gallium arsenide infrared-emitting diode in a 4-leadplastic Miniflat package. The elements are mounted on 1 leadframe using a coplanar technique, providing a fixed distance between input and output for highest safety requirements. Collector emitter voltage/repetitive peak voltage: >70.

PHOTOTRIAC OUTPUT OPTOCOUPLERS

RoHS Compliant Available

VISHAY.

Applications:
- Home appliances
- Microwave ovens
- Washing machines
- Inductive heating cooker
- Refridgerators
- Industrial equipment

Features:
- Max trigger current (I_{FT}): 10mA
- Isolation test voltage 5300V_{RMS}
- Pure tin leads

SILICON PIN PHOTODIODE

RoHS Compliant Available

VISHAY.

Features:
- Package type: leaded
- Package form: T-1
- Dimensions (in mm): ∅ 3
- High radiant sensitivity
- Suitable for visible and near infrared radiation
- Fast response times
- Package matched with IR emitter series VSLB3940, TSUS4300, and TSAL4400
- Compliant to RoHS Directive 2002/95/EC and in accordance to WEEE 2002/96/EC

TEFD4300 is a silicon PIN photodiode with high radiant sensitivity in clear, T-1 plastic package. It is sensitive to visible and near infrared radiation.

AMPLIFIED, MODULATED PHOTOMICROSENSORS

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

Features:
- Operating Voltage: 12-24VDC
- **Mfg. Part No. EE-SPX301** Operating Voltage: 5-24VDC
- Output: NPN, 80mA Max.
- Response Frequency: 500Hz
- Optically Modulated to Minimize Interference
- Large Slot Width
- LED Status Indicator, Off When Object Detected

Use Connector and Converter options EE-1001, EE-1006, EE-1006A, and EE-2002 on page 1398.

Mfg. Part No.	Slot Width	Slot Depth	Output	Dimensions H	Dimensions W	Dimensions D	Stock No.	Price Each 1-4	Price Each 5-9
EE-SPX301	3.6mm	9mm	Dark-On	1.24" (31.5mm)	1.02" (26mm)	0.28" (7mm)	16F7249	52.85	51.51

(68283)

AMPLIFIED PHOTOMICROSENSORS, PREWIRED

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

Fig. 1 Fig. 2 Fig. 3

Features:
- Operating Voltage: 5 - 24VDC
- Output: NPN, 100mA Max.
- Response Frequency: 1kHz
- LED Status Indicator, Off When Object Detected
- Standard M3 Screw Mounting

Prewired 2m flexible cable connection. *To order units with LED status indicator ON when object detected, add suffix* **"A"** *to mfg. part no.; for PNP, add suffix* **"P"**. *For PNP with LED ON when object detected, add suffix* **"R"**. ULCanadian/USA recognized, CE compliant.

(68285)

AMPLIFIED COMPACT PHOTOMICROSENSORS, PREWIRED

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

Features:

- Prewired Compact Sensing Head for Easy Mounting in Space-Confined Areas
- Light Modulation Effectively Reduces External Light Interference
- Easy-to-Use Photomicrosensor with Cable Attached
- Wide Operating Voltage Range: 5 to 24VDC
- Optical Axis Monitoring with a Light-ON Indicator
- Amplifier's NPN Output Can Be Directly Connected to a TTL and Programmable Controller
- Incorporates Dust-Proof Slit
- Detects an Object with 0.5mm Diameter
- Dimensions in inches (mm): 0.61H x 1.07L x 0.27 (15.5 x 27.2 x 6.95)

Mfg. Part No.	Slot Width (mm)	Slot Depth (mm)	Output	Stock No.	Price Each 1-4	Price Each 5-9

AMPLIFIED TRANSMISSIVE PHOTOMICROSENSOR WITH LIGHT MODULATION

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

Features:

- Light Modulation Effectively Reduces External Light Interference
- Easy Adjustment and Optical Axis Monitoring With a Light-ON Indicator
- Operating Voltage: 5 to 24VDC
- Amplifier Output Can Be Directly Connected to a Programmable Controller (PLC)
- Easy-to-Wire Connector Type
- Dimensions: 24H x 26L x 6W (mm)

Mfg. Part No.	Slot Width	Slot Depth	Output	Stock No.	Price Each 1-4	Price Each 5-9
● EE-SPX301	3.6mm	9mm	Dark-On	**16F7249**	52.85	51.51

(73257)

AMPLIFIED, MODULATED PHOTOMICROSENSOR WITH LONG SENSING DISTANCE

RoHS Compliant Available

OMRON AUTOMATION & SAFETY

Features:

- Long Sensing Distance With Built-in Amplifier and Light Modulation
- Light Modulation Effectively Reduces External Light Interference
- Easy Adjustment and Optical Axis Monitoring With a Light-ON Operation Indicator
- Wide Operating Voltage Range (5 to 24VDC) Makes a Smooth Connection Possible With TTLs, Relays and Programmable Controllers (PLCs)
- Easy-to-Wire Connector Assures Ease of Maintenance
- 100Hz Response Frequency
- Light Source: GaAs Infrared LED (Pulse-Modulated) With a Wavelength of 940nm
- Dark-ON Output Configuration Also Available; *Go online or call*
- *Use Connectors* **EE-1002**, **EE-1003** and **EE-1003A** and Reflector **E39-R1** *on this page*

- Class IIIB VCSEL
- Digital ouput
- Depth of field: 4.5mm ±0.5mm (0.180″ ±0.20″)
- Focal length: 4.5mm (0.180″)
- Allows measurement with no contact
- Resolution: 0.254mm (0.010″)
- Pin termination

The **HOA6480 series** is a reflective barcode sensor that incorporates a VCSEL (Vertical Cavity Surface-emitting Laser) emitter and phototransistor detector in a custom-molded plastic package. The VCSEL technology allows the sensor to operate with a very low drive current. The phototransistor drives an operational amplifier with an open-collector output, providing users with flexibility in their interface designs.

REFLECTIVE OPTICAL SENSOR WITH PIN PHOTODIODE OUTPUT

RoHS Compliant Available

VISHAY

Applications
- Proximity sensor
- Object sensor
- Motion sensor

Features:
- Operating distance 2mm to 40mm
- High intensity IR emitter, 950 mm
- High light to voltage linearity
- High sensitivity PIN Photodiode
- IR band pass filter
- Crosstalk barrier

Diemenions are shown in (mm).

Mfg. Part No.	Description	Stock No.	Price Each 1-9
● TCND5000	Reflective Optical Sensor with PIN Photodiode Output — LF	23K1221	2.23

(84112)

PROXIMITY AND AMBIENT LIGHT SENSOR

RoHS Compliant Available

VISHAY

Features:
- Package type: surface mount
- Dimensions (L x W x H in mm): 3.95 x 3.95 x 0.75
- Integrated infrared emitter, ambient light sensor, proximity sensor, and signal conditioning IC
- Interrupt function
- Supply voltage range IR anode: 2.5 V to 5 V
- I2C Bus H-level range: 1.7 V to 5 V
- Floor life: 168 h, MSL 3, acc. J-STD-020
- Low stand by current consumption: 1.5 µA
- Compliant to RoHS Directive 2011/65/EU and in accordance to WEEE 2002/96/EC

The **VCNL4010** is a fully integrated proximity and ambient light sensor. Fully integrated means that the infrared emitter is included in the package. It has 16 bit resolution. It includes a signal processing IC and features standard I2C communication interface. It features an interrupt function.

VCSEL FOR DATACOM APPLICATIONS

RoHS Compliant Available

TT electronics — OPTEK Technology

Features:
- Applications in Datacom, Telecom, and Sensor Markets
- Data rates Up to 2.5 Gbps
- Low drive current, high power density
- Monitor photodiode included
- Components have narrow and circularly symmetric beam angle

Fig. 1 Fig. 2

FIBER-OPTIC LC 3.3V TRANSCEIVERS (CONT.)

Mfg. Part No.	Data Rate (MBd)	Distance (m)	Wavelength (nm)	Pin-Out	Stock No.	Price Each 1-9
High-performance transceivers for serial optical data communications at 2488Mb/s. Single-mode fiber modules are designed to provide SONET/SDH-compliant links. The transmitter section incorporates an FP laser. Applications includes SONET/SDH equipment interconnect, OC-48/SDH STM-16 rate and short-reach ATM/SONET links. Nominal operating wavelength: 1300nm. Operating temperature range: 0°C to +70°C. Meet full IEC 825 and CDRH Class 1 safety standards.

1300nm DISCRETE OPTICAL COMPONENTS

RoHS Compliant Available

AVAGO TECHNOLOGIES

Applications:
- Desktop Links for High-Speed LANs
- Distance Extension Links
- Telecom Switch Systems
- TAXIchip® Compatible
- FDDI Concentrators, Bridges, Routers, and Network Interface Cards
- 100 Mbps ATM Interfaces
- Fast Ethernet Interfaces
- General-Purpose, Point-to-Point Data Communications

HFBR-1312TZ

➤ CONTINUED ➤

1300nm DISCRETE OPTICAL COMPONENTS (CONT.)

HFBR-1312TZ/2316TZ: Transmitter and receiver provide low-cost fiber-optic links. Signal rates over 155 megabaud. Link distances over 5km. Dual-in-line package panel-mountable ST® and SC connector receptacles. Auto insertable and wave-solderable. Specified with 62.5/125 5m and 50/125 5m fiber. Compatible with **HFBR-0400 series**, also available; *go online or call.*

HFBR-1115TZ/2115TZ: Full compliance with the optical performance requirements of the FDDI PMD® standard, the ATM 100-Mbps physical layer and the 100-Mbps fast Ethernet physical layer. Compact 16-pin DIP package with plastic ST® connector. Wave-solder and aqueous wash process compatible package. Manufactured in an ISO 9001 certified facility. Other versions available for ATM and fiber channel; *go online or call.*

DISCRETE OPTICAL COMPONENTS - 1300nm

Mfg. Part No.	Data Rate (MBd)	Distance (m)	Connector	Stock No.	Price Each 1-9

FIBER OPTIC TRANSCEIVERS MT-RJ PACKAGE

RoHS Compliant Available

AVAGO TECHNOLOGIES

Avago's MT-RJ transceivers are suitable for LAN use and utilize the established MT ferrule design with RJ-45 style connector. MT-RJ fiber connector is half the size of a standard SC-duplex module. This allows system designers to double the port density on a typical system blade, significantly reducing the cost-per-port to customers. Transceivers have industry-standard multisource footprint with common electrical-optical pinout functionality, operating at 3.3V. 2x5 DIP package.

FIBER OPTIC TRANSCEIVERS - MULTIMODE MT-RJ

MULTIMODE HFBR-x0400 SERIES MINIATURE LINK PACKAGE

RoHS Compliant Available

AVAGO TECHNOLOGIES

Transmitters Receivers

DISCRETE OPTICAL TRANSMITTERS- MINIATURE LINK

HFBR-14x2Z/14x4Z fiber optic transmitters contains an 820nm AlGaAs emitter capable of efficiently launching optical power into 4 different optical fiber sizes: 50/125µm, 62.5/125µm, 100/140µm and 200µm HCS®. This allows the designer flexibility in choosing the fiber size. **HFBR-14xxZ series** transmitters are designed to operate with Avago's **HFBR-24xxZ series** fiber optic receivers; *ordered separately below.* Application notes are available with circuit recommendations for operation from DC to 160 MBd transmitter; *go online or call.*

Mfg. Part No.	Connector	Stock No.	Price Each 1-9
● HFBR-1424Z	FC	74K5142	21.63
● HFBR-1402Z	SMA	71K0257	21.63

● HFBR-1415TZ	ST	74K5140	21.63

DISCRETE OPTICAL RECEIVERS - MINIATURE LINK

HFBR-24x2Z 820nm fiber optic receivers are designed to operate with Avago's **HFBR-14xx series** fiber optic transmitters, *ordered separately above* and 50/125µm, 62.5/125µm, 100/140µm and 200µm HCS® fiber optic cable, also available; *go online or call.* Consistent coupling into the receiver is assured by the lensed optical system. Response does not vary with fiber size ≤ 0.100µm.

AFBR-24x9Z 50 MBd Miniature Link Fiber Optic Receivers are designed to operate with Avago's **HFBR-14xx series** fiber optic transmitters. Provides cost effective, high performance fiber optic communication links for information systems and industrial applications with link distances of up to 3 km. The receivers are directly compatible with popular "industry-standard" connectors: ST® and SMA. They are designed for use with 62.5/125 ìm multi mode fiber.

PLASTIC OPTICAL FIBER CABLE FOR VERSATILE LINK PRODUCTS

RoHS Compliant Available

AVAGO TECHNOLOGIES

Compatible with Avago Versatile Link Family of connectors and fiber optics components. 1mm diameter plastic optical fiber (POF) in 2 grades: Low-cost standard attenuation POF (R) and high-performance low loss POF (E). Available with simplex connectors (N), duplex connectors (M) and unconnectored (U).

PLASTIC OPTICAL FIBER CABLE

Mfg. Part No.	Length (m)	Grade	Cable Connector Styles	Stock No.	Price Each 1-9
HFBR-RNS001Z	1	Standard Attenuation	Simplex Connectored	71K0248	6.87

There's a certain energy at Eaton. It's the power of uniting some of the world's most respected names to build a brand you can trust to meet your every power management need.

Eaton is dedicated to ensuring that reliable, efficient and safe power is available when it's needed most. Building on over 100 years of experience in electrical power management, the experts at Eaton deliver customized, integrated solutions to solve your most critical challenges. GAS DISCHARGE TUBES

2030-XXT-SM SERIES FAST ACTING 3-ELECTRODE MINIATURE GAS DISCHARGE TUBES

RoHS Compliant Available

BOURNS®

- Size: 5 mm diameter, 7.3 mm length
- Very fast acting
- Small size
- Stable breakdown throughout life
- Designed to operate with TBU® devices
- RoHS compliant versions available
- UL Recognized

Mfg. Part No.	DC Sparkover @ 100V/s	Impulse Sparkover (5kV 1.2/50Us)	Stock No.	Price Each 1-9
● 2030-23T-SMLF	80V	650V	94T5234	2.60
● 2030-42T-SMLF	135V	850V	94T5235	3.04

SA2 SERIES HIGH VOLTAGE GAS DISCHARGE TUBES

RoHS Compliant Available

BOURNS®

- High insulation resistance
- Quick response, long service life
- Available DC breakdown range: 2.4 kV to 7.2 kV
- Wide operating temperature range
- RoHS compliant

Bourns® **SA2 Series** two-electrode High Voltage Gas Discharge Tube devices are designed for high isolation applications. The series offers high insulation resistance over a wide temperature range and is offered with DC breakdowns from 2.4 kV to 7.2 kV.

Mfg. Part No.	DC Breakdown Voltage Typ. (500V/s)	Impulse Breakdown Max.	Nominal Impulse Discharge	Stock No.	Price Each 1-9
● SA2-3000-CLT-STD	3kV	4.5kV	5kA	53W9955	2.88

2057 SERIES LIGHT DUTY 2-ELECTRODE MINIATURE GAS DISCHARGE TUBES

RoHS Compliant Available

BOURNS®

- Compact size: 5.5 mm diameter, 6 mm length
- Low capacitance
- Low leakage
- RoHS compliant
- UL Recognized

Mfg. Part No.	DC Sparkover ±20% @ 100V/s	Impulse Sparkover 1000 V/us	Impulse Discharge Current 8/20us, 10 operations	Stock No.	Price Each 1-9
2057-09-BLF	90V	700V	5kA	52W8976	0.70

2056 SERIES LIGHT DUTY 3-ELECTRODE GAS DISCHARGE TUBES

RoHS Compliant Available

BOURNS®

- Compact size: 6 mm diameter, 8 mm length
- Low capacitance and insertion loss
- Switch-Grade Fail-Short option available
- RoHS compliant
- UL Recognized

Mfg. Part No.	DC Sparkover ±20% @ 100V/s	Impulse Sparkover 1000 V/us	Impulse Discharge Current 8/20us, 10 operations	Stock No.	Price Each 1-9
2056-09-B2LF	90V	850V	5kA	52W8926	1.46
2056-23-B2LF	230V	700V	5kA	52W8941	1.46

2056-60-B2LF	600V	1kV	5kA	52W8971	1.46

(209583)

2053 SERIES LIGHT DUTY 2-ELECTRODE MINIATURE GAS DISCHARGE TUBES

RoHS Compliant Available

BOURNS®

- Size: 4 mm diameter, 4.2 mm length
- Mini-surface mount footprint
- Low capacitance
- High insulation resistance
- RoHS compliant
- UL Recognized

Mfg. Part No.	DC Sparkover ±20% @ 100V/s	Impulse Sparkover 1000 V/us	Impulse Discharge Current 8/20us, 10 operations	Stock No.	Price Each 1-9
2053-09-SM-RPLF	90V	800V	3kA	52W8915	0.78
2053-23-SM-RPLF	230V	700V	3kA	52W8917	0.78

(209563)

2052 SERIES LIGHT DUTY 3-ELECTRODE SYMMETRICAL GAS DISCHARGE TUBES

RoHS Compliant Available

BOURNS®

- Size: 5 mm diameter, 7.2 mm length
- Surface mount design
- Symmetrical breakdown voltage (L-L, L-G)
- Low capacitance and insertion loss
- UL Recognized
- RoHS compliant

Mfg. Part No.	DC Sparkover ±20% @ 100V/s (L-L, L-G)	Impulse Sparkover 1000 V/us	Impulse Discharge Current 8/20us, 10 operations	Stock No.	Price Each 1-9
2052-23-SM-RPLF	230V	700V	5kA	52W8906	1.44
2052-35-SM-RPLF	350V	750V	5kA	52W8908	1.44
2052-40-SM-RPLF	400V	800V	5kA	52W8909	1.44
2052-47-SM-RPLF	470V	900V	5kA	52W8911	1.44

(209582)

2045 SERIES MEDIUM DUTY 2-ELECTRODE GAS DISCHARGE TUBES

RoHS Compliant Available

BOURNS®

- Size: 8 mm diameter, 6 mm length
- Low capacitance
- High insulation resistance
- RoHS compliant
- UL Recognized

Mfg. Part No.	DC Sparkover ±30% @ 100V/s	Impulse Sparkover 1000 V/us	Impulse Discharge Current 8/20us, 10 operations	Stock No.	Price Each 1-9
2045-09-BLF	90V	600V	10kA	52W8862	0.81

SPARCTUBE™ SWITCHING SPARK GAPS

RoHS Compliant Available

BOURNS®

- Fast switching rate
- High energy, low loss capability
- Wide operating temperature range
- Long service life
- High insulation resistance
- RoHS compliant

The **ST series** is a switching spark gap device that features breakdown voltages between 350 V and 1000 V including the most utilized versions of 800 V and 840 V, which are ideally suited for automotive HID Xenon headlight applications. Characterized by long-term reliability and high temperature performance, the **Sparctube™ ST series** is designed specifically for voltage controlled switching of capacitive discharge circuits where high energy, low loss and a fast rate of switching are required.

2-POLE SURFACE MOUNT GAS DISCHARGE TUBES

RoHS Compliant Available

Littelfuse® Expertise Applied | Answers Delivered

- GHz working frequency
- 1-2KA surge capability tested with 8/20µs pulse as defined by IEC 61000-4-5
- Non-radioactive
- Low capacitance (<1pF)
- Voltage ranges from 75V to 420V
- UL recognized
- Conforms to ITU-T K12, IEC 1000-4-5
- Square outline (4.5 x 3.2 x 2.7mm)
- **Q suffix** indicates quick response version

GAS DISCHARGE TUBES / SURGE ARRESTERS

RoHS Compliant Available

Littelfuse® Expertise Applied | Answers Delivered

Fig. 1

Fig. 3

Fig. 2

- Small size
- Rugged ceramic-metal construction
- Low capacitance (<1pF)
- Nonradioactive 600-1000V
- Operating temp. : -40°C to +125°C
- Available with or without leads
- UL recognized: File No. E111526
- Meets REA PE-80

Series	Dimensions (mm) Diameter	Body Length	Lead Length
AC	8.1	6.07	38.1
CG/CG2	8.1	6.07	27.96
CG/CG2 MS	8.3	6.05	...

POLYTRON™ SURFACE MOUNT PPTC RESETTABLE FUSES

RoHS Compliant Available

COOPER Bussmann

- 6 to 60 volts
- Current rating from 0.05 to 3.0 amps
- Fast time-to-trip
- Low resistance
- Halogen and lead free
- Operating temperature: -40°C to +85°C
- Surface temperature trip state: 125°C
- Wave solder: 260°C, 10 sec.
- Infrared reflow: 260°C, 10 sec. max.
- Nickel/tin-plated coper terminal
- UL recognized, TÜV approved

1812 Case

1206 Case

PolyTron™ **PTS1812** and **PTS1206 series** surface mount, resettable PPTC devices are ideal for applications such as medical equipment, telecommunications, white goods, computers and peripherals and rechargeable battery packs.

POLYTRON™ RADIAL LEADED THRU-HOLE PTC RESETTABLE FUSES

RoHS Compliant Available

COOPER Bussmann

PTR016V PTR030V PTR060V

- 16V, 30V and 60V DC devices
- Fast time-to-trip
- Low resistance
- Halogen and lead free
- Straight tin-plated leads
- Cured epoxy resin insulator; meets UL94V-0 requirements
- Operating temperature: -40°C to +85°C
- Surface temperature trip state: 125°C
- UL recognized, TÜV approved

PolyTron™ **PTR016V, PTR030V** and **PTR060V series** resettable radial leaded thru-hole PTC devices are ideal for applications such as medical equipment, telecommunications, white goods, and computers and peripherals. **PTR030V** and **PTR060V series** devices also used for industrial power transmission applications, consumer and automotive electronics and rechargeable battery packs.

POLYFUSE® LoRho SERIES RESETTABLE PTCs

RoHS Compliant Available

Littelfuse
Expertise Applied | Answers Delivered

c UL us

- Ultra low internal resistance
- Very thin profile
- Miniature size saves board space
- Allows a higher hold current dvice in a smaller factor and lower profile as compared to a standard PPTC
- Fast response to fault currents
- 0402 size available - the smallest PPTC in the marketCompatible with high temperature solders
- Broadest range of Hold Current ratings (100mA to 7A)
- RoHS compliant, Lead Free and Halogen Free
- UL and TUV recognized
- 0603L150SL ideal for USB 3.0

Littelfuse **LoRho™** Surface Mount PPTC devices provide overcurrent protection for applications where ultra low internal resistance, ultra low voltage drop and automatic resettable protection are desired. This new series allows a higher hold current device in a smaller factor and lower profile as compared to a standard PPTC. It offers ultra low internal resistance while maintaining the high level electrical characteristics and performances of standard PPTC products. All devices are UL and TUV recognized and have maximum fault current of 50A. They are available in 0402 to 2920 sizes while the hold current ranges from 100mA to 7A. Littelfuse 0402 size **LoRho™** SMD PPTC is the smallest size surface mounted PPTC device available in the market. "TH" in mfg. part no. indicates thin profile.

1210L / 1812L

2920L

1210L and 1812 series low-profile, low resistance surface mount fuses have a compact design to save board space. Feature fast response to fault currents and are compatible with high temperature solders. **2920L series** low-profile, high voltage surface mount fuses feature fast response to fault currents. **250R and 600R series** radial leaded fuses feature fast time-to-trip. **600R series** also available in ammo pack. Full reel versions also available; *go online or call*.

RAYCHEM/POLYSWITCH THRU-HOLE PTC RESETTABLE FUSES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Can be used in a wide variety of automotive, computer, and general electronics applications
- High-current carrying capability (up to 11 amps) in a small package with fast trip times
- Current rating: 100A max.; use for hold currents up to 14A
- Operating voltage: 16V
- Typical activation temperature: 125°C
- Thermal derating medium

RAYCHEM/POLYSWITCH THRU-HOLE PTC RESETTABLE FUSES

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Provide a smaller form factor with lower resistance and higher hold current capability (up to 9 amps)
- Current rating: 40A max.
- Operating voltage: 30V
- Typical activation temperature: 125°C
- Thermal derating: medium
- UL recognized, CSA certified, TÜV approved
- Also available on tape & reel; *go online or call*

EYP SERIES THERMAL CUTOFFS (TCO) / THERMAL-LINKS

RoHS Compliant Available

Panasonic

Features:
- Compact and insulated
- Quick temperature response
- Mountable in a small space without insulation or protection
- High reliability — opens reliably when the equipment becomes abnormal, and is not resettable
- Solid structure — unique formed lead provides reliable TCO connection and provides easy assembly handling
- UL recognized, CSA certified, VDE, BEAB, CCC, JET approved

Applications:
- Transformers, solenoids, ICs
- Ventilation fans, electric fans
- Small electric motors
- Driers, gas home appliances, heating devices
- Fluorescent lights
- Adapters,bBatteries
- For overheating protection

ELECTRICAL RATING: 250VAC, 50VDC, AXIAL LEADED

MICROTEMP® THERMAL FUSES

RoHS Compliant Available

THERMODISC

Nonresettable axial fuses are designed to provide upper-limit temperature protection on all industrial appliances. Microtemp® thermal cut-off opens immediately when the internal temperature reaches the maximum rated temperature. Fuse is not resettable and should be replaced after opening. Rating: 10A @ 250VAC. Breakdown voltage when open: 1200VAC. Body length: 0.58" (14.7). Body diameter: 0.16" (4.0). Lead diameter: 0.04" (1.0).

SLIMLINE VERY FAST-ACTING THIN-FILM FUSES

SMD

RoHS Compliant Available

Littelfuse

Expertise Applied | Answers Delivered

EIA size 0402 SlimLine fuses are the smallest available and ideal for space sensitive applications. Interrupting ratings: 35A@32VDC. Body material: epoxy substrate; terminations: copper/nickel/tin-lead, cover coat: conformal coating. Soldering parameters: reflow solder — 260°C, 30 seconds maximum. Operating temperature: -55°C to 90°C.

NANO2® 485 SERIES SURFACE MOUNT FUSES

RoHS Compliant Available

Littelfuse

Expertise Applied | Answers Delivered

UL CSA

- Fast Acting / Surface mount high fuse for high voltage (up to 600VDC) applications
- Fully compatible with lead-free solder alloys and higher temperature profiles associated with lead-free assembly
- Relatively high breaking capacity at 100A
- RoHS compliant / Halogen Free
- Rating – 1 to 3.15A

The **485 Nano2** Fuse Series is a small, fast acting, surface mount ceramic fuse rated at a remarkable 600VDC at its small size and with 100A breaking capacity. It is primarily designed for circuit protection in high energy applications. This product is fully compatible with lead-free solder alloys and higher temperature profiles associated with lead-free assembly.

OMNI-BLOK® FUSE BLOCKS WITH FUSES

RoHS Compliant Available

Littelfuse

Expertise Applied | Answers Delivered

SMD

- Permits quick and easy replacement of NANO²® surface mount fuses
- Fuse replacement accomplished without exposing the PC board to the detrimental side effects of solder heat
- Soldering parameters (fuse installed): 500°F (260°C), 30 sec.
- Solderability: MIL-STD-202, method 208
- Dimensions (H x W x L): 3.81 x 5.03 x 9.73mm
- Fuse block is not UL recognized
- **Sold on tape & reel**
- *See more Omni-blok® fuse blocks online or call for our complete line*

TIME-DELAY SUBMINIATURE THRU-HOLE FUSES

RoHS Compliant Available

COOPER Bussmann

SS-5 series radial leaded fast-acting thru-hole fuses are internationally accepted for primary and secondary overcurrent protection. Designed to UL 248-14. Can be placed directly into PC board or plugged into **mfg part no. PCS-R** fuseholder; *order separately below.* Solderability: EIA-186-9E, Method 9. High frequency vibration: MIL-STD-202F, Method 201A. Pins are tin plated copper. Compatible with leaded and lead-free reflow and wave solder. UL recognized, CSA, VDE (500mA-4A), SEMKO, CQC, PSE (1-5A).

TE5® TIME-DELAY SUBMINIATURE FUSES

RoHS Compliant Available

Littelfuse

Expertise Applied | Answers Delivered

- Direct solderable or plug-in versions
- Low internal resistance
- Breaking capacity: 130A @ 250VAC
- Rated at 250V
- Temp. rating: -40°C to +125°C

% of Ampere Rating	Opening Time
150	1 Hour Minimum
210	120 Secs Maximum
275	400 ms Minimum, 10 Secs Maximum
400	150 ms Minimum, 3 Secs Maximum
1000	20 ms Minimum, 150 ms Maximum

Sold in tape/ammopack (0000 suffix) or with short leads in bulk (0440 suffix).

RADIAL LEAD FUSES

TE7 807 SERIES TIME LAG RADIAL LEAD FUSES

RoHS Compliant Available

Littelfuse
Expertise Applied | Answers Delivered

- Lead-free and RoHS compliant
- Reduced PCB space requirements
- Direct solderable or plug-in versions
- Low internal resistance
- Shock safe casing
- Vibration resistant
- Halogen free

TE7 807 Series is a time lag type sub-miniature fuse designed for overcurrent protection. It is 300V rated and designed in accordance to IEC 60127-4.

Mfg. Part No.	Current	Voltage	Voltage	Stock No.	Price Each 1-999
● 80708000000	800mA	300V	100A @ 300V AC	91T4560	1.25
● 80711000000	1A	300V	100A @ 300V AC	91T4562	1.25

WICKMANN TE5® TIME-DELAY PC BOARD FUSES

RoHS Compliant Available

Littelfuse
Expertise Applied | Answers Delivered

- IEC 60127-3/IV standard
- VDE expert report, SEMKO, cULus recognized, METI-PSE, CCC, CQC approvals
- 250V voltage rating
- 5.08mm lead pitch
- Temp. range: -40°C to +85°C

Order fuse holders separately online or call. **Sold in tape/ammopack (0000 suffix) or bulk (0440 suffix).**

WICKMANN TR5® FAST-ACTING PC BOARD FUSES

RoHS Compliant Available

Littelfuse® Expertise Applied | Answers Delivered

- IEC 60127-3/III standard
- VDE, SEMKO, cULus recognized, METI-PSE, CCC approvals
- 250V voltage rating
- 5.08mm lead pitch
- Temp. range: -40°C to +85°C

Order fuse holders separately; *go online or call.* **Sold in tape/ammopack (000 suffix), with short leads in bulk (041 suffix) or with short leads in tape/reel (043 suffix).**

PICO® II VERY FAST-ACTING AXIAL LEAD FUSES

RoHS Compliant Available

Littelfuse

Expertise Applied | Answers Delivered

HF

251 series PICO® II very fast-acting axial lead fuses is designed to meet an extensive array of performance characteristics in a space-saving subminiature package. Interrupting rating: 300A at 125VDC, 50A at 125VAC. Available in rating of .0625 to 15A. Body material: encapsulated, epoxy-coated. 0.28" body length, 0.095" body diameter, 1.5" lead length, 0.025" lead diameter. Packaging tape & reel per EIA-296. UL recognized, CSA certified.

- Solder coated copper wire leads
- Encapsulated, epoxy-coated body
- 50A @ 125VAC interrupt rating
- 300A @ 125VDC interrupt rating (very fast-acting)
- 50A @ 125VDC interrupt rating (slow-blow)
- Operating temp.: -55°C to +125°C
- Dimensions (Dia. x L): 2.8 x 38.1mm

3AB FAST-ACTING CARTRIDGE FUSES

RoHS Compliant Available

Littelfuse® Expertise Applied | Answers Delivered

- 250 VAC
- UL listed (0.125A - 15A)
- UL recognized (20A - 30A)
- CSA certified (0.125A - 20A)
- CE compliant (0.125A - 30A)

3AB fast-acting cartridge fuses permit higher interrupting rating and voltage rating. Ideal for applications where high-current loads are expected. Ceramic body. Available ratings: 0.125 to 30A. Interrupting ratings: 0.125-20A, 10,000A at 125 VAC, 20-30A at 400A at 250 VAC, 0.125-0.75A , 35A at 250 VAC, 1-3A, 100A at 250 VAC, 4-15A, 750A at 250VAC, 20A, 1,000A at 250VAC, 200A at 300 VAC, 25-30A, 100A at 250 VAC.

312P SERIES 3AG FAST-ACTING CARTRIDGE FUSES

RoHS Compliant Available

Littelfuse® Expertise Applied | Answers Delivered

- UL listed (8 - 30A)
- CSA certified (8 - 30A)
- CE compliant

312P series 3AG fast-acting cartridge fuses meet a broad range of circuit protection applications. Glass body. Available ratings: 0.032 to 30A.

5 x 20mm FAST-ACTING CARTRIDGE FUSES

RoHS Compliant Available

Littelfuse® Expertise Applied | Answers Delivered

Leaded

Unleaded

- 32mA to 15A current ratings
- 250V voltage rating
- 35A interrupting rating
- Designed to international IEC standards
- Meets the IEC 60127-2, Sheet 2 specifications for fast-acting fuses

UL recognized (32mA - 6.3A), CSA certified (32mA - 6.3A), CE compliant (50mA - 15A), British BSI licence (400mA - 6.3A) SEMKO approved (32mA - 6.3A). More axial lead current ratings available; *go online or call.* **Sold in bulk.**

ELECTRONIC CARTRIDGE FUSES

3AB FAST-ACTING AXIAL-LEAD TYPE FUSES

RoHS Compliant Available

Littelfuse
Expertise Applied | Answers Delivered

- 250 VAC
- UL Listed (0.125A - 15A)
- UL Recognized (20A - 30A)
- CSA Certified (0.125A - 20A)
- CE Compliant (0.125A - 30A)

324P series 3AB fast-acting axial-lead fuses permits higher interrupting rating and voltage rating. Ideal for applications where high current loads are expected. Ceramic body. Available rating: 0.125 to 30A. Interrupting rating: 0.125-20A, 10,000A at 125 VAC, 20-30A at 400A at 250 VAC, 0.125-0.75A , 35A at 250 VAC, 1-3A, 100A at 250 VAC, 4-15A, 750A at 250VAC, 20A, 1,000A at 250VAC, 200A at 300 VAC, 25-30A, 100A at 250 VAC. RoHS compliant.

5 x 20mm SLO-BLO® CARTRIDGE FUSES

RoHS Compliant Available

Littelfuse

Expertise Applied | Answers Delivered

Leaded

Unleaded

- 20mA to 6.3A
- 250V
- 35A interrupting rating
- Glass body material
- Meet IEC 60127-2, Sheet 3 specifications for time-lag fuses

E suffix indicates leaded fuse. UL recognized, CSA certified, CE compliant, British BSI licence, SEMKO approved. **Sold in bulk.**

350V 2AG FUSES

RoHS Compliant Available

Littelfuse® Expertise Applied | Answers Delivered

- 350VAC voltage rating
- 100A max. interrupting current
- Glass body
- Nickel-plated brass caps
- Tin-plated copper leads
- Temp. range: -55°C to +125°C

Sold individually in bulk.

BUSS® 140-PIECE FUSE KIT

COOPER Bussmann

140-piece assortment of ¼ × 1¼″ fuses includes 1/2A to 30A fuses, plus 2 fuse holders, fuse clips and 1 fuse puller. Rugged nylon case with positive closure. Ideal for factory or field-service use.

Mfg. Part No.	Description	Stock No.	Price Each 1-4
NO. 140	¼ x 1¼″ Fuse Kit	89F1893	505.89

(2327)

BUSS® 270-PIECE FUSE KIT

COOPER Bussmann

Diverse kit contains 59 different products including 270 fuses: ¼ x 1¼″ and 5 x 20mm fuses in the ⅛ to 30A range; small dimension 125V and 250V fuses; fast-acting, time-delay and axial-leaded fuses; 7 fuse holders and fuse clips. Clear-plastic case. Comes with complete application and cross-reference data.

HIGH-SPEED SEMICONDUCTOR FUSES

RoHS Compliant Available

COOPER Bussmann

Cartridge style high speed fuses are rated 500V and available from 250mA to 200A. Stud mount high speed fuses are rate 500V and available from 35A to 1600A. High speed fuses protect SCRs, diodes and other semiconductor devices. UL recognized, CSA approved (0.25-7A).

CUBEFUSE® PANEL MOUNT FAST-ACTING FUSES

RoHS Compliant Available

COOPER Bussmann®

- Maximize uptime and reliability using fuses designed and listed to UL 2579 (low voltage fuses - fuses for 600VDC photovoltaic systems)
- Fast-acting protection specifically designed for low-fault current conditions that occur in PV systems
- Maximize return on investment with fuses proven to withstand harsh temperatures; demonstrated performance in extreme temperature cycling conditions, ranging from -40°C through 90°C
- Minimize panel space by up to 70% with readily available Class CF holders
- Proven to clear faults faster than the UL requirement
- Minimal energy consumption leading to increased efficiency
- Ampacity rejecting holders help prevent overfusing
- Finger-safe construction minimizes exposure to live parts, reducing hazard to personnel

ELECTRICAL POWER FUSES

CUBEFUSE® PANEL MOUNT FAST-ACTING FUSES

RoHS Compliant Available

COOPER Bussmann

- Finger-safe power fuse system
- Smallest footprint of any class fuse including Class J, CC, T and RK
- Class CF meets Class J fast-acting electrical performance requirements
- Faster response to damaging faults to help reduce destructive thermal and magnetic forces
- True fast-acting fuse construction
- High interrupting rating to safely interrupt faults up to 300kA
- No venting of arc or molten metal and gases during opening
- Low let-through currents under fault conditions

True, finger-safe fast-acting fuse construction delivers faster response to damaging faults to help reduce destructive thermal and magnetic forces. Ideally suited for protecting Uninterruptable Power Supplies (UPS) and other critical applications that benefit from fast-acting fuse protection.

CLASS CC TIME-DELAY 13/32 x 1½" LOW-PEAK® TIME-DELAY FUSES

COOPER Bussmann

LP-CC series 13/32" x 1½" (10.3mm x 38.1mm) time-delay fuses are all-purpose, space-saving branch circuit fuses that meet most protection requirements up to 30A. Feature faster response to short-circuit currents and higher interrupting rating than mechanical overcurrent protective devices. Rated: 600VAC. Ratings available from ½-30A.

CLASS G TIME-DELAY FERRULE FUSES

RoHS Compliant Available

COOPER Bussmann

SC series time-delay ferrule fuses are ideal for branch and supplementary protection. 13/32" fuse diameter; length varies with electrical rating. Interrupting rating: 100,000AIC. Ampere rating: 7-60A (time-delay). Voltage ratings: 480VAC, 300VDC except **mfg. part nos. SC-10, SC-15** and **SC-20** (600VAC, 170VDC). 600V rating: can be used in 120/208, 120/240 and 277/480 volt circuits. **SC** fuses are about ½ the size of 600V NEC fuse type. Ampere ratings above 6A have a degree of overload time-delay which permits them to pass temporary overloads. At 200% load, they have a minimum opening time of 12 seconds. UL listed, Class G. CSA certified.

Mfg. Part No.	Current (A)	Length	Stock No.	Price Each 1-4	5-9

CLASS J 600V DUAL ELEMENT TIME DELAY FUSES

COOPER Bussmann

- Dual element with minimum 10 second delay at 500% overload
- Protects against motor burnout from overload
- Faster response than mechanical overcurrent protective devices
- Lower watts loss reduces power consumption
- Space saving package for equipment down sizing

Knife Blade

Cartridge

Rated at 600VAC (or less), and from 1 to 600 A. Use Class J fuseblock; **J600 series**. UL listed, CSA certified, Class J.

DIMENSIONS

Amps	Fuse Size (in.)
1-30	2.25 x 0.81
35-60	2.38 x 1.06
70-100	4.63 x 1.13
110-200	5.75 x 1.63
225-400	7.126 x 1.625
450-600	8.0 x 2.6

LOW-PEAK® CUBEFUSE® DIN MOUNT TIME-DELAY FUSES & FUSE HOLDERS

RoHS Compliant Available

COOPER Bussmann

- Finger-safe industrial fuse system
- Meet UL Class J performance
- Type 2 "no damage" protection for IEC motor starters when properly sized
- Dual-element time-delay
- Long time delay to minimize nuisance circuit openings from temporary overloads and transient surges
- Interrupt faults to 300kA at 600VAC (100kA at 300VDC)
- No venting of arc or molten metal and gasses during opening
- Small footprint, low power consumption

Fuse

Fuse Holder

Provides true dual-element fuse construction with minimum 10-sec. time-delay @ 500% of rating. Time delay allows for back-up protection against motor burnout from overload or single phasing if other overload devices fail.

P&B FUSEHOLDER TYPE CIRCUIT BREAKERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Approved to many international standards
- Replaces slow blow glass cartridge fuse
- Labor-saving snap-in mounting
- Button extends for visual trip indicator
- Pushbutton to reset breaker

Recommended Panel Cutouts

SPECIFICATIONS

Calibration	Will continuously carry 100% of rated load. 3-15A models—may trip between 101% and 134%, but must trip at 135% of rating within one hour at +25°C. 0.25-2 amp models—may trip between 101% and 174%, but must trip at 175% of rating within one hour at +25°C.
Dielectric Strength	Over 1,500Vrms
Maximum Operating Voltages	32VDC; 250VAC, 50/60Hz
Interrupt Capacity	1,000A at 250VAC, 50/60Hz and 32VDC in accordance with UL standard 1077.
Resettable Overload Capacity	6 times rated current for 0.25-2A models. 10 times rated current for 3-15A models.
Reset Time	180 seconds max. for 0.25-2A models. 10 to 60 seconds for 3-15A models.
Termination	0.250″ (6.35) quick connects. Soldering to terminals is not recommended.
Mounting	Snaps into panel from front. See recommended panel cutouts.
Approximate Weight	0.35 oz. (10 g)

The **W28 series** is a single-pole, thermal circuit breaker featuring a reset button which cannot be manually pulled to disconnect the load. On an overload, the reset button opens and a white indicator extends for visual trip indication. Ideal for replacement of slow-blow glass cartridge fuses. Snaps in panels up to 0.062″ (1.57mm) thick. and 0.105″ (2.667mm) thick. Maximum operating voltage is 250VAC or 32VDC. Trip times shown in table are at 200% of load and +25°C. UL recognized (File E69543), CSA certified (File LR15734), VDE approved, DEMKO approved, SEV approved.

P&B W33 THERMAL CIRCUIT BREAKERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- 2 to 20A ratings
- 1- or 2-pole sensing
- Lighted or non-lighted rocker actuator

Specification	Description
Calibration	Will continuously carry 100% of rated load. May trip between 101% and 135% of rated load, but must trip at 135% within one hour at +25°C.
Dielectric Strength	Over 2,000Vrms.
Maximum Operating Voltages	50VDC; 250VAC to 400Hz.
Interrupt Capacity	1,000A at 50VDC; 250VAC, 60Hz; 125/250VAC, 400Hz; 1,500A at 125/250VAC, 60Hz.
Resettable Overload Capacity	10 times rated current.
Termination	Poles 1 and 2
Mounting	Snaps into panel from front.
Cutout Size	Fits 0.875 x 1.750 (22.22 x 44.45) panel opening from .032-.250″ (0.813-6.35) thick.
Actuator	Rocker or lighted rocker.
Shock	30g tested to IEC 68-2-27, test Ea.
Vibration	8g tested to IEC 68-2-6, test Fc.
Endurance Cycling	50,000 operations at rated load; 1,000 operations at 200% rated load.

Current sensing thermal circuit breakers feature models with a single pole breaker and a single pole "on-off" switch and indicator light in one convenient, snap-in mount package. Available with black or white rocker (non-lighted) or with lighted rocker (120VAC neon light with resistor). 0.250 × 0.032″ (6.350 × 0.813) quick connect/solder terminals. International I/O rocker marking. UL recognized (File E695430), CSA certified (File LR15734). Meets requirements of IEC. All are non-lighted. Versions with lighted rocker also available; *go online or call.*

P&B ROCKER-ACTUATED THERMAL CIRCUIT BREAKERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

- Compact, trip-free, rocker-actuated design
- 5A to 20A ratings
- Provides circuit protection and power switching in a single unit
- Indicator lamp standard on listed items
- Snaps into same cutout as many common power switches
- Quick contact terminals, 0.250″ (6.35) straight
- Red translucent rocker
- RESET/OFF marked on bezel

Breakers will continuously carry 100% of rated load. May trip between 101% and 134%, but must trip at 135% within one hour at +25°C. Interrupt capacity: 1000A in accordance with UL standard 1077. Dielectric strength: 1500VAC for 60 sec. Resettable overload capacity is ten times rated load. Reset time: 60 seconds. Operating temperature: 0°C to +60°C. Numerous additional mounting and termination options available; *go online or call.* UL recognized as supplementary protectors under UL 1077, file E69453, in Canada and the United States.

W23

Suggested Panel Cut-Out

W31

Suggested Panel Cut-Outs

W23 and **W31 series** circuit breakers are single-pole, thermal devices. Both units may also be used as a switch. Each breaker has trip-free feature which allows contacts to open on an overload even with toggle or button held in On position. **W23** and **W31 series** will carry 100% of rated load continuously but must trip at 135% of rated load at 25°C within one hour. Both units UL recognized under file E69543, CSA certified under file LR15734. Trip times listed are at 200% rating. **W31 series** units have antirotation flats but also mount in round hole. See suggested panel cut-outs. Dimensions: 2.04L x .690W x 1.38H″

RoHS Compliant Available

TE connectivity

Authorized Distributor

Fig. 1

Fig. 2

Single-pole, thermal-type features recessed reset button. Cannot be manually pulled out to disconnect circuit. Reset button extends when overload occurs and breaker opens; red band appears for visible trip indication. Continuously carries 100% rated load. May trip between 101% and 144% of rated load, must trip at 145% at 25°C. Trip times listed in table are at 200% rating. Quick-Connect and #6-32 screw terminals are available. Fig. 1 has 0.5″ (12.70) mounting bushing with 7/16-28 silver thread. Recommended cutout is 0.440-0.450″ (17.3-17.7) dia. hole. Fig. 2 has 0.300″ (7.62) mounting bushing with 15/32-32 black thread. Recommended cutout is 0.470-0.480″ (18.5-18.9) dia. hole. **Mfg. part no. W58-XB6A4A-4** has a .465″ (11.81) mounting bushing with 3/8-24 silver thread. Recommended cutout is .370-.380″ (15.0-15.3) dia. hole. UL 1500 (ignition protected) and 1077 rated. UL recognized, CSA certified. 3/8″ plastic bushing option available; *go online or call.*

EATON

Circuit Breaker Retaining Ring Mounting Clip Protective Boot / Cover

Replaces slow-blow glass fuses and fuse holders. Units mount in the same space as a 0.625″ (15.88) fuse holder and provide resettable capability after tripping. A trip indicator button provides visual indication of trip condition and can't be manually switched to the OFF position. Trip time @ 200%: 2.5-24 seconds @25°C. *Retaining ring, mounting clip and boot ordered separately; go online or call.* UL recognized, CSA certified.

BR & SU SERIES CIRCUIT BREAKERS & SUPPLEMENTARY PROTECTORS

NEW **Weidmüller**

BR Series, 1-Pole

SU Series, 2-Pole

Compared to traditional fuse installation, the UL489/CSA C22.2 No.5-02, UL1077/CSA C22.2 No.235 compliant circuit breakers listed here assist with the complex task of selecting correct types and characteristics and offer a less bulky installation solution. The range of miniature, molded-case circuit breakers, in combination with accessories for factory or on-site installation, offer enhanced control and monitoring capabilities. Installation kits include all parts and instructions to make the on-site job easy. UL489/CSA C22.2 No.5-02 and UL1077/CSA C22.2 No.235 compliant 1, 2 and 3-pole-type circuit breakers from 0.5 to 60A and with type C and D characteristics. Attachments such as neutral switches, auxiliary contacts and shunt trips are also available for this system. All accessories for modern busbar installations are available in compliance with the relevant UL standards.

THERMAL-MAGNETIC CIRCUIT-BREAKERS – SUPPLEMENTAL

RoHS Compliant Available **Weidmüller**

- Versions 0.05 to 16A available
- Voltage: 250VAC/65VDC
- Mounts on 35mm DIN-rail or 32mm w/ adapter
- Tease-free design to reduce contact damage
- Push button trip/reset function
- Trip free design; cannot close into a fault
- UL1077 recognized

Dimensions (H x W x D): 80 x 12.5 x 60.5 mm. *Trip curves available online at www.newark.com.* 2-pole versions, jumpers and marking tags also available; *go online or call.*

THERMAL MAGNETIC CIRCUIT-BREAKERS – SUPPLEMENTAL

RoHS Compliant Available **Weidmüller**

- Current ratings from 0.5 to 63 A
- Voltage rating of 50VDC/277VAC
- Mounts on 35mm DIN rail
- Optional auxiliary contacts
- UL 1077; CSA C 22.2 No. 235; VDE

Dimensions (H x W x D): 86 x 18 x 70 mm. *Trip curves and other accessories available online.*

TOGGLE SWITCH MODULE

RoHS Compliant Available

wieland

Switch module functions to turn on or off a branch circuit under load. Available in DPST circuit variation. Unit is rated 8A at 125V and 4A at 250V and is designed with a universal mounting base for DIN rail assembly. Ideal for enclosures with restricted space and/or a hard-to-reach disconnect. Housing: polyamide 6.6. Pressure connector: zinc-plated and chromated steel. Current bar: tin-plated copper alloy. Color: gray.

LOAD CENTERS AND CIRCUIT-BREAKERS

RoHS Compliant Available

SQUARE D by Schneider Electric

8 Space Load Center w/Door

2-Pole Branch Circuit-Breaker

1-Pole Ground Fault Interrupter

2-Pole Ground Fault Interrupter

Load Centers:

- Single phase
- 30 to 100A, 2 to 20 circuits
- Indoor version
- Shielded copper bus with electro tin plated copper bus bars sandwiched between two polymer shields to insulate and secure the interior
- Reduced installation time: straight-in mains wiring and uniform termination lugs minimize service cable bends
- Convertible mains for fast field conversion between main breaker and main lugs
- Standard 22,000/10,000 A series short circuit current rating on main breaker load centers
- Single captive interior mounting screw can't be lost
- Easy to mount and remove interior
- Split branch neutral with up to 50% more terminations than UL requirement for simplified wiring and reduced clutter
- Designed to rotate 180° to accommodate top or bottom service entrance feed
- Combination slot/square-drive neutral, ground, and cover screw to accommodate flat blade and square-head screwdrivers
- Three ground bar mounting locations (left, right, and end) for easy wiring
- **"-S" suffix** in mfg. part no. indicates surface mount cover included

MULTI-9™ C60N UL489 MINIATURE CIRCUIT BREAKERS

Schneider Electric

- 1-2-3 Pole Configurations
- Small Size: Less Than ¾" Per Pole (0.71")
- Interrupt Rating 10KA @ 120VAC (1P), 240VAC (2 or 3P); 5KAC @ 240VAC (1P)
- DC Rating 10KA @ 60VDC (1P) and 125VDC (2P)
- Common Tripping of All Poles
- Padlock Attachment in the "Off" Position Only

This series is a UL 489 version of the C60N family of DIN mount circuit protectors. Meets global applications and code requirements including UL, IEC and CSA. CE compliant. Features C trip curve for typical loads; magnetic release operates between 7 and 10 times ampere rating. Box lug terminals. D. Curve (10-14 times handle rating) and a variety of accessories also available; *go online or call.*

MULTI-9 C60N UL 1077 SUPPLEMENTARY PROTECTORS

UL RoHS Compliant Available Schneider Electric

- Intended for use within equipment where branch circuit protection is already provided or not needed
- C-Curve types are dual rated for UL 1077 and UL 489A for DC Telecom applications
- Suitable for reverse feeding
- 10K AIR @ 120/240VAC; 5K AIR @ 480Y/277

Magnetic release operates between 7 and 10 times rating.

- 15 to 250A ratings
- Voltage: 600VAC / 250VDC
- Dual-break rotating contacts reduce the amount of peak current during a short circuit fault
- Reduced let-through currents
- Integral push-to-trip button
- Field installable accessories and trip units available below
- Dimensions (H x D): 163 x 87 mm
- Width: 70 mm (2-pole), 105 mm (3-pole)

AUTOMATIC SWITCHES

Similar in construction to circuit breakers except that the switches open instantaneously at a factory-set non-adjustable trip point calibrated to protect only the molded case switch itself.

SERIES G THERMAL-MAGNETIC CIRCUIT BREAKERS

EG Frame

JG Frame

HMCP (EG-Frame)

- Available in frame sizes up to 2500A
- Safely interrupt up to 200,000A
- Asymmetrical interrupting capacities at 480 VAC
- Easy installation
- Electronic trip units from 20 to 2500A
- Built-in ground fault protection down to 20A
- Provide increased performance in 35% less space than standard circuit breakers or comparable fusible devices
- Field installable accessories through 630A

"G" signifies global applications: UL, CSA, CE, IEC, KEMA & KEUR. The **HMCP** circuit breaker is an instantaneous-only motor circuit protector (MCP), is available in ratings from 3 to 1200A for motor starters sizes 0 through 8 and is UL 489.

EG-FRAME CIRCUIT BREAKERS, 15 - 125A, 480VAC (18K AIC), 250VDC (10K AIC)

MOELLER UL 1077 DIN RAIL SUPPLEMENTARY PROTECTORS

RoHS Compliant Available

EATON

- Designed for inductive loads
- Response time of instantaneous trip: C curve (5–10X I_n current rating)
- UL recognized and CSA Certified as supplementary protectors
- For international and domestic use (conform to IEC 60947-2)
- UL file number 177451
- **"-RT" suffix** indicates ring tongue terminals
- **"-SP" suffix** indicates option for single packaging

- 3-pole
- 60A to 250A
- Voltage: 600VAC
- Includes Micrologic electronic trip unit

H-Frame J-Frame

PowerPact H- and J-frame circuit breakers are designed to protect electrical systems from damage caused by overloads and short circuits. The Micrologic electronic trip unit provide adjustable protection settings for greater system flexibility. In addition to electronic protection, Micrologic trip units allow users to monitor both energy and power. Through direct access to in-depth information and networking using open protocols, **PowerPact** circuit breakers with Micrologic trip units let operators optimize the management of their electrical installations. Far more than a circuit breaker, these circuit breakers are a measurement and communication tool ready to meet energy-efficiency needs through optimized power requirements, increased energy availability, and improved installation management.

SNAPAK® MAGNETIC CIRCUIT BREAKERS

RoHS Compliant Available

AIRPAX

Toggle | Rocker | Push-to-Reset | Push/Pull

SNAPAK® offers power switching and accurate, reliable circuit protection in a single snap-acting magnetic circuit breaker. SNAPAK® combines the functions of three separate components: power switch, fuse, and fuseholder that allows for less assembly, lower inventory, and greater panel density through less clutter. SNAPAK® can be operated at either DC or 50/60Hz. Voltages on units up to 7.5A are up to 50VDC/250VAC. Voltages above 7.5A are up to 32VDC/125VAC. All types listed are series circuit breakers with rocker action. Body color: black; handle color: white. Dimensions (H x W x D): 34.43 x 17.27 x 29.97 mm (1.375 x 0.680 x 1.180"). UL recognized, CSA certified, CE compliant, VDE approved. For breakers over 20A, *go online or call.*

P&B STANDARD MAGNETIC HYDRAULIC CIRCUIT BREAKERS

RoHS Compliant Available

TE connectivity

Authorized Distributor

W9 series circuit breakers are available in 1-, 2-, and 3-pole models with ratings to 50A. **Prefix W91** in mfg. part no. = 1-pole; **W92** = 2-pole; **W93** = 3-pole. Operating voltage: 277VAC or 65VDC. All units utilize a trip free construction. Operating temperature: –40°C to +85°C. **W9 series** terminates in #10-32 studs. Mount with #6-32 screws and feature a time delay curve tailored for motor start applications (curve 10). UL interrupt capacity in amps: 3500–5000. UL recognized, CSA certified. VDE approved units are available; *order same mfg. part no. and add* "**V**" *to end*. UL 1500 (ignition protected) versions also available; *go online or call*.

HYDRAULIC-MAGNETIC CIRCUIT BREAKERS

RoHS Compliant Available

EATON

Breaker terminals are 0.32" x 0.250" push-on type. Mount with #6-32 screws. Units with **D3** in mfg. part no. are rated AC/DC and are suitable for 250V, 50/60Hz and 65VDC. Breakers with **A8** in mfg. part no. are rated at 250V, 50/60Hz and provide high inrush withstanding for momentary initial surges. Operating temp. range: –40° to +85°C. Other current ratings available . For trip curves , *go online or call.*

HYDRAULIC-MAGNETIC CIRCUIT BREAKERS

RoHS Compliant Available

EATON

- Lightweight circuit breakers
- Available In 1-, 2-, and 3- pole models
- Operating temperature range: –40°C to +85°C
- Items with D3 in mfg. part no. are rated AC/DC and are suitable for 250V, 50/60Hz and 80VDC
- A8 in mfg. part no. are rated at 250V, 50/60Hz and provides high inrush withstanding for momentary initial surges
- Time-delay curve 10 recommended for motor start applications

1-Pole

Features knurled handle for positive grip. Electrical ratings: UL1077 listed from 0.1 to 100 amperes at 80VDC with 10,000 ampere interrupting capability; 0.1 to 20 amperes at 120VAC with 10,000 ampere interrupting capability; 0.1 to 50 amperes at 120/240VAC with 5,000 ampere interrupting capability. Units are available in 10-32 ¼-20 and 6mm metric connecting terminal studs, as well as 10-32 screws and banana mate terminals. Other ampere ratings available; UL489 rated circuit breakers are also available by changing "DA" in mfg. part number to "DDU." VDE approved items available; *go online or call.*"

C	2	Handle	63.50	38.48	47.00

Circuit breakers have trip free mechanism and wiping contacts. The **B series** and **C series** hydraulic/magnetic circuit breakers have UL 1500 ignition protection, series trip circuit and front panel snap-in. All units are supplied with all-purpose, AC/DC medium delay curves rated up to 80VDC/277VAC. All series have 6-32 x 0.195" threaded inserts for mounting except **mfg. part no. AA2-B0-24-630-1B2-C** which has ISO M3 x 5mm threaded inserts. **"C" suffix** indicates UL recognized & CSA accepted (except for **C series** where it indicates UL recognized & CSA certified). **"D" suffix** indicates VDE certified, UL recognized & CSA accepted (except for **C series** where it indicates VDE certified, UL recognized & CSA certified). **"E" suffix"** indicates TUV certified, UL recognized & CSA accepted.

1-POLE DIN-MOUNT MINIATURE CIRCUIT-BREAKERS

RoHS Compliant Available

IDEC

- Integrated electric shock protection structure (IP20)
- Meets UL1077 standard
- Rated voltage: 250VAC / 65VDC
- Rated short-circuit capacity: 2500A
- Max. trip time: 240 sec @ 125% rated current (medium time delay curve)
- Auxiliary/alarm contact terminals are equipped with terminal covers
- Spring-up, fingersafe terminals (ring terminals can also be installed w/ captive terminal screws)
- Retractable actuator
- Trip-free mechanism maintains the circuit open even when the operator is turned on after tripping
- Dimensions (H x W x D): 78.8 x 17.5 x 66 mm
- 2- and 3-pole versions, padlock attachments, panel mounting brackets and marking plates are also available; *go online or call*

DC BRANCH RATED CIRCUIT BREAKERS

RoHS Compliant Available

Weidmüller

- 13mm width
- Single pole
- Mounts on 35mm DIN rail
- Up to 60A
- 80 VDC
- 4-28 sec trip time at 200%

Single Pole

DC branch rated circuit breakers are UL 489 listed, CE compliant, and VDE approved. Single pole dimensions (H x W x D): 92.8 x 13 x 74mm (3.65 x 0.51 x 2.91"). *Trip curves available; go online or call.*

SUPPLEMENTAL CIRCUIT BREAKERS

RoHS Compliant Available

Weidmüller

Single Pole

Double Pole

Triple Pole

- 13mm width per pole
- Mounts on 35mm DIN rail
- Factory fitted auxiliary or trip alarm
- 240/480 VAC, 50/60 Hz
- 6-40 sec trip time at 200%

Supplemental circuit breakers are UL 1077 recognized, VDE (EN 60947-2) approved, CSA C22.2 no. 235 certified, and CE compliant. Single pole dimensions (H x W x D): 92.8 x 13 x 73mm (3.65 x 0.51 x 2.87"). Double pole dimensions (H x W x D): 92.8 x 26 x 73mm (3.65 x 1.02 x 2.87"). Triple pole dimensions (H x W x D): 92.8 x 39 x 73mm (3.65 x 1.54 x 2.87"). *Bus bar and trip curves available online.*

UL 98 AND UL 489 NON-FUSIBLE AND FUSIBLE ROTARY DISCONNECTS

RoHS Compliant Available

EATON

- 3 Poles
- High short-circuit current ratings – 200 kAIC
- Compact version available for UL 489 and UL 98
- The fusible product (30A - 800A) uses double break contacts, completely isolating the fuse in the open position, providing enhanced safety

R9C Non-Fusible

R9K Fusible

UL 98 rotary disconnects, available in fusible and non-fusible designs, are tested and approved to the stringent UL98 standard. They are heavy duty products that can be used for almost any main disconnect switch application. UL 489 rotary disconnects are UL certified for motor load short circuit protection. The **R9 series** has a variety of direct or external handles, shafts, and accessories available; *go online or call.*

CIRCUIT-LOCK® SWITCHED ENCLOSURES

RoHS Compliant Available

HUBBELL Wiring Device-Kellems

- Unfused disconnect switches are suitable as motor disconnects
- Completely non-metallic enclosure is non-conductive and will not corrode
- Accepts auxilliary contacts that can signal PLC controllers
- Large actuator handle indicates position and complies with OSHA lockout requirements
- Available in 30A, 60A and 100A ratings

Non-conducting internal frame automatically bonds all grounds. UL listed, CSA certified.

MD ENCLOSED MOTOR DISCONNECT SWITCHES

RoHS Compliant Available

SQUARE D by Schneider Electric

Key Features

- Water-tight NEMA 4X polycarbonate enclosure
- Ideal for use in wash down or rugged industrial applications
- Covers additional enclosure types, such as NEMA 1, 12, 3R and 4
- Standard 3-pole design: Optional additional power pole
- Available in 30 A and 60 A sizes
- Horsepower rated
- Clear "ON/OFF" indication
- Front padlockable handle complies with OSHA lockout/tagout requirements
- Accepts up to three 8 mm padlocks

This MD motor disconnect switch serves as a local on/off switch for a motor when the motor branch circuit protection is in a central enclosure. It is in a compact NEMA 4X enclosure and is available in 30 A and 60 A versions.

FUSIBLE AND NON-FUSIBLE DISCONNECT SWITCHES AND ACCESSORIES

RoHS Compliant Available

Schneider Electric

IEC-style disconnect switches utilize the latest technology and are designed to reduce panel space up to 25% without sacrificing performance or personnel safety. Available in ratings from 30-100A. Supplied with line-side terminal shrouds, all switches offer clear "on" and "off" position indication on both handle and switch, and can be padlocked in the "off" position with up to 3 locks. For complete disconnect select switch, shaft and handle. UL listed, CSA certified, CE compliant.

DC-TO-DC CONVERTERS

LD010C SERIES 50W C-CLASS NON-ISOLATED DC/DC CONVERTER

NEW

ARTESYN EMBEDDED TECHNOLOGIES

TUV Rheinland

- Surface mount
- Small package — 16.51mm x 10.41mm x 13.13mm
- Single output
- Total power: 50W
- Input voltage: 3VDC to 13.8VDC
- 10A current rating
- Adjustable output voltage: 0.59V to 5.1V
- High efficiency: up to 94% typ.
- Coplanarity: 150µm
- Excellent transient response
- Remote on/off
- Power enable
- Minimum airflow
- Termination voltage capability
- Operating temperature: -40°C to +85°C
- Flammability rated: UL94-V-0
- Two-year manufacturer's warranty

LD010C series 50W DC/DC converter is a high-density, open-frame, non-isolated converter for space sensitive applications. This 5-pin surface mount model has a wide input range and offers an adjustable output with 10A capability. Efficiency (high-input) is 91% typical (5Vin, 2.5Vout, 10A load). Current sink capability for termination applications. No added input or output capacitors needed for ripple current capability or stability.

CME SERIES ISOLATED 0.75W SINGLE OUTPUT DC/DC CONVERTERS

NEW

RoHS Compliant Available

muRata Ps Murata Power Solutions

- Cost effective, lower-power alternative to 1W converters
- Single isolated output
- 1kVDC or 3kVDC isolation options
- Wide temperature performance @ full 1W load (-40°C to 85°C)
- Industry standard packages and pinouts
- 3.3V and 5V inputs
- 3.3V, 5V and 12V outputs

DIP

SIP

CME series 0.75W single output DC/DC converters in popular input and output voltages. Galvanic isolation allows this device to be configured to provide an isolated negative rail in systems where only positive rails exist.

MEF1 SERIES ISOLATED 1W REGULATED SINGLE OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

NEW

- Short circuit protection
- Operation to zero load
- Output regulation <1%
- Power density 0.85W/cm3
- Single isolated output
- UL94V-0 rated package material
- Footprint from 1.17cm2
- 1kVDC or 3kVDC isolation options
- 3.3V, 5V, 12V and 24V inputs
- 3.3V and 5V outputs
- Fully encapsulated with toroidal magnetics

MEF1 series isolated 1W regulated single output DC/DC converters is used where a tightly regulated supply is required. Ideal for situations where the input voltage is not tightly controlled. The single rail regulated output makes this device a perfect choice to power sensors, such as pressure transducers, hall effect sensors and mass airflow sensors.

Mfg. Part No.	Isolation (kVDC)	Input Voltage (VDC) Nom.	Min.	Max.	Output Voltage (DC)	Output Current	Efficiency (%)	Stock No.	Price Each 1-4

NCS1 SERIES ISOLATED 1W 4:1 INPUT SINGLE OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

NEW

- 4:1 Wide range voltage input
- Single output
- 1kVDC isolation
- 3.3V, 5V and 12V inputs
- No electrolytic capacitors
- Continuous short circuit protection
- Industry standard package and pinout
- Operating temperature range: -40°C to 105°C with derating

NCS1 series of DC/DC converters are ideally suited for applications in telecommunications, battery powered systems, process control and distrbuted power systems.

MTU2 SERIES ISOLATED 2W SINGLE AND DUAL OUTPUT SURFACE MOUNT DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

NEW

- Miniature, high-perforamnce SMD design
- Single or dual isolated outputs
- 1kVDC isolation
- Efficiency up to 85% (Typ)
- MSL Level 1
- Power density 3.403W/cm^3
- 3.3V, 5V, 12V, and 24V inputs
- 5V, 12V and 24V single and dual outputs
- Multi-layer ceramic capacitors

MTU2 series miniature surface mount, high-performance DC/DC converters offer 2W of available output power over a wide temperature range and feature a footprint reduction of over 50% from previous generations of 2W SMD DC/DC devices. It is more efficient and offers improved regulation performance for applications where a wide output voltage variation can not be tolerated. Pin compatible with the **MTU1 series** isolated 1W single and dual output SMD DC/DC converters. Suitable for all applications where high volume production is envisaged.

MGJ2 SERIES ISOLATED 2W DUAL OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

NEW

- Developed specifically for IGBT driver applications
- 5.2kVDC isolation test voltage
- 5V, 12V, 15V and 24V inputs
- +15V/-5V, +15V/-8.7V and +20V/-5V outputs
- Power density 0.81W/cm^3
- Ripple & Noise (typ.) 30mVp-p
- Short-circuit protection
- Ultra-low coupling capacitance
- SIP package style
- Footprint 1.96cm^2
- Size: 19.65 x 12.65 x 9.95mm
- Operation to 100°C
- Convection air cooling

MGJ2 series DC/DC converters are ideal for powering "high-side" and "low-side" gate drive circuits for IGBTs and Mosfets in bridge circuits. A choice of asymmetric output voltages allows optimum drive levels for best system efficiency and EMI. Characterized for high-isolation and dv/dt requirements commonly seen in bridge circuits used in motor drives and inverters, these units are built to provide reliability and long life and feature an industrial grade temperature rating.

OKAMI OKY SERIES 3, 5, 10, 16 AMP DOSA POL SMT DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

OKY-T/3 & T/5-W5 Series

OKY-T/10 & T/16-D12 Series

- Drop-in replacement for DOSA PoL converters
- Competitive alternative to discrete designs
- Choice of 3A, 5A, 10A and 16A output current
- High load capacitance to 1000µF
- High power conversion efficiency up to 96%
- Virtually no derating across rated temperature range
- Wide input voltage range and user selectable output voltage
- UL/EN/IEC 60950-1 safety

OKY-T/3, T/5-D12 series converters include under voltage lockout (UVLO), ouput short circuit protection, over-current and over temperature protection. Designed to support a wide range of applications, Okami™ modules are ideal for powering the latest generation of FPGAs and DSPs, are drop-in replacement for other DOSA-compliant parts, and are an alternative to discrete designs.

OKAMI OKL SERIES 12V 3 AMP iLGA SMT POL DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- iLGA inspectable land grid array
- 4.5-14VDC input voltage range
- Programmable output voltage from 0.591-5.5VDC
- Drives up to 200 µF ceramic capacitive loads
- High power conversion effi ciency at 93%
- Outstanding thermal derating performance
- Over temperature and over current protection
- On/Off control and Power Good signal

OKL-T/3 series are miniature non-isolated Point-of-Load (PoL) DC/DC power converters for embedded applications. Featuring iLGA inspectable Land Grid Array (LGA) format that allows easy access of all pin connections for inspection of LGA solder joints. Based on fixed-frequency synchronous buck converter switching topology, the high power conversion efficient Point of Load (PoL) module features programmable output voltage and on/off control. These units are designed to meet all standard UL/EN/ IEC 60950-1 safety and FCC EMI/RFI emissions certifications. Dimensions(LxWxH): 0.48 x 0.48 x 0.25".

OKAMI OKI-78SR SERIES 1.5 AMP SIP DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- Ultra wide 7 to 36 VDC input range
- Fixed Outputs of 3.3 or 5 VDC up to 1.5 Amps
- Vertical SIP-mount, small footprint package
- "No heat sink" direct replacement for 3-terminal 78xx-series linear regulators
- Short circuit protection
- Outstanding thermal derating performance
- UL/EN/IEC 60950-1 safety approvals

OKI-78SR series are non-isolated switching regulator (SR) DC/DC power converters for embedded applications. The fixed single output converters offer both tight regulation and high efficiency directly at the power usage site and are a direct plug-in replacement for TO-220 package 78xx series linear regulators. Typically, no extra outside components are required. All standard safety and EMI/RFI certifications are available. Dimensions (LxWxH): 0.30 x 0.41 x 0.65".

DC-TO-DC CONVERTERS

OKAMI OKI SERIES 3A DOSA-SMT DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- Non-isolated SMT POL DC/DC power module
- Wide 16-40Vdc input voltage range
- Selectable output voltage from 0.7525-4.5Vdc (**OKI-T/3-W32**), 0.7525-5.5Vdc (**OKI-T/3-W40**) and 5.021-15.5Vdc (**OKI-T/36W-W40**)
- 3A output current models
- Drives 1000µF ceramic capacitive loads
- High power conversion efficiency
- Outstanding thermal derating performance
- On/Off control, positive or negative polarity
- Industry-standard (DOSA) surface-mount package
- UL/EN/IEC 60950-1 safety (pending)
- RoHS-6 hazardous substance compliance

OKI-T/3 and **OKI-T/36 series** are non-isolated Point-of-Load (POL) DC/DC power converters for embedded applications. These converters also include under voltage lock out (UVLO), output short circuit protection, overcurrent and over temperature protections. Applications include powering CPU's, industrial 24V transducers and POS terminals. Dimensions(LxWxH): 0.82 x 0.47 x 0.34".

78SR SERIES, HIGH EFFICIENCY, SINGLE OUTPUT, NON-ISOLATED DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- Up to 95% efficiency– no costly heat sinks or fans required
- Wide 7.5– 36VDC input voltage range
- Two package options: 3-pin vertical mount SIP, low profile, horizontal mount SIP
- No external input/output filter capacitors required
- –40 to +70°C full load operation
- Open frame design minimizes self-heating and pc-board footprint
- Low noise output for powering sensitive instrumentation

78SR series step-down switching regulators provide high-efficiency drop-in replacements for LM7805 and LM7812 applications. Their higher efficiency ensures significantly lower heat generation and provides increased run time in battery-powered applications, making these regulators ideal for low power "green" applications.

HPR SERIES DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- High Output Power Density
- Highly Efficient
- Low Cost
- Internal Input and Output Filtering

HPR1XX and HPR4XX series uses advanced circuit design and packaging technology to deliver superior reliability and performance. **HPR1XX series** models: 0.785L x 0.525W x 0.375"H; **HPR10XXC series and HPR4XX series** models: 0.77L x 0.24W x 0.4"H.

NKE SERIES ISOLATED SUBMINIATURE 1W SINGLE OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- Subminiature SIP and DIP Package Styles
- Efficiency to 81%
- Wide Temperature Range: -40°C to 85°C
- UL 94V-0 Package Material
- Footprint at 0.69cm^2
- Single Isolated Output
- Industry-Standard Pinout
- No Heatsink Required
- Internal SMD Construction
- Fully Encapsulated with Toroidal Magnetics
- No External Components Required
- UL60950 recognized

NKE series are subminiature DC/DC converters that have improved efficiency, lower output ripple and 3kVDC isolation capabilities. Galvanic isolation allows the device to be configured to provide an isolated negative rail in systems where only positive rails exist. Pin output SIP: 1 = -VIN; 2 = +VIN; 3 = -VOUT; 4 = +VOUT.

NME SERIES ISOLATED 1W SINGLE OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

- Efficiency from 82%
- Operating temperature: -40°C to 85°C
- Power density: 1.53W/cm^3
- UL 94V-0 package material
- 1kVDC isolation
- Internal SMD construction
- Fully encapsulated with with toroidal magnetics
- MTTF up to 3.4 million hours

NME series of DC/DC converters is particularly suited for isolating and/or converting DC power rails. The galvanic isolation allows the device to be configured to provide an isolated negative rail in system where only positive rail exists.

NMF SERIES ISOLATED 1W REGULATED SINGLE OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

- Output regulation <1.5%
- Output programmable
- Power density: 0.85W/cm^3
- UL 94V-0 package material
- 1kVDC isolation
- Internal SMD construction
- MTTF up to 2.4 million hours

NMF series of DC/DC converters is used where a tightly regulated supply is required. the output trim pin makes the device particularly suitable for applications requiring a programmable output voltage. The 5V output version can be used to give a regulated output, adjustable between 1.2V and 5.0V with a single resistor.

MEV1 SERIES 3kVDC ISOLATED 1W SINGLE & DUAL OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

- Efficiency to 89% (typ)
- Power density 0.85W/cm3
- Wide temperature performance at full 1 Watt load, –40°C to 85°C
- UL 94V-0 package material
- No heatsink required
- Industry standard pinout
- 3kVDC isolation (1 minute)
- 5V, 12V, 15V, 24V, & 48V inputs
- 5V, 9V, 12V, & 15V output
- Fully encapsulated with toroidal magnetics
- No external components required
- No electrolytic or tantalum capacitors

MEV1 series is the new high performance version of the 1W **NMV series**; *ordered separately go online or call.* **MEV1 series** is more efficient and offers improved regulation performance ≤5% for applications where a wide output voltage variation can not be tolerated. They are ideally suited for providing local supplies on control system boards with the added benefit of 3kVDC galvanic isolation to reduce switching noise. **MEV1 series** is available in an industry SIP 7 or DIP 14 package.

MEA SERIES 1kVDC ISOLATED 1W DUAL OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

- Efficiency to 89.5%
- Power density 0.85W/cm3
- Wide temperature performance at full 1 Watt load, –40°C to 85°C
- UL 60950 recognized
- No heatsink required
- Industry standard pinout
- Power sharing on output
- 5V, 12V, 15V, 24V & 48V input
- 5V, 9V, 12V, & 15V output
- Fully encapsulated with toroidal magnetics
- No external components required
- No electrolytic or tantalum capacitors

MEA series is the new high performance version of our 1W **NMA series** ordered separately; *go online or call.* **MEA series** is more efficient and offers improved regulation performance ≤5% for applications where a wide output voltage variation can not be tolerated. They are ideally suited for providing dual rail supplies with the added benefit of galvanic isolation to reduce switching noise. All of the rated power may be drawn from a single output providing the total load does not exceed 1 watt.

NTE SERIES 1kVDC ISOLATED, 1W SINGLE-OUTPUT SURFACE MOUNT DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

- Surface mount (SOIC)
- Ideal for high-volume applications
- No heat sink required
- Toroidal magnetics
- Multi-layer ceramic capacitors
- Lead-free compatible

NTE series miniature surface mount DC/DC converters feature lead-frame technology and transfer molding techniques to bring all the benefits of IC style packaging to hybrid circuitry. Co-planarity of lead positions is based upon IEC 191-6:1990. Suitable for all applications where high-volume production is required. Wide temperature performance at full 1W load, -40°C to +85°C. Case rated to UL94V-0. Size: 0.26H x 0.44W x 0.5"D.

MEU1 SERIES ISOLATED 1W SINGLE OUTPUT DC/DC CONVERTERS

NEW

RoHS Compliant Available

Murata Power Solutions

- Single isolated output
- 1kVDC isolation
- Efficiency up to 87% typical
- Wide temperature performance at full 1W load, –40°C to 85°C
- Power density 2.61W/cm^3
- 3.3V, 5V, and 12V input
- 3.3V, 5V, 9V, 12V and 15V output
- PCB mounting
- Footprint reduction over previous 1W DC/DC's
- Dimensions: 7.95mmH x 8.3mmW x 6.1mmD

MEU1 series is a new range of ultra-miniature through-hole 1W DC/DC converters, available in a ZIP style pinout. Ideally suited for providing local supplies on control system boards. The added benefit of 1kVDC galvanic isolation to reduce switching noise allows the device to be configured to provide an isolated negative rail in systems where only positive rails exist.

NMH SERIES ISOLATED 2W DUAL OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- Efficiency up to 86%
- Power density up to 1.44W/cm3
- Operating temperature: -40°C to 85°C
- Dual output from a single input rail
- UL 94V-0 package material
- Industry standard pinout
- Power sharing on output
- Internal SMD construction

NMH series is the standard buliding blocks for on-board point-of-use power systems. They are ideally suited for providing dual rail supplies on single rail boards with the added benefit of galvanic isolation to reduce circuit noise. All of the rated power may be drawn from a single pin provided the total load does not exceed 2 watts. Pin compatibility with the NMA 1W series ensures minimal effort in upgrading distributed power systems.

2W ISOLATED WIDE-INPUT, SINGLE-OUTPUT DC/DC CONVERTERS WITH 1kVDC ISOLATION

RoHS Compliant Available

Murata Power Solutions

- 2:1 Wide Operating Range
- 5V, 12V, 24V and 48V Input Voltage
- No Electrolytic Capacitors

Low-noise wide-input converters have regulated outputs over the temperature range –40°C to +85°C with no power derating. Isolation: 1kVDC. Features continuous short-circuit protection with current foldback, ceramic capacitors and substrate, SMD construction. SIP packaging, UL 94V-1 packaging. Pin output SIP: 1 = -VIN; 2 = +VIN; 3 = CTRL; 5 = No Connection Allowed; 6 = +V_{out}; 7 = -VOUT; 8 = CS.

DC-TO-DC CONVERTERS

MEV3 SERIES 3kVDC ISOLATED 3W SINGLE OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- Efficiency from 83%
- Power density 1.9W/cm3
- Wide temperature performance at full 3 Watt load, –40°C to 85°C
- UL 94V-0 package material
- No heat sink required
- Industry standard pinout — 7-pin SIP package
- 3kVDC isolation (1 minute)
- 5V and 12V input
- 5V, 9V, 12V, and 15V output
- Fully encapsulated with toroidal magnetics
- No external components required
- No electrolytic or tantalum capacitors

MEV3 series high-performance 3W DC/DC converters offer 3 watts of available output power in a previously rated 2W package capable of operation over the full industrial temperature range of -40°C to 85°C. Features a pin compatible power upgrade path from the 1W **NMV/MEV** and 2W **NMK series** converters. Ideally suited for providing local supplies on control system boards with the added benefit of 3kVDC galvanic isolation to reduce switching noise.

NMT SERIES 3W TRIPLE OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- Input/output isolation 1kVDC
- Power sharing on outputs
- Industrial temperature range
- UL 94V-0 package material
- Internal SMD construction
- Toroidal magnetics
- No external components required
- Power density 1.65W/cm³

NMT series DC/DC converter offers three output voltages of -24V, -48V and -72V from a single isolated 5V input voltage. Designed for use with telecommunications circuits requiring an on board supply for the -72V RING-TIP connection service generated from a nominal 5V DC input supply rail. The device also offers battery level voltages of -24V and -48V for access control and data pump IC's. Packaged in an 8 pin SIP case for minimum PCB footprint. The rated power may be shared or drawn from any one output providing the total output load does not exceed 3W.

Mfg. Part No.	Input Voltage (VDC)	Output 1 VDC	Output 1 mA	Output 2 VDC	Output 2 mA	Output 3 VDC	Output 3 mA	Efficiency (%)	Stock No.	Price Each 1-4

NDTD SERIES ISOLATED, 3W DUAL-OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- Low-profile 24-pin DIP package
- Industry standard footprint
- 2:1 wide range voltage input
- Short circuit protection
- 1kVDC isolation
- No heat seat required
- Fully encapsulated

NDTD series low-profile DC/DC converters offering dual outputs over a 2:1 input voltage range. All parts deliver 3W output power up to +85°C without heatsinking. A flyback oscillator design with isolated feedback is used to give regulation over the full operating range of 25% to 100% of full load. **NOTE:** It is strongly recommended that external capacitors be used on input and output to guarantee performance over full load and input voltage range. Plastic case is rated to UL94V-0 and encapsulant to UL94V-1. Connection pins are formed from a tin-plated alloy 42 lead frame. Size: 0.27H x 0.57W x 1.27″D.

NCM6 SERIES ISOLATED 6W WIDE-INPUT SINGLE AND DUAL OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

NEW

Murata Power Solutions

- 4:1 Wide range voltage input
- Single and dual output
- 5200VDC isolation
- Typical efficiency to 88%
- 5V, 12V and 48V nominal inputs
- Power density 0.94W/cm
- 5mm creepage guaranteed
- Under voltage lock-out
- Industry-standard package with standard pinout
- Size: 32W x 20L x 10.75mmH (1.26 x 0.787 x 0.423")
- Control pin
- Operating temperature range: -40°C to 85°C

NCM6 series of DC/DC converters offer single and dual output voltages from wide input voltage ranges of 4.5V to 9V, 9V to 36V and 18V to 75V. Features a control pin that provides an OFF function which puts the converter into a low power mode when >3V is applied to the pin; when the control pin is left un-connected or less than 1V the converter is ON. Ideally suited for applications in medical, telecommunications, battery powered systems, process control and distrbuted power systems.

NCS12 SERIES ISOLATED 12W SINGLE AND DUAL OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

NEW

Murata Power Solutions

- 4:1 Wide range voltage input
- Typical load regulation from 0.05%
- 1.5kVDC isolation
- 3.3V, 5V, 12V and 15V outputs
- Operating temperature range -40°C to 85°C
- Package materials rated UL 94V-0
- No electrolytic capacitors
- Thermal shutdown
- Under voltage lock-out
- Current fold-back
- Size: 32mmW x 20mmD x 10mmH

NCS 12 series DC/DC converters offer single and dual output voltages from input voltage ranges of 9-36V and 18-75V. Housed in an industry standard package with a standard pin-out these converters feature a metal case for improved EMI shielding and are encapsulated for superior thermal performance. Ideal for applications including telecommunications, battery powered systems, and process control and distributed power systems.

OKAMI OKLx-T/xx-Wx SERIES 12 AND 20 AMP iLGA SMT POL DC/DC CONVERTERS

RoHS Compliant Available

NEW

Murata Power Solutions

OKLx-T/12-W5, OKLx-T/12-W12

OKLx-T/20-W5, OKLx-T/20-W12

- iLGA inspectable Land Grid Array
- Programmable output voltage
- Drives 1000µF ceramic capacitive loads
- High-power conversion efficiency up to 95%
- Outstanding thermal derating performance
- Under voltage lock-out (UVLO)
- Short-circuit protection
- Over-temperature and over-current protection
- On/Off control
- Choice of Postive or Negative logic
- Optional Sequence/Tracking operation

OKLx-T/xx-Wx series non-isolated point-of-Load (PoL) DC-DC power converters for embedded applications are based on fixed-frequency synchronous buck converter switching topology. The tiny form factor is configured on a Land Grid Array (LGA) assembly. Applications include powering CPU's, datacom/telecom systems, distributed bus architectures (DBA), programmable logic and mixed voltage systems.

SPM15 SERIES ISOLATED 15W SINGLE OUTPUT POTTED METAL PACKAGE DC/DC CONVERTERS

RoHS Compliant Available

NEW

Murata Power Solutions

- Wide range input voltages 9-36 and 18-75VDC
- Dimensions: 1 x 1 x 0.41" (25.4 x 25.4 x 10.41mm)
- Adjustable Vout (+10% to -10%)
- High Efficiency
- Positive and Negative logic, remote On/Off control option
- Monotonic startup into pre-bias output conditions
- Continuous short circuit protection
- Over-temperature and over-voltage protection
- Low output ripple and noise
- Strong thermal derating characteristics
- Operational temperature range: –40°C to +85°C
- 1600V I/O isolation
- Packaged in a five-sided EMI shielding metal package with non-conductive base
- Through-hole mounting — standard 0.15" (3.8mm) pin length
- Certified to UL 60950-1, CAN/CSA-C22.2 No. 60950-1, IEC60950-1, safety approvals, 2nd edition, with AM1

SPM15 series isolated DC-DC converters feature a full 15W output in one square inch of board area delivering efficient regulated DC power for PCB mounting. Accepts a wide range of input voltages, ideal for industrial applications in transportation, medical systems, electronic test equipment, industrial processing equipment, industrial applications where power modules must meet rugged environmental requirements, high power density, and where isolated output voltages are required. Modules provide voltage isolation (basic insulation) from input to output of up to 1600V and deliver full output power to +70°C with no airflow. These converters are ideal for applications that do not require any heat sinking or forced air cooling.

UEI15 AND UEI25 SERIES ISOLATED, WIDE INPUT RANGE 15/25W DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

- Small footprint, ideal for high current applications
- Industry standard 0.9" x 1.1" X 0.335" open frame package/ pinout
- 9-36 and 18-75VDC Q12 & Q48, 36-75VDC for D48 wide range inputs
- Double lead-free assembly and attachment
- 2250V basic Isolation (Q48 & D48 models)
- Up to 15 W or greater total output power with overtemperature shutdown
- High efficiency synchronous rectifier forward topology
- Stable no-load operation with no required external components
- Usable -40 to 85°C temperature range (with derating)
- Extensive self-protection shut down features
- On/off control polarity: **suffix P** indicates positive, **suffix N** indicates negative
- Surface mount version available; *go online or call*

Featuring a full 15 watt or greater output in one square inch of board area, the **UEI series** isolated DC/DC converter family offers efficient regulated DC power for printed circuit board mounting. Meets UL 60950-1, CAN/CSA-C22.2 No. 60950-1, IEC60950-1, EN60950-1 safety approvals.

BEI15 SERIES ISOLATED, BIPOLAR 15W DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

- Ideal for high current applications and for powering digital systems
- Choice of 9-36V and 18-75V input ranges with positive or negative on/ off polarity
- 2250VDC basic isolation and extensive self protection features
- Usable -40°C to 85°C temperature range (with derating)

BEI-15 series isolated, wide input DC/DC converters deliver a full 15W of output power with efficiency levels up to 86% from one square inch of board area and are a space-saving, pin compatible, drop-in replacement for prior generations of 1" x 2" DC/DC converters. A small footprint solution for high current applications in mobile and battery powered products, test equipment and telecoms and wireless designs.

10W, 15W AND 25W ISOLATED, SINGLE-OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

muRata Ps Murata Power Solutions

NPH10S NPH15S NPH25S

- High-Efficiency to 89%
- Industry-Standard Output
- No Electrolytic Capacitors
- Internal Over-Temperature Protection
- Industrial Temperature Range
- Continuous Rating to 30W @ 60° Without Heat Sink

Versatile single-output converters have high-surge capability for start up and transient loads, and thermal protection from sustained overload. Copper case achieves efficient heat transfer and screening. 1kVDC input/output. Isolation pin pattern based on industry standard. Mfg. part nos. ending with **EIC** suffix have optional TRIM and SS pins fitted. UL recognized.

SPM25 SERIES ISOLATED 25W SINGLE OUTPUT POTTED METAL PACKAGE DC/DC CONVERTERS

RoHS Compliant Available

NEW

Murata Power Solutions

- 2:1 input voltage range: 36-75VDC
- Dimensions: 1 x 1 x 0.41″ (25.4 x 25.4 x 10.41mm)
- Adjustable Vout (+10% to -10%)
- High Efficiency
- Positive and Negative logic, remote On/Off control option
- Monotonic startup into pre-bias output conditions
- Continuous short circuit protection
- Over-temperature and over-voltage protection
- Low output ripple and noise
- Strong thermal derating characteristics
- Operational temperature range: –40°C to +85°C
- 1600V I/O isolation
- Packaged in a five-sided EMI shielding metal package with non-conductive base
- Through-hole mounting — standard 0.15″ (3.8mm) pin length
- Certified to UL 60950-1, CAN/CSA-C22.2 No. 60950-1, IEC60950-1, safety approvals, 2nd edition, with AM1

SPM25 series isolated DC-DC converters feature a full 25W output in one square inch of board area delivering efficient regulated DC power for PCB mounting. Accepts a 2:1 input voltage range of 36V to 75V, ideal for industrial applications in transportation, medical systems, electronic test equipment, industrial processing equipment, industrial applications where power modules must meet rugged environmental requirements, high power density, and where isolated output voltages are required. Modules provide voltage isolation (basic insulation) from input to output of up to 1600V and deliver full output power to +70°C with no airflow. These converters are ideal for applications that do not require any heat sinking or forced air cooling.

DATEL® UQQ SERIES SINGLE OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

Murata Power Solutions

- Standard quarter-brick package/pinout in through-hole version
- Low cost; low profile, 0.43″(0.92mm)
- 9-36V or 18-75V wide range inputs
- Output current: 7 to 25 Amps
- Output voltages: 3.3, 5, 12, 15 or 24V
- Interleaved synchronous-rectifier topology:ultra high efficiency, no output reverse conduction
- Outstanding thermal performance
- On/off control, trim & sense functions
- Fully isolated, up to 2250Vdc (BASIC)
- Output overvoltage protection
- Fully I/O protected; thermal shutdown
- UL/EN/IEC60950 safety approvals

UQQ series employ an interleaved, synchronous-rectifier topology that exploits 100% of their duty cycle. They simultaneously achieve ultra-high efficiency (to 91%), tight line/load regulation, low noise, and quick step response. A state of the art, single-board, open-frame design with reduced component count, high efficiency, low-on-resistance FET's, and planar magnetics embedded in heavy-copper pc boards all contribute to impressive thermal derating. All UQQ quarter-bricks are designed to meet the BASIC-insulation requirements of UL/EN/IEC60950 and they will carry the CE mark. Ideal for applications requiring wide range input, improved electrical and thermal performance.

PAE SERIES 100W, 29.8V OUTPUT EIGHTH-BRICK ISOLATED DC/DC CONVERTERS

RoHS Compliant Available

NEW

Murata Power Solutions

Without Baseplate

With Baseplate

- 2:1 Input voltage range (36 to 75VDC - nominal 48 VDC)
- Single +29.8Vout can be adjusted from +23.84 to 32.78VDC
- Up to 100W output power @ 36 to 75Vin
- Efficiency 92.5% (typ.)
- 1500V I/O isolation
- Industry standard eighth brick package
- Through-hole mount — 4.78mm pin length
- Available with baseplate for conduction cooling applications and with ground connection pin 3
- Remote on/off control of either negative or positive logic polarity
- Monotonic startup into pre-bias/pre-load output conditions
- Over current, over temperature, input under voltage and output short circuit protection
- Low output ripple and noise
- Strong thermal derating performance
- Operational temperature range –40°C to +100°C (baseplate temp.)
- Certified to UL 60950-1, CSA-C22.2 No. 60950-1

➤CONTINUED➤

PAE SERIES 100W, 29.8V OUTPUT EIGHTH-BRICK ISOLATED DC/DC CONVERTERS (CONT.)

PAE series fully isolated power amplifier eighth-brick DC/DC converters have been designed specifically for use with multi-channel power amplifiers such as those found in the latest generation of microcell wireless transceiver applications requiring up to 100W. With a typical efficiency of 92.5%, these converters keep power dissipation on the module to a minimum, therefore, reducing system temperatures and helping network operators save energy costs. **PAE series** has been designed to meet the demanding "low noise" requirements in modern communications systems and will require minimal Vout filtering in most applications. Other ideal applications include indoor/outdoor Wi-Fi installations, RF test equipment, CATV systems and MRI imaging equipment.

Mfg. Part No.	Output (V)	Output (A)	Output (W)	Input Voltage	On/Off Polarity	With Baseplate	Stock No.	Price Each 1-4

UWQ SERIES WIDE INPUT, ISOLATED DOSA QUARTER BRICK DC/DC CONVERTERS

RoHS Compliant Available

NEW

muRata Ps Murata Power Solutions

- Fixed DC outputs, 12V @ 20A
- Standard quarter-brick open-frame package
- Wide range 18 to 60VDC input voltage
- Fully isolated, up to 2250Vdc (Basic)
- Remote ON/OFF enable control
- DOSA-compatible pinouts and form factor
- High-efficiency synchronous rectifier topology for minimal heat generation and "no heat sink" operation
- Stable no-load operation
- Monotonic start-up into pre-bias output condiution
- Output overvoltage, overcurrent, and short circuit protection
- Input undervoltage lockout and thermal shutdown
- Load-Sharing option: Multiple-unit parallel operation for increased current
- Trim & Sense option: Trimmable output from 10V to 13.2V
- Dimensions: 2.3 x 1.45 x 0.46" (58.4 x 36.8 x 11.7mm)
- Standard pin length 0.18" (4.6mm)
- UL/EN/IEC/CSA 60950-1, 2nd edition

UWQ series offers high output current (up to 20A) in an industry standard "quarter brick" package requiring no heat sink for most applications. Delivers fixed DC output voltages up to 240W (12V @20A) for PCB mounting. Wide range inputs of 18 to 60VDC (48V nom.) are ideal for datacom and telecom systems. Load-sharing option for paralleling up to three modules in demanding, power-hungry applications. Trim & Sense option is trimmable from 10.8V to 13.2Vout and includes Sense pins to compensate for voltage drops at the load. To power digital systems, the outputs offer fast settling to current steps and tolerance of higher capacitive loads. Excellent ripple and noise specifications provide compatibility to CPUs, ASICs, programmable logic and FPGAs. No minimum load is required. For systems needing controlled startup/shutdown, an external remote On/Off control may use either positive or negative logic.

CC-E SERIES ULTRA COMPACT, 1.5W TO 25W SINGLE OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

- Compact footprint /low profile
- Through hole or SMT versions
- 5V, 12V, 24V & 48V inputs
- 3.3 to 30V* single
- Output voltage adjustment
- Input - output isolation
- Five-year manufacturer's warranty

CC-E series are ultra compact, open frame DC/DC converters. Self contained requires no external components. **R** indicates suitable for surface mount.

SPECIFICATIONS:		
Nominal Output Voltage:	3.3	5V	12/15V*
DC Input:	5V: 4.5-9.0V, 12V: 9-18V, 24V: 18-36V, 48V: 36-76V		
Line Regulation:	20 (40 CC15; 30 CC25)	40	
Load Regulation:	40 (120 CC15; 200 CC25)	100	
Output Ripple (typ./max.BW 50MHz):	40/120	30/120	
Operating Temp.- Convection:	-40 to 85°C, derates linearly to 40% load from 50°C to 85°C

PH-A280 SERIES 50W TO 150W, 200 TO 425VDC INPUT DC-DC CONVERTERS

RoHS Compliant Available

TDK·Lambda Innovating Reliable Power

NEW

- 200 to 425VDC input
- Baseplate cooled
- Full power @ 100°C baseplate
- Quarter brick footprint
- 5-year manufacturer's warranty
- UL recognized, CSA certified, CE compliant

SPECIFICATIONS:

Output Voltage (Nom.):	5V	12V	24V	48V
Input Voltage Range:	200 - 425VDC			
Output Voltage Adjustment:	4-6VDC	9.6-13.2VDC	19.2-26.4VDC	38.4-52.8VDC
Ripple and Noise (Max.) pk-pk:	100mV	150mV	240mV	400mV
Line and Load Regulation:	10mV	24mV	48mV	96mV
Overcurrent Protection:	102-150% (Constant Current Style)			
Overvoltage Protection*:	125-150%	115-145%	115-145%	115-145%
Remote On/Off:	Low = ON, Open = OFF			
Operating Temperature:	-40°C to +100°C Baseplate, -40°C to +85°C Ambient			
Safety Agency Approvals:	UL60950-1, CSA60950-1, EN60950-1, CE Mark			
Dimensions:	37.2mmW x 12.7mmH x 58.3mmD			

*Cycle input or remote on/off to reset

DC-TO-DC CONVERTERS

PAH SERIES HALF-BRICK DC-TO-DC CONVERTERS (50-200W)

RoHS Compliant Available

TDK·Lambda
Innovating Reliable Power

- Industry-Standard Footprints and Pin-Outs
- High Efficiency
- Single Output
- Zero Preload Current
- Level B EMI with External Filtering
- Remote On/Off

Input Voltage Range: 36-76VDC. Dimensions: 2.8W x 0.5H x 2.4"D. UL recognized, CSA certified, CE compliant, VDE approved. Two-year manufacturer's warranty.

ISOLATED UNREGULATED DC-TO-DC CONVERTERS

RoHS Compliant Available

TEXAS INSTRUMENTS

- Thermal Protection
- Device-to-Device Synchronization
- EN55022 Class B EMC Performance
- JEDEC 14- and 18-Pin and SO-28 Packages
- Switching Frequency: 400kHz Max.
- VOUT Accuracy: 5%

Applications: Point-of-use power conversion, ground loop elimination, data acquisition, industrial control and instrumentation, and test equipment. UL 1950 recognized.

TEL 3 SERIES, 3 WATT, 2:1 AND 3:1 INPUT RANGE DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Wide 2:1 and 3:1 input range
- High efficiency up to 81%
- DIL-24 plastic package
- Short-circuit protection
- I/O isolation 1500 VDC
- Safety standards / approvals: UL/cUL 60950-1, IEC/EN 60950-1 and CB report
- 3-year product warranty

Specifications:
- Regulation:
  Line regulation: ± 0.5% max.
  Load regulation: (single output) ± 0.5% max. (dual output) ± 1.0% max.
- Ripple & Noise: <60 mVpk-pk typ. (20 MHz BW)
- I/O-Isolation: 1500 VDC
- Operating temperature range: -40°C to +85°C, above 70°C derating 3.3%/K

TEL 3 series isolated 3 Watt converters feature high efficiency, which allows operation temperature up to 71°C at full load and low output noise.

TEL 5 SERIES, 5 WATT DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- 24-pin DIP with industry standard pinout
- High power density
- Regulated outputs
- Indefinite short-circuit protection
- Lead-free design
- 3-year manufacturer's product warranty
- CSA certified

Specifications:
- Regulation:
  Input variation: 0.3% max. Vin min. to Vin max.
  Load variation: 20 - 100%: 1% max. (single output), 2% max. (dual output balanced load)
- Ripple and noise (20 MHz BW): 75 mV pk-pk max.
- I/O isolation 1500 VDC
- Operating temperature range: -40°C to +85°C

TEL 5 series of 5W DC/DC converters feature a wide input range of 2:1, state-of-the-art SMD-technology, high reliability (MTBF >1 Mio. h) and high efficiency up to 86%, qualifying these units for many cost-critical applications in industrial and consumer electronics.

TEL 15 SERIES, 15 WATT DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Single and dual output models
- High efficiency up to 86%
- Indefinite short-circuit protection
- Industry standard pinout
- 3-year manufacturer's product warranty
- CSA certified

Specifications:
- Regulation:
  Input variation: 1% max. Vin min. to Vin max.
  Load variation: 10 - 100%: 0.5% max. (single output), 1% / 3% max. balanced / unbalanced load (dual output)
- Ripple and noise (20 MHz BW): 50 mV pk-pk max. (single output) 75 mV pk-pk max. (dual output)
- I/O isolation 1500 VDC
- Operating temperature range: -40°C to +71°C @ full load

TEL 15 series DC/DC-converter modules feature state-of-the-art SMD-technology. These highly reliable, high-efficiency converters provide an economical solution for many cost critical applications in industrial and consumer electronics.

TMA SERIES, 1 WATT DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Single-in-line package (SIP)
- Single and dual output models
- High efficiency up to 81%
- Industry standard pinout
- 100% burn-in (8 h)
- 3-year manufacturer's product warranty

Specifications:
- Regulation:
  Input variation: ± 1.2% / 1% change Vin.
  Load variation 20 - 100%: ± 10% max.
- Ripple and noise: 75 mV pk-pk max.
- I/O isolation 1000 VDC
- Operating temperature range: -40°C to +85°C

TMA series miniature, isolated 1W DC/DC converters require only 1.2 cm2 board space making them an ideal solution in many space critical applications for board level power distribution.

TMH SERIES, 2 WATT DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Single-in-line package (SIP)
- SMD-design
- Isolated single and dual output
- I/O isolation 1000 VDC
- High efficiency up to 83%
- Industry standard pinout
- 100% burn-in (8 h)
- 3-year product warranty

Specifications:
- Regulation:
  Line regulation: ± 1.2% / 1% change Vin.
  Load regulation: ± 10% max.
- Ripple & Noise: (5 Vin models) 75 mV pk-pk max. (12/24 Vin models) 150 mV pk-pk max. (20 MHz BW)
- I/O-Isolation: 1000 VDC
- Operating temperature range: -40°C to +85°C, above 70°C derating 3%/K

TMH series are ultra miniature, isolated 2 Watt DC/DC converters. Requiring only 1.5 cm2 board space they offer the ideal solution in many space critical applications for board level power distribution.

TMR 2 SERIES, 2 WATT, DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Wide 2:1 input voltage range
- Full SMD design
- Temperature range –40° to +85°C
- High efficiency
- Excellent load and line regulation
- 3-year product warranty

Specifications:
- Regulation:
  Line variation: ± 0.5% max.
  Load variation:± 0.85% max. (3.3VDC models)
  0.75% max. (single output models)
  ± 1.0% max. (balanced load)(dual output models)
- Ripple & Noise: 50 mVpk-pk typ. (20 MHz BW)
- I/O isolation 1000VDC
- Operating temperature range: -40°C to +85°C, above +75°C derating 2%/K

TMR-2 series isolated 2 Watt DC/DC converter modules with regulated output. The compact SIP-8 plastic package with small footprint occupy only 2.0 cm² (0.3 square in.) of board space. Further features include remote On/Off control and continuous short circuit protection. The ultra-compact dimensions makes them ideal for many space critical applications in communication equipment, instrumentation and industrial electronics.

TMR 3WI SERIES, 3 WATT, DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Highest power density in SIP package
- Ultra wide 4:1 input range
- Small footprint: 21.8 x 9.2 mm
- Temperature range –40° to +85°C
- High efficiency up to 81%
- Excellent load and line regulation
- Short-circuit protection
- Remote On/Off control
- 3-year product warranty

Specifications:
- Regulation:
  Line variation: ± 0.2% max.
  Load variation: ± 1% max. (single output models)
  ± 1% max. (balanced load) (dual output models)
- Ripple & Noise: 30 mVpk-pk max. (20 MHz BW)
- I/O isolation 1500VDC
- Operating temperature range: -40°C to +85°C, above +70°C derating 3.3%/K

TMR-3WI series are isolated 3W DC/DC converters with regulated output. The product comes in a ultra-compact SIP plastic package with a small footprint occupying only 2.0 cm² (0.3 square in.) of board space, ideal for many space critical applications in battery-powered equipment and instrumentation.

TEN 5WI SERIES, 6 WATT, 4:1 INPUT RANGE DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Ultra wide 4:1 Input Range
- High efficiency up to 84%
- Input filter meets EN 55022, class A and FCC, level A
- Short circuit protection
- Industry standard pin out
- Six-side shielded metal case, with insulated base plate
- Safety standards / approvals: UL/cUL 60950-1, IEC/EN 60950-1 and CB report
- 3-year product warranty

Specifications:
- Regulation:
  Line regulation: ± 0.3% max.
  Load regulation: ± 2.0% max.
- Ripple & Noise: 75 mVpk-pk typ. (20 MHz BW)
- I/O-Isolation: 1500 VDC
- Operating temperature range: -40°C to +85°C, above 70°C derating 3.5%/K

TEN 5WI series of high performance DC/DC converters feature over voltage protection and continuous short circuit protection. Typical applications are battery operated equipment and distributed power architectures in communication, instrumentation and industrial electronics, everywhere a wide input voltage range is required.

TEN 8WI SERIES, 8 WATT, DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Ultra wide 4:1 input range
- High efficiency up to 88%
- Input filter meets EN 55022, class A and FCC, level A with external capacitor
- Short circuit protection
- Six-side shielded metal case, with insulated base plate
- Remote on/off
- Industry standard pin out
- 3-year product warranty

Specifications:
- Regulation:
  Line regulation:± 0.2% max.
  Load regulation: ± 0.5% max. (single output models)
  ± 1.0% max. (dual output models)
- Ripple & Noise: 50 mVpk-pk typ. (20 MHz BW)
- I/O-Isolation: 1500 VDC
- Operating temperature range: -40°C to +85°C, above 70°C derating 3.5%/K
- Remote On/Off: shutdown input for low current (2.5 mA) in standby operation

TEN 8WI series high performance DC/DC converters feature over voltage protection and under voltage lockout. Full SMD-design with use of ceramic chip capacitors provides high reliability and long product life. Safety standards / approvals: cUL/UL 60950-1, IEC/EN 60950-1.

THN 15WI SERIES 15W DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

- Smallest encapsulated 15W converter
- Ultra compact size: 1.0 x 1.0 x 0.4"
- Shielded metal case with isolated baseplate
- Ultrawide 4:1 input ranges 9-36VDC or 18-75VDC
- Output voltage trim
- I/O isolation voltage 1500VDC
- Very high efficiency up to 87%
- Operating temp. range : -40°C to +85°C
- Remote On/Off control
- Industry standard pinout
- 3-year product warranty

TEN 20WIN SERIES, 20 WATT, DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- High power density in 2 x 1 x 0.4" package
- Ultra wide 4:1 input range
- High efficiency up to 88%
- Short circuit protection
- Remote on/off
- Industry standard pin out
- Metal case with insulated base plate
- 3-year product warranty

Specifications:
- Regulation:
  Line variation:: ± 0.2% max.
  Load variation: ± 0.5% max. (single output models)
  ± 1.0% max. (dual output models)
- Output voltage adjustment: ±10% (only single output models by external resistor)
- Conducted EMI: EN 55022, class A and FCC, level A, with ext. capacitor
- Ripple & noise (20 MHz BW): 75mV pk-pk typ. (single output models)
  100mV pk-pk typ. (dual output models)
- I/O-Isolation: 1500 VDC
- Operating temperature range: -40°C to +85°C; above 65°C derating 2.5%/K

TEN 20WIN series of high performance DC/DC converters feature output voltage trimming and over voltage protection. Typical applications include battery operated equipment and distributed power architectures in communication and industrial electronics, everywhere isolated tightly regulated voltages are required. Safety standards/approvals: UL/cUL 60950-1, IEC/EN 60950-1.

TEN 25WI SERIES, 25/30 WATT, DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Ultra wide 4:1 input voltage range
- Adjustable output voltage
- Input filter meets EN 55022, class A and FCC, level A without external components
- 3-year product warranty

Specifications:
- Regulation:
  Line variation: ± 0.5% max.
  Load variation: ± 1% max. (single output models)
  ± 2% max. (balanced load) (dual output models)
- Ripple & Noise: 80 mVpk-pk max. (20 MHz BW)
- Operating temperature range: -40°C to +85°C, above 55°C derating 2%/K, above 65°C derating 2.5%/K

TEN 25WI series high performance 30W DC/DC converter modules feature ultra wide 4:1 input voltage ranges in a compact low profile case with industry standard footprint. Standard features include remote On/Off, output voltage trimming, over voltage protection, under voltage lockout, over temperature and short circuit protection.

- SMD package (SOIC-14/18)
- Construction in lead frame technology
- Isolated single and dual Output
- High efficiency
- Operating temperature –40°C to +85°C
- Reflow solder temperature up to 245°C
- High accuracy of pin co-planarity
- Available in tape and reel package
- 3-year product warranty

Specifications:
- Regulation:
  Line variation: 1.2%/1% change Vin
  Load variation:10% max.
- Ripple & Noise: 120 mVpk-pk typ. (20 MHz BW)
- I/O-Isolation 1000VDC
- Operating temperature range: -40°C to +85°C (no derating)

TSM series are isolated DC/DC converters with 1 watt output power implemented in a molded plastic package with a pin accuracy suitable for automated SMD production. The devices can be soldered without any problems in a high temperature lead free solder process. With their small footprint these converters are the economical solution for point of load power conversion, ground loop elimination, noise reduction and digital interface applications.

TES 2N SERIES, 2 WATT, DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

Features:
- Low profile SMD-package
- Wide 2:1 input voltage range
- Short-circuit protection
- Qualified for leadfree reflow solder process according IPC J-STD-020C
- Available in tape and reel package
- 3-year product warranty

Specifications:
- Regulation:
  Line variation: ± 0.5% max.
  Load variation: ± 0.75% max. (single output models)
  ± 2.0% (balanced load) (dual output models)
- Ripple & Noise: 50 mVpk-pk typ. (20 MHz BW)
- I/O isolation 1500VDC
- Operating temperature range: -40°C to +85°C, above +71°C derating 3.5%/K

TES-2N series high performance 2 Watt DC/DC converter modules require just 3 cm² space on the PCB. A high efficiency allows an operating temperature range of –40°C to +85°C. A built-in EMI input filter complies with EN 55022, class A. Typical applications include battery operated equipment, instrumentation, communication and industrial electronics, everywhere isolated, tightly regulated voltages are required.

THD 12WI SERIES 12W DC/DC CONVERTERS

RoHS Compliant Available

TRACO POWER

- Highest power density: 12W in DIP 24 package
- Ultra-wide 4:1 input range
- Very high efficiency up to 85%
- I/O isolation 1500V
- Input filter meets EN 55022A without ext. components
- Remote On/Off
- Under voltage lock-out circuit
- Shielded metal case with insulated baseplate
- Continuous short-circuit protection
- Operating temp. range -40°C to +85°C
- Lead free design, RoHS compliant
- Ripple and noise (20 MHz bandwidth): 85 mVpk-pk max.
- Load variation 10 – 100 % single output models: 0.5 % max.
- Dual output models balanced load: 1.0 % max.
- Dual output models unbalanced load: 5.0 % max
- 3-year product warranty

RoHS Compliant Available

TRACO POWER

Features:

- Rugged, compact metal case
- Screw terminal adaptor available
- Wide 2:1 input voltage range
- Full load operation up to 60°C with convection cooling
- Soft start
- Reverse input voltage protection
- Input protection filter
- Three-year manufacturer's warranty

Specifications:

- Regulation:
  Line variation: ± 0.2% max.
  Load variation: ± 0.3% max.
- Ripple & Noise: 75 mVpk-pk max. (20 MHz BW) 3.3 & 5VDC models, 100 mVpk-pk max. 12 & 15VDC models, 200 mVpk-pk max. 24 & 28VDC models, 300 mVpk-pk max. 48VDC models
- I/O isolation: 2250VDC input/output, 1500VDC input/case
- Operating temperature range: -40°C to +75°C

TEP-100 series isolated high performance DC/DC converter modules with ultra-wide 2:1 input voltage range feature output voltage trimming, remote on/off and under voltage lockout. Suitable for a wide range of applications, but designed for industrial applications where often no PCB mounting is possible and the module has to be mounted on a chassis. For easy connection there is a unique adaptor with screw terminals available; *go online or call*. For a converter with chassis mount adapter add suffix **-CM** to mfg. part no.; *go online or call.*

JCB SERIES 3W DC-DC CONVERTERS

RoHS Compliant Available

XP Power

- 2:1 input range
- Operating temperature -40°C to +100°C
- Single & dual outputs
- 1500VDC isolation
- 3 year warranty

SPECIFICATIONS:

Input Voltage:	5V (4.5-9VDC), 12V (9-18VDC), 24V (18-36VDC), 48V (36-72VDC)
Line Regulation:	±0.5% max
Load Regulation:	±0.5% max
Isolation Voltage:	1500VDC
Ripple & Noise:	60 mV pk-pk max, 20 MHz bandwidth
MTBF:	>2 MHrs to MIL-HDBK-217F at 25°C, GB
Operating Temp:	-40°C to +100°C, derate from 100% load @ +85°C to no load at +100°C
Dimensions (H x W x L):	0.40 x 0.80 x 1.25" (10.16 x 20.32 x 31.75mm)

SINGLE OUTPUT

IZ SERIES 3 WATT REGULATED SINGLE AND DUAL OUTPUT DC/DC CONVERTERS

RoHS Compliant Available

XP Power

- Regulated single and dual output
- Wide 2:1 input range
- SIP package
- 1600VDC isolation
- Continuous short circuit protection
- Remote on/off
- Three-year manufacturer's warranty

SPECIFICATIONS:

Input Voltage:	5VDC (4.5-9VDC) 12VDC (9-18VDC) 24VDC (18-36VDC) 48VDC (36-72VDC)
Line Regulation:	±0.5% max.
Load Regulation:	±1% max. from 25-100% Load
Isolation Voltage:	1600VDC
Ripple & Noise:	75mV pk-pk max., 20MHz BW
MTBF:	>1.34MHrs. to MIL-HDBK-217F @ 25°C, GB
Operating Temperature:	-40°C to +70°C Derate from 100% Load, @ 70°C to 0% Load @ 100°C
Dimensions:	0.86W x 0.44H x 0.36"L

DC-TO-DC CONVERTERS

JCD SERIES 4-6W SINGLE & DUAL OUTPUT DC-DC CONVERTERS

RoHS Compliant Available

XP Power

- 2:1 Input range
- Industry standard package
- 1600VDC isolation
- Continuous short circuit protection
- -40°C to +100°C operating temperature
- Single and dual outputs
- Three-year manufacturer's warranty

SPECIFICATIONS:	
Input Voltage Range:	5V (4.5-9VDC), 12V (9-18VDC), 24V (18-36VDC), 48V (36-72VDC)
Line Regulation:	±0.5%
Load Regulation:	±0.5% single outputs, ±1.5% for S3V3 & D03 models
Ripple & Noise:	60 mV pk-pk, 20 MHz bandwidth
Isolation:	1600VDC Input to Output, 1600VDC Input to Case, 1600VDC Output to Case
Operating Temperature:	-40°C to +100°C
Dimensions:	10.4 x 20.32 x 31.75mm (0.4 x 0.8 x 1.25")
Emissions:	EN55022 Class A conducted with external components
